# Acknowledgment

Not only is the *declassification of secret information of military and technological advancements* to the public prohibited in *New World Order*, but also *declassification of the secret history* is a great problem for those who want to write a *nonfiction and valuable book* like this.

Here it is, what you don't know! Where you loved to be and what you loved to learn! Your brain likes to learn something new, it is hungry to devour that kind of knowledge that is not like the ready-to-serve products that a mass marketing company would have you ingest! The Wall Street walnut, the wan and wine wandering walrus waltzing wants wanton war warble!

I remember that it was many month ago when I informed the *US President* that I like to write a *book*. *I had written to him that the subject of my book would be relating to the latest US Presidential Election* but because of the many accidents that have happened since sending these messages, and also because I received a vast variety of new information, only a very limited part of this book now is about the 2013 US Presidential Election.

**I have been all around hell**, all around the Globe. I have stayed in Russia, places so cold that your very bones inside of you shriek, so deep inside of its underground city, where you ask yourself "How is it possible for satellites with their warheads to track me here?" I have traveled to the Philippines with its beautiful and tasty confectioneries and its girls, inside the Manila bars and clubs. And then the Middle East, years ago, in the dark and fearful deserts along the Esfahan-Tehran highways in Iran. I recall the sensation of that cold dusty air in my lungs, but I as my thoughts drift back to those hours, I begin experiencing a different feeling in that hard and cold situation, the **animal farm** nearby, and me, **on the run**. It's about 2 AM and I am in my car. Damn it's so dark. From the side of the highway I hear something like a scream but I tell myself it's no problem, it's only a nightmare, a hallucination caused by the environmental situation of the ecosystem of my current geographical location. My mother is praying for her son to come back home soon. But I left her alone. And here, inside my car, I have only a knife and my secret documents here in my briefcase.

Right now 15/02/2014 I'm in **Turkey**. Today when I decided to write a **brief memo** about a few years of my **12 years cooperation with The White House and The Central Intelligence Agency** and many years of cooperation with **Human Rights Watch (HRW) and IFRC (International Federation of Red Cross and Red Crescent Societies)**; a few **political leaders of England and France**, agents of **NSA (The National Security Agency**, who didn't let me to submit any information before) and **CIA** agents and **Mossad** and **Shin Bet (Shabak)** and **USSS (The United States Secret Service)** and **Microsoft** and **DOJ (The United States Department of Justice)** communicated with me about what am I started to write now? While **Dell and Intel** company had some **unidentified** and **covert** communications with me and for sure they and also the **National Institutes of Health (NIH)** also **acted behind the scene** (Dell, from when I sent a **fax** to **Princeton University** many **years ago** while for

sure they **affect** the **politics** and the **events** what happens on the **Earth**) but writing this book was not such an important **complaint** for them which causes that they **find** me again and ask me about what I am started to **write** now, however I had a contact from the United States Environmental Protection Agency (EPA) about what I am started to write now!

This is **the first book what I am writing** as one of the **Secret Agents of The Central Intelligence Agency** and as the honorary **decision maker of President Barack Obama<sup>1</sup>** (see the footnote).

For sure to maintain security and safety we must keep **international secret information** so I don't have the permission of leaking very **top-secret** information what not only going to threaten US security and also going to weaken our homeland but causes that I lose my security and safety, get torture and some hidden hands attack me. However, you will learn about lots of secret information through reading this book. You will learn more about some parts of my life and also some parts of president Obama's life, for those people whom heard my name but they like to gain more knowledge about me and also about what happened recently in Iran, Israel, England, Turkey, France, Russia, and the relations and the affections of their policy on the American's policy and the relations and the affections of the American's policy on their policy and also on their diplomacy; a limited but a concise part of our private communications. In Chapter 1 (and also in Chapter 3) I started to write about violations against humanity. In Chapter 2 I going to describe the activities of some of the enemies of the US president (also, I going to describe you more about the recent/modern medications, about when somebody gets infected by HIV then what he must do to heal his self from the viruses, using anti retro-viral drugs, and also I will describe you about what is Cardiac & Pulmonary Rehabilitation (CPR)). In Chapter 3 you going to learn more about secret history and secret technologies, you will see some secret and classified pictures of underground naval bases and also you going to learn more about what happened to me. Chapter 4 is about espionage at most. Chapter 5 is about Communications Security and on-line (Internet) privacy and also it contains the notes of president Barack Obama and Chapter 6 is about what will happen in future, Russians advancements (Aeroflot aerospace technology, etc.) and not only about US military and technological future plans but also about international technological plans such as permanent human colony on Mars what you and your children going to see in future soon, many future plans what you haven't seen somewhere else but maybe during the next few month some other authors use inside of their book for public, later. There are some parts of the secret history what remained untold forever because of I didn't receive any kind of supports (such as political support) by the people who were living during the current century!

**Few month ago while I was a UN Refugee in Turkey<sup>2</sup> but I got sold so I was under attack and I got sleep deprived (as one of the methods of torture) for a few weeks every nights. One of the main causes of these kind of tortures on me was only because of that I informed The White House: "I like to write a book". Some people think one political leader of a country, alone, can maintain the ideal security for them but not only they are wrong but also every people who work for any political leader or any agency in a group, the group competitors attack him, sue them against each other, destroy their relations, then even if you don't have any complaint with these competitors they attack you.**

**CIA agents of the Public Affairs of The Central**

Intelligence Agency, like: dear agent Shannon and my lovely friend agent Nienie Dare decided to give a foreword for this book but because of the similarity of their foreword with the contents of my book and while for public it was so hard to understand so I decided not to write what they gave me about this book but it was a foreword to describe their love to me while they liked to say: We caused lots of problems in your life, also. We are not that much cold and you are aware of that. Here in Public Affairs mistakes melting down the planet of people who are not aware. You shall know the truth and the truth shall make you free. He had his life threatened for completing this book so that he would dedicate lots of information to you.

