REMARKS CONCERNING THE PLAN OF THE WORK.

It will be seen that the plan adopted in the present work has been to deal separately with the events of different countries. The events in any one year are not arranged all in chronological order, but each state is introduced independently. Several countries are, of course, grouped together in one division whenever the connection of events demands. In the history of the Middle Ages and of modern times down to the American Revolution the first place, as a rule, is accorded to the British Isles. France follows, and next in order come the countries of central Europe and Italy and Spain, after which the remaining states of Europe are introduced. The political history of the whole of the Old World is given before that of the New. From the time of the American Revolution the first place is assigned to the United States, the order otherwise remaining in the main as before. It has been deemed proper to present the history of Europe in the year 1848 in a connected sketch. Events not political are always left to the end. The names in the obituary lines are arranged in chronological order.

CHRONOLOGICAL ACCURACY.

A comparison of the dates in this book with those in any ordinary work of reference will reveal a great amount of discrepancy. It is little understood to what an extent encyclopedic publications contradict each other in the matter of dates. Uniform accuracy is seldom achieved, owing to the amount of labor involved and the readiness to accept dates on the part of compilers, who are little apt to be on their guard

where no special reason for doubt is present. Even able and conscientious historians will often slip into chronological errors. It will frequently happen that where the concurrent statements in several reference-books appear to leave no doubt whatever concerning the date of a particular historical event, a grave error will result from relying on the testimony.

An experience of many years in the editorial department of the "American Cyclopædia" charged with the verification of historical and biographical dates, has taught the compiler of the present work the lesson of mistrust and caution. A few examples may serve to give the reader an idea of the singular pitfalls which beset the path of the chronologist, and of the confusion and contradiction which he constantly encounters.

The date of the capture of Prague by the forces of France and her allies in the War of the Austrian Succession is Nov. 26, 1741. In the compendious "Encyclopædia of Chronology" of Woodward and Cates (London, 1872), under PRAGUE, we are informed that the event took place Oct. 26, 1742, and we meet with the same date in the article on that city in the fourth edition of "Pierer's Universal-Lexikon."* In this latter work, in the article ÖSTERREICHISCHER ERBFOLGESKRIEG, the event is mentioned in the account of the operations of 1741, but we still find Oct. 26 instead of Nov. 26, and, to remove all doubt from the mind of the perplexed student, there immediately follows the statement that on Oct. 27 the elector of Bavaria entered the captured city.† In William Coxe's standard "History of the House of Austria" (1807) the event is likewise placed a month too early. In "Oesterreich unter Maria Theresia," &c. (Berlin 1882-'4), forming part of Wilhelm Oncken's great historical collection, "Allgemeine Geschichte in Einzeldarstellungen," the city is stated to have fallen in the night of Dec. 5-6. Oncken's own work in the same collection, "Das Zeitalter Friedrich's des Grossen," gives

* The correct date is given in the sixth edition.

† The dates do not occur in the corresponding article (greatly condensed) in the last edition of the "Universal-Lexikon."

the correct date. Under the head of BELLEISLE in the "Encyclopædia of Chronology" both month and year are correctly stated.

In 1800 a conspiracy was formed against the life of Bonaparte by Ceracchi, Aréna, and others. The First Consul was to be assassinated Oct. 10. The plot was betrayed, and on that day the conspirators were seized, and they were executed Jan. 30, 1801. The "Encyclopædia of Chronology," under the head of CERACCHI, gives as the respective dates Oct. 10, 1801, and Feb. 10, 1802. In the voluminous "Dictionnaire encyclopédique de l'histoire de France," edited by Le Bas, the article on Aréna informs us that he engaged in the plot of Oct. 10, 1801, and that he was executed Jan. 30, 1802. Dr. Thomas, in his excellent "Dictionary of Biography," both in the notice of Ceracchi and in that of Aréna, has likewise slipped into the error of stating that they met their death in 1802. We also find 1802 in the article on Aréna in the fourth edition of the "Universal-Lexikon."*

Garibaldi's victory over the Neapolitan forces at Velletri was achieved May 19, 1849. Instead of May 19 we find March 19 (in each case under the head of VELLETRI) in the "Encyclopædia of Chronology," in the twelfth edition of "Brockhaus' Conversations-Lexikon" (1879), and in "Beeck's Handlexikon der Geschichte und Biographie" (Berlin, 1881), a chronological manual remarkable for accuracy. This case is a curious instance of false concurrent testimony with regard to the date of an event near to our own time.

The capture of Jefferson Davis took place on the morning of May 10, 1865. May 11 is the date given in Greeley's "American Conflict," in Lossing's "History of the Civil War," in "Haydn's Dictionary of Dates" (under the head of UNITED STATES), and in "Unsere Zeit" (a supplement to "Brockhaus' Conversations-Lexikon"). In Oscar Jäger's supplement to Schlosser's "Weltgeschichte" we have May 13, and we find the same error in the notice of Davis in the thirteenth edition of "Brockhaus' Conversations-Lexikon" (1883).

* The error does not occur in the last edition.

The utmost confusion prevails in books respecting dates in the seventeenth century and the first half of the eighteenth, resulting from the circumstance that the Gregorian calendar was adopted at different times by different countries.* It has been customary with historians down to our own time to retain the Old Style in treating the history of a Protestant country in the period before the adoption of the New Style in that country, but there is no uniformity in this respect, the New Style being very frequently used. The dates of events of an international character (battles, treaties), events belonging at once to the history of a Protestant and a Catholic country, are given according to the Old Style by one writer and by another according to the New. In treating of the wars between the English and the French in the seventeenth century and the first half of the eighteenth, the French historians will follow the Gregorian calendar, the English to a great extent the Julian. The same writer will not unfrequently use the Old Style in one place and the New in another. The case grows worse when we come to encyclopedic publications, in whose preparation different authorities are consulted at every step. The individual statements in any one work will frequently be found to contradict each other. Let us take some of the principal events in the Thirty Years' War, and examine the

* The reformation of the calendar instituted by Pope Gregory XIII. in 1582 consists in amending the Julian calendar by reducing the number of leap years in 400 years from 100 to 97, the centurial years being made ordinary years except those whose numbers are divisible by 400 (1700, 1800, 1900, 2100, etc., being ordinary years, and 1600, 2000, 2400, etc., leap years). The reckoning, according to the Julian calendar, or Old Style, thus drops back 3 days in 400 years behind the New Style. Gregory XIII. directed that ten days be dropped out of the year 1582 (Oct. 5 was made Oct. 15), so as to bring back the vernal equinox to where it had been at the time of the council of Nice (325), it having retrograded to March 11. The difference between Old and New Style remained 10 days down to 1700 (1600 having been retained as a leap year); from 1700 to 1800 it was 11 days; since 1800 it has been 12 days; from 1900 to 2100 it will be 13 days. The Gregorian calendar was at once or soon adopted by the Catholic countries, but the Protestant states continued long to adhere to the Julian calendar. In the Protestant states of Germany, in Denmark, and in the greater part of Holland, the change from Old to New Style was made in 1700; in Great Britain, in 1752; in Sweden, in 1753. Russia has retained the Old Style to the present day.

chronological statements in various works. The date of the storming of Magdeburg in the "Encyclopædia of Chronology" is given (under the head of **MAGDEBURG**) according to the New Style, May 20, 1631; in "Haydn's Dictionary of Dates," according to the Old, May 10. The battle of Leipsic (under the head of **LEIPSIC**) is given in both according to the Old Style, Sept. 7, 1631, and each gives the battle of Lützen (under the head of **LÜTZEN**) according to the New, Nov. 16, 1632. In the notice of General Pappenheim the "Encyclopædia of Chronology" gives Nov. 6 as the date of the latter battle. In the "Encyclopædia of Chronology" the battle of Wittstock is stated to have been fought Oct. 4, 1636 (the date according to the New Style) under the head of **WITTSTOCK**, and Sept. 24 under the head of **BANNIER** (*Banér*). The writer of the article **AUSTRIA** in the last edition of the "Encyclopædia Britannica" gives the capture of Magdeburg and the battles of Lützen and Wittstock according to the New Style, but the battle of Leipsic according to the Old. In Weber's universal history we have the Old Style for the battles of Leipsic and Lützen, and the New for the battle of Nördlingen (Aug. 27-Sept. 6, 1634) and that of Wittstock. It will occasionally happen that writers who use the New Style will fall into the ludicrous error of adding 10 (11) days to a date already converted to the New Style. In the article on the Thirty Years' War in the very valuable "Encyklopädie der neueren Geschichte" (Gotha, 1880-'84) the writer, who uses the New Style, gives March 16, 1629, as the date of publication of the Edict of Restitution, which, however, was dated March 6 according to the Gregorian calendar, and in like manner he states that the battle of Wittstock was fought Oct. 14, 1636, when in reality the true date is Oct. 4, New Style (Old Style, Sept. 24), which date is given in the same work in the article **BANER**.