CIA told me<sup>3</sup> if I write a good book so they (probably) going to submit my name in The CIA World Fact Book 2035. It's interesting that I tell you, as an intelligence cooperator even when me or my friends are under attack (or harassment, while I hadn't any satellite support, I got annoyed by them, etc. What are not unclassifiable to the people of the current decades) while everyday it's like a habit for many private and governmental companies what I had communication with them before that they attack the other one, but I rarely attack the opponents diplomacy. While I have everyday communication with some security agencies and they track me and they look inside of my private life but I personally think I am that teenager student still, who must respect to some limits what is a part of public life and public culture.

**And who gave you the right to shake my family tree**

# President Barack Obama Foreword<sup>4</sup>

*When you succeed, America succeeded*

*I love to dedicate my best wishes for my friend Mr. Ghasemi who fought for humanity. This nation and the freedom we cherish can, and shall, prevail.*

*I remember one day you wrote for me “Dear truly winner of the Nobel peace prize”. Here in America we believe in actions and we like to stop people to act against logic when their mental system is depressed. When they think about something, we imagine for sure they will do that so we make a plan to decide about them before they do something wrong but a crying eye of a child can ruin those actions and plans! I recommend you read this book to find out how!*

*I remember you could not complete your university in Iran and it was necessary for you to get out of there soon because of some political complaints. There is no difference about that “am I black, white or in between?” There is no difference about that “are you from Iran or from Africa”. I'm not black, I'm not white, and so what am I?! Inside of the university you studied about the paradox of Bertrand Russell while the other students were studying it, you studied about what he did to stand against the nuclear wars, also! America is the country of immigrants so when we win America wins. Without money and food, because of the cold weather your muscles were shaking during the night and likewise what you wrote to many organizations “nobody helped you” but you wrote to The Central Intelligence Agency that “While I Receiving Money From People, To Protect US Security Even If I Died, I Died for Freedom” so you are symbol of mankind and humanity.*

*#Spicy sign don't hat#*

# The Forewords of Two US Army Members those who are Imprisoned in Iran

(Descriptions from the author):

There are two members of US-Army who militias and agents of the regime arrested them, Robert (Bob) Levinson and the other Amir Mirza Hekmati. They could not see my book but hardly we could make a short top-secret satellite communication with each other before (Because of America have a limited budget, so I was out of money to try to make them free) as you can see in my email to The Central Intelligence Agency there is a little chance for Amir to come back to his family in America, alive; while I helped Robert more than Amir, so we hope militias set him free (he don't fear of death and bravely control his stress and kept his mental situation prefect). Likewise what I analyzed when I was writing this book they kept Robert about a desert where salty waters exist around, in a geographical location about Iran (Middle East). Amir doesn't have a good emotional situation and he is imprisoned in Tehran, Iran. Even I wrote an email to their family to help them but they did not answer me but I asked Interpol to help him as much as they can.

Few days ago I heard that he (Amir) will come back to his family in America also, then he told me that I inform people "I will obey whatever they ask me to do and also there is not any guaranty about that they will let me get out of the jail." However I have never met them before personally!

**Robert Foreword<sup>6</sup>:**

When the others were getting closer to arrest me in the hotel, while I guessed that I am not threatening by violated people and when it was late, I had a contact from America but as much as they tried to make good communication privacy so I didn't understand what they meant. I could not understand they meant these peoples will arrest me. So who caused that I am arrested? For me and Amir there is a little chance to see our family again, now tell me, what have you done to help me? I don't have a good situation here but you drift me away.

I couldn't read this book yet, but reading this book is recommended.

## Amir Foreword:

I didn't receive enough support. I a little got trained in America then they sent me to Iran. My interview with Iranian governmental-national TV (IRIB) made my situation worsen about supporting by west. I recommend reading this book.

## **IFRC Foreword(Descriptions from the author):**

It was a few days ago that I wrote an email to the International Federation of Red Cross and Red Crescent Societies then I asked them to give me a hand written foreword (through sending an email to me) because of I like to submit the foreword in my book (I wrote, because of what you (the refriger\*\*\*, etc.) told me was not so clear for me nor understandable to submit it (me, myself) in this book so send it to my email address but I didn't receive any answer. This is what they told me before to submit it in my book through a secret communication method:

This book is endorsed.

The author was a beginner medic<sup>7</sup>. When he was one of the novice intelligence cooperators of the US intelligence we were writing for each other. When he was getting torture then he wrote for me a message about some kind of information what he told that he knows about Michael Jackson death tragedy, HAARP (High Frequency Active Auroral Research Program), HIV (Aids) widespread, The United Nations members of the Security Council relations with the New World Order, etc.

We recommend to everybody about that at first they respect to their own families inside of their own country, then to the others, also. Love the others all around the globe! Nowadays lots of **satellites** surrounded the Earth, they are sending trash into space, why don't we **send nuclear waste to the sun!** When the **author** was only a **child** he was reading about mathematics and space debris using Internet in Iran, one of the developing countries in the Middle East!

## NSA Foreword<sup>8</sup> See the footnote

The contents of this book is the author's self-opinion but because of eleven reasons, such as when he was only 14 years old he started his political activities, at first he selected CIA and The White House to cooperate with. He was also angry with who attacked America during 11th the September. Because of that when he was so young, he loved to stand against Iranian regime's nuclear advancements and also because of that our cooperators told that we help him, etc. So the author **has the permission to publish** this book.

# Introduction

**Espionage doesn't have any meaning for those who are not clever nor trained, but it's a beauty dirty play and going to make a scream like the scream of a pregnant mother behind micro monitor for who is clever and who is a professional hunted medic like you. Bestowment bet betide betrayal better betting shop  
(Bill Gates note for this book)**

**My life** is full of espionage and political memories because of when I started my political activities and when I started to fight for freedom of people, I was only 14, a teenager boy. During that moment of time I was listening to radio news and music which western governments were broadcasting to public in Middle East against the dictator regimes but I gained a little knowledge about the policy of these regimes; I had not read some books like *The Prince*<sup>9</sup>, *Intelligence Analysis: A Target-Centric Approach*<sup>10</sup>, **The Road to Serfdom**<sup>11</sup>, I had not skimmed the texts of Sun Tzu<sup>12</sup>, etc. I was not an agent and I was a young **boy** who was **not** even investigative like the journalisms at first but a **naughty** American **patriot** who tied a headband with American eagle which was painted on US flag on my head to satisfy my passion to our American dream; then I became more clever naughty and **investigative university student** which **caused that I got tortured** extremely hard. They sent **EMP (electrical shock) on my testis**<sup>13</sup>, **I got radiation to my chest and some kind of other secret harmful radiations to my neck and my backbone and my brain**<sup>14</sup> **but people are not aware** of that the United States has some kind of cooperation with some Islamic regimes.