Another source of perplexity to the chronologist, more especially in dealing with biographical dates, arises from the circumstance that the time of the beginning of the Christian year has been variously placed at different periods and in different countries, so that it frequently happens that an event described as having taken place in a particular year by a contemporary writer

actually falls in a different year according to modern chronological reckoning.*

Two cases will here be presented in which there is a bewildering confusion in books due to the cause here indicated. The first is the date of the accession of the house of Stuart to the throne of Scotland in the person of Robert II., who was proclaimed king Feb. 22, 1371 (according to the old mode of reckoning, 1370), on the death of David Bruce. Let us first open the "Encyclopædia of Chronology." Under the head of SCOTLAND and under ROBERT II. we find the date correctly stated. In the notice of David Bruce, however, that monarch is stated to have died Feb. 22, 1370. In Margaret Macarthur's "History of Scotland," which forms part of Freeman's "Historical Series," we likewise find 1370. The same error appears three times in Hermann's "Lexikon der allgemeinen Weltgeschichte" (1882), under BRUCE, SCHOTTLAND, and STUART, and twice in "Brockhaus' Conversations-Lexikon" (twelfth edition), in the articles SCHOTTLAND and STUART. "Pierer's Universal-Lexikon" (sixth edition) gives 1371 in the article SCHOTTLAND and 1370 under STUART. The second case is the date of the institution of the Order of the Golden Fleece by Philip the Good, duke of Burgundy, on the occasion of his nuptials with Isabella of Portugal. The event took place in the town of Bruges Jan. 10, 1430, or, according to the old mode of reckoning, 1429, the year having to run on till Easter. We find the wrong year 1429 in Beeck's "Handlexikon der Geschichte und Biographie," in "Haydn's Dictionary of Dates," in Hermann's "Lexikon der allgemeinen Weltgeschichte" (in the notice of Philip the Good), and in the sixth edition of "Pierer's Universal-Lexikon" (in the article on the Golden Fleece and in that on Philip the Good). The "Encyclopædia of

* In England the year formerly began with the 25th of March. It was not until 1752 that the first of January was made the beginning of the legal year. In parts of Italy, likewise, the first day of the year was the 25th of March down to the close of the last century, and the Pisan reckoning was a year ahead of the Florentine. In the Venetian Republic it was the first day of March. In France during the period of the Capetian and Valois dynasties the year began with Easter. The duchy of Burgundy and portions of the Netherlands had the same reckoning.

Chronology" gives Jan. 10, 1429 (citing an authority) under the head of GOLDEN FLEECE, and in the notice of Philip his marriage is stated to have taken place on that day, but under the head of BRUGES we are correctly informed that the Order of the Golden Fleece was instituted in 1430.

Chronological inaccuracy in books is in no small measure merely the evidence of faulty printing. In the present work the proof-reading has been so carefully done that the author feels assured that this source of error has been completely eliminated.

428. Revolt of Lesbos from the Athenian confederacy.
427. The Athenians reduce Mytilene, and become masters of Lesbos. Platæa, the ally of Athens, surrenders to the Peloponnesians.
425. The Athenian commander Cleon takes Sphacteria. Death of Artaxerxes I. Reigns of Xerxes II. and Sogdianus.
424. The Spartan general Brasidas takes Amphipolis. Victory of the Bœotians over the Athenians at Delium. Accession of Darius II., Nothus, in Persia.†
423. Banishment of Thucydides from Athens.
422. Cleon, sent by the Athenians to recover Amphipolis, is defeated and slain by the army of Brasidas, who also falls in the battle.
421. Peace of Nicias between Athens and Sparta.
419. Alcibiades leads an Athenian expedition into the Peloponnesus.
415. The Athenians undertake an expedition against Syracuse.

* The Consulship, however, was not done away with; it alternated irregularly with the office of the military tribunes till the passage of the Licinian Rogations, when it was restored as a permanent annual magistracy. See 364.

† Some authorities place this event in 425.

414. The Athenians, under Nicias, invest Syracuse. The Spartan commander Gylippus, with a fleet of Corinthian ships, comes to the aid of the city.
413. The Spartans, at the instance of Alcibiades, take up a fortified position at Decelea, in Attica. The Athenian commander Demosthenes is sent to the assistance of Nicias. Complete ruin of the expedition against Syracuse.

- 405 (404?). Persia loses her dominion over Egypt. (The country resubjected about 340.)
404. Surrender of Athens to Lysander. End of the Peloponnesian War; Sparta all-powerful in Greece. Establishment of the Thirty Tyrants in Athens. About the close of the year † they are overthrown by Thrasybulus.
403. Thrasybulus restores democracy in Athens.
401. Expedition of the younger Cyrus against his brother, Artaxerxes II. He is slain in the battle of Cunaxa.
- 401-400. The Greek auxiliaries of Cyrus, the Ten Thousand, effect their retreat to the sea under the lead of Xenophon.
399. Sparta engages in a war with Persia.
Condemnation and death of Socrates.
396. The Spartan general Agesilaus enters upon his victorious campaigns against the Persians.
- 396 (*Smith's Dict., Hertzberg; 392, Rawl.*). The Romans, under Camillus, take Veii.
395. Thebes, Corinth, Argos, and Athens enter into a league against Sparta. The Thebans defeat the Spartans at Haliartus; death of Lysander.

* This event is placed by Justi in 404.

† According to German authorities at the beginning of 403.

394. The Persian fleet, under the Athenian admiral Conon, overwhelms that of the Spartans, under Pisander, off Cnidus. Victory of the Spartans, under Agesilaus, over the forces of the confederate Greeks at Coronea.
393. The Athenians, under the guidance of Conon, undertake the restoration of their fortifications.
- 388 (*Hertzberg; 387, Rawl.*)* The Gauls, under Brennus, vanquish the Romans on the Allia, and burn Rome.
387. Sparta, through the mediation of Persia, forces the Greek states to accept the Peace of Antalcidas.
382. Sparta engages in a war against Olynthus. The Spartans seize the citadel of Thebes.
379. The Spartans force the Olynthians into submission. Pelopidas and his associates deliver Thebes from the Spartans.
378. Athens joins Thebes against Sparta.
376. Naval victory of the Athenians, under Chabrias, over the Spartans off Naxos.
371. The Thebans, under Epaminondas, vanquish the Spartans, under Cleombrotus, at Leuctra. Thebes becomes the dominant power in Greece.
370. Foundation of the Arcadian confederacy.
- 370-369. Epaminondas undertakes his first expedition into the Peloponnesus. He threatens Sparta, which is preserved by Agesilaus.
369. Foundation of Megalopolis as the centre of the Arcadian confederacy. Rise of a new Messenian state under the auspices of Epaminondas. Foundation of the city of Messene.
- 369 or 368. Pelopidas is sent by the Thebans on his first expedition against Alexander of Pheræ.

REORGANIZATION OF THE POLITICAL SYSTEM OF EUROPE
BY THE CONGRESS OF VIENNA.

France is permitted to retain the limits existing at the outbreak of the Revolution.

Austria is reinstated in the possession of all the territories belonging to her at the outbreak of the French Revolution, with the exception of Belgium (conquered by the French in 1794) and of Breisgau and other territories annexed to the South German states;

her dominion being re-established in Lombardy (given up to the French in 1797), in Tyrol (transferred to Bavaria in 1805), and in the territories constituted by Napoleon into the Illyrian Provinces in 1809. Venetia, Venetian Istria, and Dalmatia (all acquired in 1797, and lost in 1805) are restored to her, as is also Salzburg (acquired in 1805, and annexed to Bavaria in 1810). West Galicia (taken in the third partition of Poland, 1795, and united with the duchy of Warsaw after the war of 1809) remains severed from Austria.