Likewise what you read at the first paragraph of this introduction, my life is full of espionage and political memos but I going to write a book which a variety of audience enjoy to read, not a heavy book which dulls your brain. I got born and grown-up in Iran, traveled to Philippines and Russia then I became a UN refugee in Turkey. I could write a fiction book<sup>15</sup>, but I decided to write a nonfiction book and I describe the realities to researchers who like to learn more about parts of my life and the president Obama's life, for those who heard my name but like to gain more knowledge about me and also about what happened recently in Iran, Israel, England, Turkey, France, Russia, and the relations and the affections of their policy on Americans' policy and the relations and affections of Americans' policy on their policy and diplomacy; a limited but a concise part of our private communications and what we did behind the closed doors to change the course of the world.

When I was out of money and food and my muscles were shaking during the night because of the cold weather, like what I wrote to many organizations and also to many governmental agencies "when I ask for job, people laugh to me." But during these moments of times US president Barack Obama gave me an honor! CIA Public Affairs (through a secret and coded conversation) had approved me as an E-5 secret agent (Sergeant) of US Marine Corps to continue my cooperation (which I started many years ago) with them (with CIA) but it was for free still. Suddenly (a few month later) they approved me as an O-1 and then an O-2 secret agent (First-Lieutenant US Marine Corps). It was exactly when some others decided to kill me for what I did before! Many months passed and I completed writing this book but I was with no home still, my citizenship is delaying yet and there is a month that I could not take a shower yet! And if the big-brother took care of me not to let someone torture me using the classified methods of exposure what the governments will describe more about them during the next decades and during the next centuries, the weaponry systems what a very few nations began to use them about the 1966 (about 1960-1970 until now), and it facilitated by the UK-USA Security Agreement and specially the Great Britain and America by foundations what Winston Churchill made inside of a scientific and technological agreement with our country for us, so I could have a fine situation without stress and free of fear about the tortures! The big brother is an idiom which at first George Orwell used in his book "1984"<sup>16</sup> to describe top-ranked intelligence commanders and agents who work behind the scenes.

Me (before) and me in Turkey (now)

**President Obama is handshaking with a child (in the Middle East)**

My birth place is somewhere in the Middle East. There is not such a wise government available for the people who are living there. They are threatening by terrorism. Children born there while the parents of the children didn't learn how to live. From when they are young until the death or until they become so weak and old, some of this families work hard to gain money they receive the money then the family waste the money and it continues in a loop cycle so they never reach the wealth. Governmental pressure on people to act on Islam causes a negative effect on the teens' sexual passion to the opposite sex, not only it causes violation against women but even against men. The mullah is so devoted not to let anybody see his wife's hairs! They go to mosque and tell the audience when you see men talk with stranger women or if any parts of their body contact the other race at first you warn them, then you become angry with them so it will cause they stop it but if they continued you must attack them and if you don't do it after the death god going to put you in hell. The people those who are living in the Middle East have a long time history, beautiful and old buildings which wise architectures designed. When the children are growing-up the situation of these 3<sup>rd</sup> world countries make a violated person of the child who he not only is threatening by the dictator regime but also by the other countries who are not aware of the culture of the citizen but inside of the breaking news which we broadcast to public in America and which the other countries around the globe broadcast to their people, nobody described yet to this people some of this countries, which I can't name, even have access to satellite surveillance system (above their land, above the neighbor countries of their area). Somehow they can do a same thing what we can do (but today when I am behind my desk and I am typing these words, it is 2014, even whom don't have direct access to this facilities can pay for this providable service), they gained access to Weapons of Mass Destruction (WMDs) and Nuclear technology.

Dear Peiman Ghasemi;

U.S. Embassy in Ankara is not a designated post for refugee case processing; the Embassy is not authorized to process a refugee case. In Turkey, The United Nations High Commissioner for Refugees (UNHCR) has responsibility for assistance to and protection of refugees. As far as we understand you have approached the UNHCR and have been unsuccessful in completing the process. As our office is not involved in this process we are not responsible for the reasons of approvals or denials. You may make a formal appeal for reconsideration to the UNHCR office in Ankara. Please clarify the events and circumstances which resulted in your departure from Iran. If you need any further information about the consideration on your case you should contact the UNHCR office in Ankara.

I hope this information will be helpful to you.

Sincerely,  
Immigrant Visa Unit  
US Embassy, Ankara, Turkey

Before you send an inquiry to the Immigrant Visa Unit, please consult the updated [Frequently Asked Questions](#) section of our site.

**Subject:** immigrant visa - an answer is required

Dears

Because of some delays what happened about the appointment for my citizenship approval today I want to inform the related international organizations and the police about the current complaints when I was in Turkey. Turkish police told me that they rejected my refugee case and they stopped its processing, but I want to inform you one more time about that regarding to the laws of Iranian regime about the administrative detentions for their own citizens and also regarding to the satellites SS ████████-WMD. I want to use for the national security reasons on the people with no citizenship. Regarding to the documents what I attached to this email about many years of cooperation with US Intelligence which all documents are registered in my document files. I ask you to inform me about my citizenship status. You know even working for one of the private (non-governmental) agencies of America they arrest me in Iran! I don't have a good situation, as much as the weather was hot today in Turkey! I can't answer the suburb police (with their public answer which they made for crowd here) about continuing my temporary citizenship status and I don't want to go back to Iran from Turkey and I cause a leakage of the classified information also!