Prussia resumes possession of the territories west of the Rhine ceded to France in 1795 and of the German territories lost in 1806-'7 (not reckoning Hanover, acquired in 1805), excepting East Friesland and Hildesheim, given to Hanover in exchange for Lauenburg. Of the Polish territories taken from her to form the duchy of Warsaw (created in 1807), she recovers the western portion, which is constituted the grand-duchy of Posen. Dantzic (held by the French from 1807 to the beginning of 1814) is also reunited with Prussia. Of the territories ceded in exchange for Hanover in 1805, viz., Anspach, Baireuth, Cleves, and Neufchâtel, she recovers Cleves and Neufchâtel, Bavaria retaining Anspach and Baireuth. She receives as new possessions half of Saxony, most of the former archbishoprics of Treves and Cologne, the territories of the grand-duchy of Berg and of the duchy of Jülich, and also Swedish Pomerania (with Rügen), given to Denmark in compensation for the loss of Norway, and made over by that power to Prussia in exchange for Lauenburg.

The bulk of the duchy of Warsaw is erected into the new kingdom of Poland, placed under the sceptre of Russia. The republic of Cracow is created and placed under the protection of the Great Powers.

Russia retains Finland (conquered from Sweden in 1808-'9).

The king of Sweden is confirmed in the possession of Norway.

Hanover, Hesse-Cassel, Brunswick, and Oldenburg resume their position as independent states, Hanover being erected into a kingdom. The order of things introduced in Germany after the treaty of Lunéville—that is, the incorporation of the ecclesiastical states and free cities with the larger members of the federal body—remains perpetuated. Hamburg, Bremen, Lübeck, and Frankfort, alone of all the free cities, reappear as autonomous political units. Of the territory of the Lower Palatinate west of the Rhine (ceded to France in 1801), the greater portion is reunited with Bavaria. Baden retains Heidelberg and Mannheim (formerly included in the Palatinate), acquired in 1803. The former see of Würzburg is united with Bavaria.

The members of the former German Empire enter into a new union, the German Confederation.

Holland and Belgium are united, and erected into the kingdom of the Netherlands for the house of Orange. Luxemburg (previously part of the Austrian Netherlands) is erected into a grand-duchy for the king of the Netherlands (to be included, as formerly, in the Germanic body).

The house of Savoy is reinstated in the possession of the continental dominions of the kingdom of Sardinia (Savoy and Nice, lost in 1792, and Piedmont, lost in 1798), and is invested with the dominions of the former republic of Genoa.

Ferdinand III. (brother of the emperor Francis) is restored to the throne of Tuscany.

Francis IV., grandson of Ercole III. of Este (and cousin of the emperor Francis), is placed on the throne of Modena.

Ferdinand IV. of Naples and Sicily is reinstated in his continental possessions (given to Joseph Bonaparte in 1806, and to Murat in 1808).

The States of the Church are restored in nearly their former extent, France retaining Avignon and Venaissin.

Parma is given to the ex-empress Maria Louisa.

Lucca is given to the Spanish infanta Maria Louisa (widow of Louis, son of the last duke of Parma, and ex-queen of Etruria) and her son, Charles Louis.*

The Austrian dominions in Italy are erected into the Lombardo-Venetian Kingdom.

Spain is secured to the dispossessed Bourbon dynasty.

The Swiss Confederacy is reconstituted with 22 cantons.

Of the colonial possessions taken by England from the Dutch and French, she retains Cape Colony, Ceylon, a large portion of the Dutch possessions in Guiana, Mauritius, Tobago, and Santa Lucia. She is secured in the possession of Malta and Heligoland.

APPENDIX.

Egypt—[B. C.]—Date of the foundation of the first dynasty according to Lepsius, about 3900; according to Bunsen, about 3600; according to Mariette, about 5000.

Brugsch, presenting what he regards as a plausible approximative reconstruction of the chronology of the first 17 dynasties, gives :

Foundation of the first dynasty, about 4400; reign of Khufu (Cheops), the builder of the Great Pyramid of Gizeh, about 3700; invasion of the Hyksos or Shepherds, about 2200; subversion of the dominion of the Hyksos and foundation of the 18th dynasty (New Empire), about 1700.

Some Egyptologists reduce the period preceding the invasion of the Hyksos to less than 1000 years. Rawlinson is inclined to assign to the period of the Hyksos no more than 200 years. With the foundation of the 18th dynasty the chronological uncertainty ceases in a great measure. Brugsch's date for this event accords with the chronology of Lepsius. Reginald Stuart Poole and Birch incline to a somewhat later date.

Period of the greatest power and splendor of the New Empire, from about 1700 (1600) to about 1250—principal kings: Aahmes (Amasis), founder of the 18th dynasty, Thothmes III. and Amenhotep III., of the same dynasty, Seti I. and Rameses II. (the Sesostris of the Greeks), of the 19th dynasty, and Rameses III. of the 20th dynasty; expedition of Sheshonk (Shishak) against Judah, about 949 (*Duncker; about 973, Biblical chronology*); period of Ethiopian and Assyrian overlordship, about 750-650; Psamatik I. (Psammetichus), king over the whole country, from about 650; reign of Necho, about 610-595; Psamatik II., about 595-589; Hophra (Apriis), about 589-570; Amasis, about 570-527; under Psammenitus (Psamatik III.), the country is conquered by the Persian king Cambyses, 527 (525 ?); again independent, 405 (404 ?); Persian dominion re-established, about 340; occupied by Alexander, 332; on Alexander's death, 323, assigned to Ptolemy Lagi; Ptolemy Lagi assumes the title of king, 306; end of the Ptolemaic dynasty, kingdom annexed to the Roman dominions, 30 B. C.

Pyramids of Gizeh—The date of the erection of the Great Pyramid, the pyramid of Khufu (Cheops), according to the chronology of Lepsius is about 3100 B. C. According to Brugsch the probable date would be about 3700. Mariette carries back the reign of Khufu to about 4200. Other Egyptologists assign to the monument a lesser antiquity than Lepsius. The other two pyramids of Gizeh are the work of the immediate successors of Khufu.

Babylonia—[B. C.]—The various portions of the country permanently united into a single powerful monarchy, about 1500 (?); reign of Nabonassar, 747-734*; Tiglath-pileser II. imposes the yoke of Assyria, about 731; Merodach-baladan liberates the kingdom and mounts the throne, 721 (722); resubjugated by the Assyrian king Sargon, 710-709; Babylon destroyed by Sennacherib, about 695; its restoration undertaken by Esarhaddon, king of Assyria, about 680; unsuccessful revolt from Assyria, about 650-648; Nabopolassar throws off the authority of Assyria, about 620 (?); the Medes and Babylonians overthrow the Assyrian monarchy, 607 (606) †; reign of Nebuchadnezzar, 605-561 (562); Evil-merodach, 561-559; Neriglissar, 559-555; Nabonidus succeeds; overthrow of the monarchy by Cyrus, 538; unsuccessful effort to throw off the Persian yoke, about 521-519.

Assyria—[B. C.]—Reign of Shalmaneser I., about 1300; Tiglath-pileser I., about 1100; Assur-nazir-pal, 885-860; † Shalmaneser II., 860-825; Samsi-raman (Samsi-vul), 825-812; Raman-nirar (Vul-nirari), 812-783; Shalmaneser III., 783-773; Assur-dan-il, 773-755; Assur-nirar, 755-745; Tiglath-pileser II., 745-727; Shalmaneser IV., 727-722; Sargon, 722-705; Sennacherib, 705-681; Esarhaddon, 681-668; Assur-bani-pal, 668-626; overthrow of the Assyrian monarchy by the Medes and Babylonians, 607 (606). †

Hebrews—[B. C.]

ACCORDING TO THE COMMON CHRONOLOGY.

Establishment of royalty, Saul made king,	about 1095 (1080).
Beginning of David's reign,	1055 (1058).
Accession of Solomon,	1015 (1017).
Revolt of the Ten Tribes,	975 (977).

Destruction of the kingdom of Israel by the Assyrians,	722 (721).
Destruction of the kingdom of Judah by the Babylonians,	586 (587).

* According to the Canon of Ptolemy.

† Some authorities place this event in 625, and consider the reign of Assur-bani-pal to have terminated about 647. See Duncker, "Allgemeine Geschichte des Alterthums," fifth edition, vol. ii., pp. 473-479.

‡ The cuneiform inscriptions of the Assyrian Eponym Canon furnish a complete chronological record extending from the beginning of the ninth century nearly down to the destruction of the monarchy. This chronology is not fully in accord with that of the Bible. See HEBREWS.

The decipherment of the Assyrian cuneiform inscriptions has unsettled the chronology of the early period of authentic Jewish history.