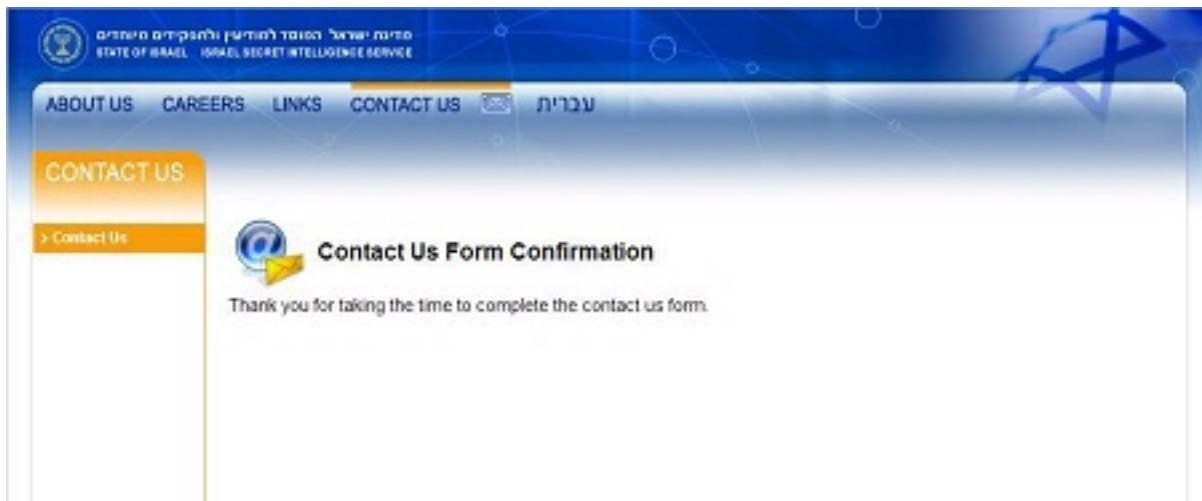

Best Wishes,  
Peiman Ghasemi

This email is UNCLASSIFIED.

Unclassified answer of the US embassy

Even if you read the current newspapers or search through Internet, you already going to find out, for

example in Iran scientists in the governmental research centers and the scientists in the nuclear facilities are enriching Uranium, as we know they have not made a nuclear bomb or lots of nuclear bombs yet but the percentage of their enriched uranium is more than what they declassified to public yet<sup>17</sup>. Secret Intelligence Service of England (SIS) and Israeli intelligence agencies (Mossad and Shin Bet) are very clever intelligence agencies what I know for a while.

Even if it causes anybody attack me but like what I wrote to CIA few days ago, I am responsible now to inform agents and people who read this book about, doing racial activities going to destroy our nation's intelligence gathering power.

If you ask from the army members or talk with them or search the tweets in twitter or search about accounts of the members of the US-Army in twitter then you going to find out many members of US-Army are PTSDs (Post-Traumatic stress disorder) but lots of them are young agents. The civil people have not seen (except of Vietnam's war, a symbol of a catastrophic nightmare in history for our armies; Afghanistan and Iraq the recent ones but not the only ones) every agents, human rights defendants or spies who work out of US, not only in Middle East but everywhere around the globe, don't have a good and secure and healthy and wealthy situation under the storm of heavy communications with a variety of roles and responsibilities which they must do them and they must complete this responsibilities and actions and roles successfully. While it's somehow impossible for America to gain the position and the technological speed what it reached after the second world war and our position and technological speed and specially our public face and our public figure what we gained after the cold war until the eleventh of the September of two thousand and one, but if I decide to describe lots of our failures, so **am I really respected to The Audacity of Hope, and The Change We Can Believe In?** After the problems what happened to me, I ask me my self, am I a useless piece in the glob for the United States or does they have any plan about me? If they don't increase their supports and if they stay silent so does the future generations going to understand some of the realities what I didn't discussed a lot about them? Does the United States ignore who work for the government for lots of years and then drift them away or not? (I haven't received my salary yet! Working with CIA for free makes me to remember the US Dirty War and US investigations for WMDs out of our nation what will remain classified for a long while, the war what Jeremy Scahill talked about it in his book: "Dirty Wars: The world is a battlefield") Years later we going to find-out an answer about this question (does they going to help me or not?) Inside of the next chapters you will read about some kind of classified methods of torture **by exposure** now just imagine that the **British Broadcasting Corporation targeted me** (in Iran) when I was a teenager but **why** only a few weeks before of writing this book, **again**, and for the **second time** (in Turkey), BBC tortured me using this kind of classified methods of torture by exposure! look to the email of the US embassy again, when I was in Iran the Iranian intelligence service **asked** me to go there to answer their questions once, now while I **have** some kind of problems about my visa proposals so **receiving** this honorary medals before of starting to **write** this book and then publication of this book all around the globe if I **travel** back to Iran the country who set an **initial trial** on the US cooperators, **wont** causes that they kill me? There are some challenges what I am dealing with them, we must increase our gathered intelligence for the agency, I need to continue my educations and we need to change and improve and enhance our diplomacy!

## WHEN WOMEN SUCCEED, AMERICA SUC

CEEDED\_\_\_*Barack Obama*

Neda Aghasoltan (One of the Iranian women) who the Iranian government terror her. The attacker shouted a bullet to her chest.

# Chapter 1

This is what the LORD says to his anointed, to Cyrus, whose right hand I take hold of to subdue nations before him and to strip kings of their armor, to open doors before him so that gates will not be shut: I will go before you and will level the mountains; I will break down gates of bronze and cut through bars of iron. I will give you hidden treasures, riches stored in secret places, so that you may know that I am the LORD, the God of Israel, who summons you by name\_\_Isaiah 45 (Holy Bible)

It was many years ago when I was watching violations against humanity and against women, during that moment of time, I was only a teenager; behind the desk of my computer, using Internet, during skimming some websites, I saw a few (rare) video clips about stoning<sup>18</sup> women and I saw a few video clips about cutting parts of peoples' bodies, because of what the other people named "sin". I read some texts about how the government blinded their citizens (and takes the citizens eye's out of their skull) at the beginning of the Iranian Islamic revolution in the 1979<sup>19</sup> which made me very depressed and nervous. When I contacted the White House and the Central Intelligence Agency (about 12 years ago), even I could not imagine the day when the United States president going to accept me as his authorized decision maker for his self (only as a free political adviser for him) and I could not imagine, this teenage boy, who one day had family and his mother told him not to stay out of home at the late night, going to accepted by the public affairs of the Central Intelligence Agency as one of their agents (First marine lieutenant) and I could not imagine while I was receiving money from people I was writing to CIA that while protecting US security, even if I died, I would die for freedom, for helping mankind and supporting humanity. Through increasing your wisdom and keeping up yourself by hard work you can achieve a good job and make good money. If you believe you can, you probably can. If you would, you could! It was so important for Mr. Obama that here I would add a few words. Its so important for him that inside of this book I note you: The September 11 attacks are a great disaster in US history and for him also! It causes, such a conspiracy theory, remaining untold for a long time. The US government is made up of many governmental and non-governmental/private organizations. The yellow and the big picture of his ear in front cover of the book was suicide for him! Its so strange for him why some of the personnel of the pentagon

were not inside of their offices during the day of the disaster, when an air plane was flying to crash itself into one of the sides of the pentagon building also! There were many VIP members of the world trade center, those who died after the disaster! They had some kind of underground connections with US military! Some terrorists were talking with each other about the attack plan and it was suicide for him! We was responsible to maintain a satisfiable level of aerospace security above our lands before of the disaster happens! And finally what happened to you is another disaster of history! The planet is full of violations instead of peace, people must love to learn something new, they must like to fill the other mankind's emotions but when somebody dies or when he is under torture or when he is imprisoned, then for a few minutes they are sad about this human situation at most but they don't help him. The Middle East people was angry for waiting inside of the long rows of a dairy program subsidy such as the governmental milk subsidies, chicken white meat subsidies and meals subsidies, and in America, *the 99%* (It's also the slogan of the Occupy Wall Street movement "**We are the 99%**", OWS what began with these two slogans by Adbusters "Are you ready for a Tahrir moment?" and "What is our one demand?" refers to income inequality and wealth distribution in the U.S. between the wealthiest 1% and the rest of the population. The other slogans are "What is our one demand?" and "Are you ready for a Tahrir moment?" It was a protest movement that began on September 17, 2011, in Zuccotti Park, located in New York City's Wall Street financial district, receiving global attention and spawning the Occupy movement against social and economic inequality worldwide.) Those people who are the heart, the soul, and the backbone of our society, auctioning their own homes! During the presidential elections hundreds of millions of dollars are being spent in pursuit of being anointed the "winning" candidate. In the end, there will be no "winner" for the American people!

Iranian Islamic Revolution in 1979 (Imam Khomeini on the right side)

**Demonstrations in Tehran to support the Islamic Revolution - 1979**

Some people who didn't work as a political leader nor as a military agent of army, who have not confronted with the complaints which we are threatened by them, after watching some documentaries and movies, think of all the secret agents or of all who work for the government have tough and radical emotions or they are doing very radical activities, but here I must note that there is difference between these agents. If I tell you (because of the difference between the amount of violated activities what some radical agents doing all around the globe, inside or outside of our country), for example sometimes when US president is in the White House with his family, the big-brother looks at them inside of their house and listen to them, while for sure people don't like somebody do a same thing with their own family but some people going to look at this fact and think about this fact as a fancy and as an interesting subject and even if we ask them it is bad, isn't it? Some of them going to answer: "sometimes, these kinds of activities are necessary". Even the highest ranked agents of our agencies would get tortured while they want to protect freedom!

Likewise what I wrote in my twitter once: "I'm so clever, US president gave me the authority to decide about the Americans policy but I am in home and study, usually. I was a medic<sup>20</sup> (Serial Number: 87040112809-2), who got tortured before. I live normally; I don't have lots of money. During bad situations while the weather was so cold I slept on the streets and used normal plastics to make a shelter for myself. I know lots of top secrets but my mouth is shut. I was under radiation (While one day I wrote to the government of the United States that after these 12 years of my cooperation with you, even if I worked in a supermarket then they would pay me money instead). I can use locked airport's touch screen computers instead of my personal laptop, to gain free access to the Internet, during the emergency situations. Computers like me! I talked with people who crowd can't even believe!"

Likewise what you've read inside of the preface of this book, they tortured me. I got tortured using EMP (electrical shock) and also through sending radiation to my chest and my neck and my backbone and my brain but during that moments of times even one person didn't heard my name in the news nor asked the governments to help me; I didn't know how to use some kind of tricks of some websites like facebook.com and twitter.com and the other kinds of mass-media for broadcasting to public. It's so easy for people nowadays to send a request to one of the popular Facebook groups for joining it and then they post lots of information there, some of the groups what people join have only a few hundred members but there are millions of people those who are reading the posts of some of the other groups, they make a Username inside of a web forum and then they share their opinions with lots of the other members, they search inside of the Google website about the On-line petition sites and then they make it and then they share this petition with lots of their Facebook or Twitter friends to gain the political support! The brain of the layman can only apply a limited amount of their knowledge in their everyday life, for example people make a petition but they don't understand that they can share it then inside of a forum or a Facebook group what millions of peoples read its contents to gain more supporters! Through using some kind of websites like care2.com they gain lots of signatures for their own petitions and using some kind of the other websites like causes.com except of making a petition they can support the other members politically also!

Today when I am writing this book lots of famous and genius people like agents of Pentagon<sup>21</sup> and members of US army<sup>22</sup>, Israeli news and military<sup>23</sup>, and lots of magazines and journalists and Medias<sup>24</sup> from many countries around the globe, etc., are following my twitter account<sup>25</sup> and reading what I write there.

In Iran I had not access to wireless (Wi-Fi) Internet; I got connected to Internet using a dial-up modem! I had a short sleep behind the desk of my computer, usually, until downloading a small program gets done!