ACCORDING TO THE ASSYRIAN RECORDS.* ACCORDING TO THE BIBLICAL CHRONOLOGY.

King Ahab fought against the Assyrians at Karkar in 854.	Ahab was slain in 900 (897).
Jehu paid tribute to Assyria in 842.	Jehu died in 859 (856).
Uzziah was still reigning in 742 or 740.	Uzziah died in 758.
Menahem paid tribute to the Assyrians in 738.	Menahem died in 762 (761).

The Assyrian records place the capture of Samaria in 722, which agrees with the Biblical chronology. With regard to the extraordinary discrepancy as to the interval between the reign of Menahem and the capture of Samaria, Jules Oppert,† who has devoted much labor to the revindication of the Biblical chronology, refuses to admit that the Menahem who figures in the Assyrian inscriptions in 738 is the Menahem of the Biblical text, and argues that there was probably a second king of Israel by that name. Duncker,‡ who has attempted a reconstruction of the Biblical chronology with reference to the data furnished by Assyriologists (as well as to the information concerning the duration of the rule of Omri and Ahab contained in the inscription on the Moabite Stone), gives as the most plausible approximate date for the death of Solomon the year 953. The beginning of Solomon's reign would then be 933, and the elevation of David in Judah, 1033.

The following is a list of the successors of Solomon with the approximate dates of their accession according to Duncker:

JUDAH.		ISRAEL.		JUDAH.		ISRAEL.	
Rehoboam,	953.	Jeroboam I.,	953.			Zachariah,	749.
Abijah,	932.					Shallum,	748.
Asa.	929.					Menahem,	748.
		Nadab,	927.	Jotham,	740.		
		Baasha,	925.			Pekahiah,	738.
		Elah,	901.			Pekah,	736.

Phœnicians—[B. C.]—Enter upon their career as a great colonizing people by establishing settlements in Cyprus, about 1250 (*Duncker*); push their voyages beyond the straits of Gibraltar, about 1100 (*Duncker*); Tyre about this time supplants Sidon as the leading city; the Phœnician cities pay tribute to Assyria, 9th-7th c.; soon after the fall of the Assyrian monarchy they are forced to acknowledge the suzerainty of Babylon; they submit to Persia, latter part of 6th c.

Tyre—[B. C.]—Becomes the leading city of Phœnicia, about 1100; the new city (the island city) besieged by Shalmaneser IV. of Assyria, about 727-722; by Nebuchadnezzar, 586-573; * reduced by Alexander the Great, 332.

* This siege is sometimes stated to have taken place in the years 598-585. The best recent authorities adopt the later dates.

VALUABLE HAND-BOOKS.

ERRORS IN THE USE OF ENGLISH.

By the late WILLIAM B. HODGSON, LL. D., Professor of Political Economy in the University of Edinburgh. American revised edition. 12mo, cloth, \$1.50.

"This posthumous work of Dr. Hodgson deserves a hearty welcome, for it is sure to do good service for the object it has in view—improved accuracy in the use of the English language. . . . Perhaps its chief use will be in very distinctly proving with what wonderful carelessness or incompetency the English language is generally written. For the examples of error here brought together are not picked from obscure or inferior writings. Among the grammatical sinners whose trespasses are here recorded appear many of our best-known authors and publications."—*The Academy*.

THE ORTHOËPIST :

A Pronouncing Manual, containing about Three Thousand Five Hundred Words, including a Considerable Number of the Names of Foreign Authors, Artists, etc., that are often mispronounced. By ALFRED AYRES. 18mo, cloth, extra, \$1.00.

"One of the neatest and most accurate pocket manuals on pronunciation is 'The Orthoëpist,' by Alfred Ayres. It seems almost impossible to secure uniformity in pronunciation. It is the study of a life to master that of our tongue. The mere labor of examining a heavy dictionary prevents many from being accurate. This little book ought to be on every library-table. It undoubtedly gives the pronunciations accepted by the best speakers."—*N. Y. Christian Advocate*.

THE VERBALIST :

A Manual devoted to Brief Discussions of the Right and the Wrong Use of Words, and to some other Matters of Interest to those who would Speak and Write with Propriety, including a Treatise on Punctuation. By ALFRED AYRES, author of "The Orthoëpist." 18mo, cloth, extra, \$1.00.