DARPA (Defense Advanced Research Project Agency of the United States) is the main developer of its networks (Internet) idea, many years ago. Most of the times for me, what passed in Iran, Heydar Moslehi was the prime minister of MISIRI (Iranian Intelligence Service) when because of the amounts of the mental tortures (because of contacting CIA and The White House) for a few years, I became sick mentally; later I wrote to the White House: "if you don't put me out of Iran, probably during the next few days I going to a psychological hospital to receive medical cares." President impressed then I think it was one of the scientists in DARPA who when I sent the email to the White House, contacted me and told:

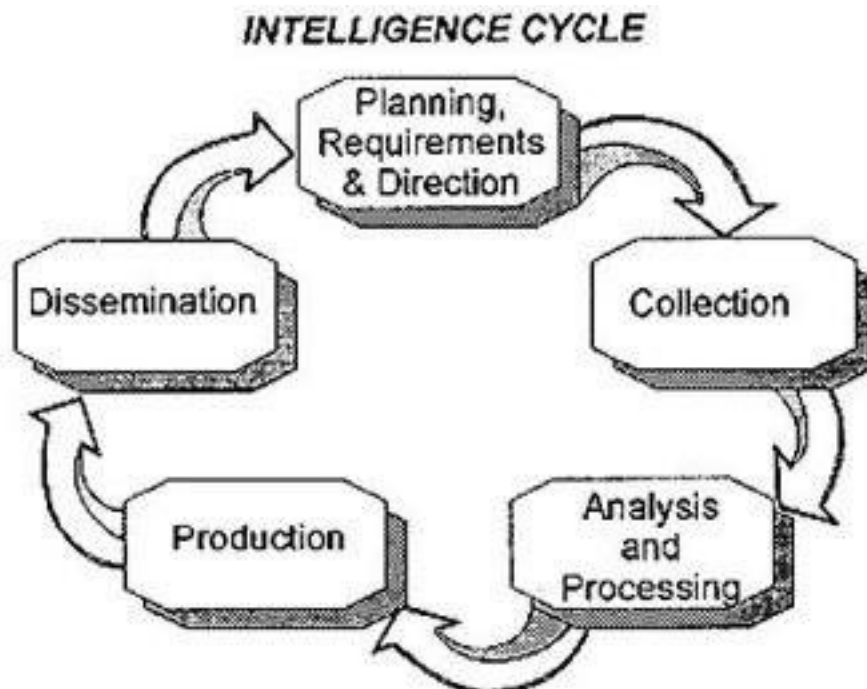

"Don't go to House pi tall!"

But now I am a real political activist and work for The White House and The Central Intelligence Agency.

The most important things which are threatening US intelligence gathering power are derangement of the ideologies and also the agents with biased opinions; some American agents are doing covert-operations to cover their cooperators activities more than what it is necessary (even some times army officials are aware of what is happening around but a little they like to bother the other ones); the other agents are not aware of what they are doing; doing violated activities causes a shame on our country. While Israeli intelligence agencies are up to date and act for the current situation and also while England intelligence agency don't do radical activities and when they act on intelligence and when they analysis information they open their eyes wide (there is no difference about the country which they are dealing with, also there is no difference about the peoples who they are cooperating with; no difference about the religion of the other people of the area, whom the agent is cooperating with them nor any difference about the culture of the people of that area); some American agents are doing some kind of covert-operations to cover their cooperators activities a lot which cause that out of US the others don't kill them but then the other American agents attack the US cooperators and it continues in a loop cycle.

#### **Intelligence cycle:**

The traditional Intelligence cycle is the fundamental cycle of intelligence processing in a civilian or military intelligence agency or in law enforcement as a closed path consisting of repeating nodes. The stages of the intelligence cycle include the issuance of requirements by decision makers, collection, processing, analysis, and publication of intelligence. The circuit is completed when decision makers provide feedback and revised requirements. The intelligence cycle is also called the Intelligence Process by the U.S. Department of Defense (DoD) and the uniformed services.

#### **Intelligence cycle (target-centric approach):**

The target-centric approach to intelligence describes a method of intelligence analysis<sup>26</sup> to offer an alternative methodology to the traditional intelligence cycle. Its goal is to redefine the intelligence process in such a way that all of the parts of the intelligence cycle come together as a network. It is a collaborative process where collectors, analysts and customers are integral, and information does not always flow linearly.

Figure 1-2 Target-Centric View of the Intelligence Process

The United States National Security Agency (NSA) analysis the information basically; they are not up to date and when they decide about the actions they don't care about the current situation but think about what happened before and tough actions are like a habit there (also sometimes they even like to take a revenge) but there is no difference about what is the problem however in comparison with the other intelligence agencies in America or out of America, relatively they can provide a good security and privacy about the information which the agents are transferring or what they already transferred to them. While it's not such a very important threat for NSA to be so update and to be dynamic, because of US internal complaints are their usual complaints but Defense Intelligence Agency (DIA) is more dynamic (while cold and unemotional, also) about decision making (in comparison with some other agencies) but NSA respect to privacy and Independence more than DIA.

When I was a teenager student in Iran, I saw an interesting term in a book which they had written for public school students to read, that: "there are a few types of people who exist on the planet. Your lifetime is like a football game and people are inside of the stadium. Some people prefer not to play the game; they don't like the pleasure of playing the game. Some others play: Some of them loose, the others win!" I remember when I was so young inside of the high school I didn't received any good rank in math what even caused that I stop studying pure science and I continued my education about computer graphical design.

I was trying to learn more about the computer software's and computer programing languages but inside of our country the learning methods were so easy and basic and it was not such an advanced learning method available for me to buy it and then use it to increase my knowledge about computer programs. I decided to do something, I taught that inside of the great Windows operating system many hardware drivers are identifiable and the operating system install them automatically using a plug&play method and also I could install and use lots of software there. I bought a package of the Visual Studio programing languages but I had some kind of problems to learn it so advanced. Using Linux I could have access to more program templates, I could open the programs inside of its internal programing languages software and read them line by line. I could learn more about that how an OS (an Operating System) works. I was opening the Linux kernel using C and C++ programing languages and I was searching inside it, I was doing a same thing about the internal applications of Linux also, I liked to make a same program in Windows me myself. Windows is a classic and it is a great operating system with a prefect graphical system.

Likewise what you read, I stopped studying pure science and I continued my education about computer graphical design but my communications with the US president and the Central Intelligence Agency and Human Rights Watch increased my self-confidence as much as I started to study about mathematical science again. Every day I was thinking and telling myself, now I can do whatever I want and I can reach my goals. It's unimaginable after a few months I completed reading all of the standard books what were necessary for the math students, what they were teaching them inside of high schools to the students to completely read and finish to be able to go to university. I could receive the required rank in pure science and I went to university but I was not getting good scores in math usually. Do you know the major of pure science what I was studying in university? Because of the regime falsified my educational examination to decrease my ranks and scores, it was mathematics! If they didn't falsified the exam then I could study aerospace!

Inside of the university, I asked an easy question about probability from our professor, during the first year, what he couldn't solve but because of respecting to him I won't mention the name of him nor my question! There was another subject what made my brain busy for a few days that international designers used 0 and 1 to show bits inside of their graphical designs, I was laughing to it because of everybody think computers know zeroes and ones only but later when the designers of the graphical arts (like what a social engineer does for people) change the themes and patterns then people will find out that current computers (in 21th century) can understand off(s) and on(s) from another aspect of view when we made them they used

vacuum tubes for digital computation including binary math and Boolean logic, they had no CPU. Then they relied on a series of switches for inputting data and output data by turning on and off a series of lights. From another aspect of view they can receive data through reading the differentiations between the holes what they have created on a surface (see the punch card picture below) so they only know physical holes or magnetic waves but when somebody want to show people that he knows a lot then he says the smallest parts of a data, bits, created from 1(s) and 0(s)! I was thinking about some of the problems in mathematical logic, also! **I was so happy about that I can study mathematics now inside of the university while I was not getting good scores in math but my political problems caused that I don't go to the university no more! But no problem, when I stay calm US will think about some supports, they told me I am a lieutenant now! Regarding to receiving these honors, there is a question about that while I have some problems about my US citizenship, when I decided to write my book, won't cause that the Iranian regime bother me, even the public people can give a satisfiable answer to me!**

One of the old IBM Punch Cards

ENIAC - The First and the world's oldest computer

## Chapter 2

**Did you know black words on white papers are each others complement. Did you know many scientists believe, first races of mankind came from Africa. (President Barack Obama)**

When the American people selected the US President, Mr. Barack Obama, to go to the house (White House), BBC (the British Broadcasting Corporation) started to attack his personality and his supporters behind the scene. BBC tortured some of the supporters of the president; I was a young boy during the volant time of this accidents. (I remember when I was a young boy while I hadn't lots of knowledge, I wrote to BBC Persian: "likewise what I heard from Iranian people, when years ago you broadcast to people about that astronauts have seen Imam Khomeinies face on the moon so you supported Iranian regime's revolution to reach the victory<sup>27</sup>.)<sup>28</sup> Many years later likewise what you going to read in the Chapter 3, I did some activities while I was communicating with BBC and while I was communicating with the others also, but it was such an agitated activities what I didn't like nor it was beneficial for me and also made my situation worsen. It's interesting, I loved some of the BBC documentaries like "The Spy Who Came In From The Cold" and "Tinker Tailor Soldier Spy"<sup>29</sup> the movie. I have some friends there. One of their documentaries what I love is The Planet The Earth!

Barack Hussein Obama II, date of birth: August 4, 1961. He is the 44th President of the United States, and the first African American to hold the office. His story is the American story — values from the heartland, a middle-class upbringing in a strong family, hard work and education as the means of getting ahead, and the conviction that a life so blessed should be lived in service to others.

With a father from Kenya and a mother from Kansas, President Obama was born in Honolulu, Hawaii. Obama is a graduate of Columbia University and Harvard Law School, where he served as president of the Harvard Law Review. He was a community organizer in Chicago before earning his law degree. He was raised with help from his grandfather, who served in Patton's army, and his grandmother, who worked her way up from the secretarial pool to middle management at a bank.

After working his way through college with the help of scholarships and student loans, President Obama moved to Chicago, where he worked with a group of churches to help rebuild communities devastated by the closure of local steel plants.

He went on to attend law school, where he became the first African-American president of the Harvard Law Review. He worked as a civil rights attorney and taught constitutional law at the University of Chicago Law School from 1992 to 2004. He served three terms representing the 13th District in the Illinois Senate from 1997 to 2004, running unsuccessfully for the United States House of Representatives in 2000.

President Obama's years of public service are based around his unwavering belief in the ability to unite people around a politics of purpose. In the Illinois State Senate, he passed the first major ethics reform in 25 years,