"A great deal that is worth knowing, and of which not even all educated people are aware, is to be learned from this well-digested little book."—*Philadelphia North American*.

"The author's views are sound, sensible, and concisely and clearly stated."—*Boston Transcript*.

THE RHYMESTER ;

Or, THE RULES OF RHYME. A Guide to English Versification. With a Dictionary of Rhymes, an Examination of Classical Measures, and Comments upon Burlesque, Comic Verse, and Song-Writing. By the late TOM HOOD. Edited, with Additions, by Arthur Penn. Uniform with "The Verbalist." 18mo, cloth, gilt or red edges, \$1.00.

Three whole chapters have been added to this work by the American editor, one on the sonnet, one on the *rondeau* and the *ballade*, and a third on other fixed forms of verse.

"Ten or a dozen years ago, the late Tom Hood, also a poet, and the son of a poet, published 'The Rules of Rhyme,' of which we have a substantial reprint in 'The Rhymester,' with additions and side-lights from its American editor, Arthur Penn. The example of Hood's great father in his matchless melodies, his own skill as a cunning versifier, and the accomplished editing of Mr. Penn, have made this booklet a useful guide to English versification, the most useful one, indeed, that we are acquainted with."—*The Critic*.

APPLETONS' CYCLOPÆDIA OF AMERICAN BIOGRAPHY.

Complete in six volumes, royal 8vo, containing about 800 pages each. With sixty-one fine steel portraits and some two thousand smaller vignette portraits and views of birthplaces, residences, statues, etc.

APPLETONS' CYCLOPÆDIA OF AMERICAN BIOGRAPHY, edited by General JAMES GRANT WILSON, President of the New York Genealogical and Biographical Society, and Professor JOHN FISKE, formerly of Harvard University, assisted by over two hundred special contributors, contains a biographical sketch of every person eminent in American civil and military history, in law and politics, in divinity, in literature and art, in science and in invention. Its plan embraces all the countries of North and South America, and includes distinguished persons born abroad, but related to American history. As events are always connected with persons, it affords a complete compendium of American history in every branch of human achievement. An exhaustive topical and analytical Index enables the reader to follow the history of any subject with great readiness.

From the Hon. GEORGE BANCROFT.

"It is the most complete volume that exists on the subject. The tone and guiding spirit of the book are certainly very fair, and show a mind bent on a discriminate, just, and proper treatment of its subject."

From the Hon. JAMES RUSSELL LOWELL.

"The portraits are remarkably good. To any one interested in American history or literature, the Cyclopædia will be indispensable."

From NOAH PORTER, D. D., LL. D., ex-President of Yale College.

"The selection of names seems to be liberal and just. The portraits, so far as I can judge, are faithful, and the biographies trustworthy."

From the Hon. WILLIAM E. GLADSTONE.

"A most valuable and interesting work."

From the Hon. ROBERT C. WINTHROP.

"I have examined it with great interest and great gratification. It is a noble work, and does enviable credit to its editors and publishers."

From J. B. FORAKER, ex-Governor of Ohio.

"I have carefully examined 'Appletons' Cyclopædia of American Biography,' and do not hesitate to commend it to favor. It is admirably adapted to use in the family and the schools, and is so cheap as to come within the reach of all classes of readers and students."

From FRANCES E. WILLARD, President N. W. C. T. U.

"This book of American biography has come to me with a most unusual charm. It sets before us the faces of great Americans, both men and women, and gives us a perspective view of their lives. Where so many noble and great have lived and wrought, one is encouraged to believe the soil from which they sprang, the air they breathed, and the sky over their heads, to be the best this world affords, and one says, 'Thank God, I also am an American!' We have many books of biography, but I have seen none so ample, so clear-cut, and breathing so strongly the best spirit of our native land. No young man or woman can fail to find among these ample pages some model worthy of imitation."

From the Rev. PHILLIPS BROOKS, D. D.

"I congratulate you on the beauty of the volume, and the thoroughness of the work."

From CHARLES DUDLEY WARNER.

"Every day's use of this admirable work confirms me in regard to its comprehensiveness and accuracy."

Price, per volume, cloth or buckram, \$5.00; sheep, \$6.00; half calf or half morocco, \$7.00. Sold only by subscription. Descriptive circular, with specimen pages, sent on application. Agents wanted for districts not yet assigned.