cut taxes for working families, and expanded health care for children and their parents. As a United States Senator, he reached across the aisle to pass groundbreaking lobbying reform, lock up the world's most dangerous weapons, and bring transparency to government by putting federal spending online. He was elected the 44th President of the United States on November 4, 2008, and sworn in on January 20, 2009. He and his wife, Michelle, are the proud parents of two daughters, Malia and Sasha. In 2004, Obama received national attention during his campaign to represent Illinois in the United States Senate with his victory in the March Democratic Party primary, his keynote address at the Democratic National Convention in July, and his election to the Senate in November. He began his presidential campaign in 2007 and, after a close primary campaign against Hillary Rodham Clinton in 2008, he won sufficient delegates in the Democratic Party primaries to receive the presidential nomination. He then defeated Republican nominee John McCain in the general election, and was inaugurated as president on January 20, 2009. Nine months after his election, Obama was named the 2009 Nobel Peace Prize laureate. The next day, some news channels, the Islamic ones at most, such as IRIB (The Islamic Republic of Iran Broadcasting Agency and its related branches) made a propaganda on media against him related to a few groups of people (some protesters) who was against the decision what the Nobel made. During his first two years in office, Obama signed into law economic stimulus legislation in response to the Great Recession in the form of the American Recovery and Reinvestment Act of 2009 and the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010. Other major domestic initiatives in his first term included the Patient Protection and Affordable Care Act, often referred to as "Obamacare"; the Dodd–Frank Wall Street Reform and Consumer Protection Act; and the Don't Ask, Don't Tell Repeal Act of 2010. In foreign policy, Obama ended U.S. military involvement in the Iraq War, increased U.S. troop levels in Afghanistan, signed the New START arms control treaty with Russia, ordered U.S. military involvement in Libya, and ordered the military operation that resulted in the death of Osama bin Laden. In November 2010, the Republicans regained control of the House of Representatives as the Democratic Party lost a total of 63 seats; and, after a lengthy debate over federal spending and whether or not to raise the nation's debt limit, Obama signed the Budget Control Act of 2011 and the American Taxpayer Relief Act of 2012 what will have long term benefits also. Obama was re-elected president in November 2012, defeating Republican nominee Mitt Romney, and was sworn in for a second term on January 20, 2013. During his second term, Obama has promoted domestic policies related to gun control in response to the Sandy Hook Elementary School shooting, and has called for full equality for LGBT Americans, while his administration has filed briefs which urged the Supreme Court to strike down the Defense of Marriage Act of 1996 and California's Proposition 8 as unconstitutional. In foreign policy, Obama has continued the process of ending U.S. combat operations in Afghanistan. What you read in the current paragraph is only a brief description about him what you can find elsewhere also. In chapter 3 you will learn more about what we did. You will read more about our communication.

US secret activities about Russian are not completely describable, and these activities are complicated<sup>30</sup>.

The contact form of the Central Intelligence Agency what I used to contact them

I remember, it didn't take a long time after my first communication with the Central Intelligence Agency

when Russians found me in Iran; they extracted my brain pattern, my logic and reasoning and decision making system for a while. It's very **interesting** for me that Russians **from** the beginning of **my** cooperation with US intelligence was kidding me and **joking and told: "let we find-out what they want to do with you and what happened to you with your fucked-up brain"** During that moment of time **I was** only a teenager who because of a variety of hard lessons which I needed to study and because of using some kind of supplements and drugs which I needed to take to enhance my cognitive system and my memory and because of the actions of some leaders (whom acted behind the scene, when they found-out about I am communicating with America. Leaders included **Iranian** and Chinese), I got sick mentally by hallucinati<sup>31</sup>ons. Iranian Ministry of Intelligence likewise what I wrote before in this book caused mental problems for me (but also Iranian agents shared some secret facts to me - see the Chapter 4, where I wrote "Likewise what I wrote before, Iranian intelligence charged me"); I don't know a lot about Chinese yet, so **I wont describe** a lot about what **they** did. **I remember** after **I wrote** my first message through the Internet, **to the** Central Intelligence Agency, I received an answer from a personal email which somebody was created (using yahoo service provider) nick-name of the sender was Kevin (but I don't remember what was the email address, exactly). He asked me that "describe me, what is your complete name, and for what kind of organization you are working for?" etc. I became suspected about, why he didn't write me through an official email address (why the sender domain name is not something like this (format) xxx@cia.gov), then I asked him about the reason! He knew Persian language. I wrote him: "If you really work for CIA so why your email address is different." He didn't answered (I taught contacting or working for CIA or any other American agencies will deliver a satisfiable level of security for you and they will ensure your safety). I phoned the Public Affairs then I asked them about the reason but the problem didn't solve.(maybe it affected my life a few percent<sup>32</sup> as one of the causes which increased my hallucinations and made me nervous and made me suspected to my environmental situations also. Because of the messages what they transfered to me was not clear and I needed to increase my attentions to my current environmental situations before, to find-out what they meant) Iranian Ministry of Intelligence started to brain-wash me, to change my ideologies like them selves, it was so dangerous for them when one day I become an important person and I act against them. However their activities increased my wisdom after many years. While even some of their leaders in Iran falsified my pre-university educational examination "Konkoo". In Iran every students could join the "Konkoo" only one time per year, during the summer.

When I was in Tehran, many times the Iranian Basij forces or agents of the Iranian Intelligence Service<sup>33</sup> told me, they want to explode my car. Only they liked to make me fear a lot but not to explode it really. when I was in a train (metro) in Tehran, because of they was seriously after me, so I crashed the glass of the windows of the metro, I don't know who was the driver of the metro could see the parts of the glasses which was dropping down on the sides of the railroad or not, but he increased the speed of the train. I braked the glass using a fire extinguisher capsule (while I was a weak and a young boy), the speed of the train was something between 70 km p/h to 100 km p/h. I dropped my self (jumped) out of the train, I got confused, it was not so painful, I didn't scream at all, I released my body so relax near the rail way easily and I let it roll on the surface of the ground then after a few seconds I looked to my foots and my hands so calm then I stood up slowly! A little the skin of my hands teared but only I lost a few drops of my blood! Suddenly they stopped following me, they feared so they left me alone for a while. When I was breathing then I felt the smells of my blood in my lungs but I hadn't pain nor I braked my bones! Inside of the nature, there was some kind of buildings and some people was working there. I don't know maybe there was electricity facilities and some people was working. I went forward, there was a fence which the workers made there, using iron networks. There was some wires there to split this place (nature) from the nearby freeway on side. I decided to cut the wires using my knife at first but it was impossible for me, then I decided to off the fence but I couldn't. I returned to the train station, I went to a restaurant nearby. I washed my hands and cleared the blood from my skin and I ordered a barbecue (Kebab) for my self.

Iranian Kebab

Iranian Kebab

The food was so delicious. I went out of the restaurant. It was not the first time when I checked my shoes to find-out that is anything inside of them, Iranian Agents told me that we put a device and some kind of chips there to track your location; I was not an agent, I didn't know there is nothing there but they could track my location when my cell-phone is on or when I was using an ATM to receive money from the banks by my personal credit card, while I personally tasted that they (the government) could do it in Iran many years ago, about 2004 and many years before of this. One of the injuries of my hand is related to when I jumped out of the metro and then it became completely alright like before after a few days (as much as the injury was small) and the second time is related to when I was about 17 years old and I was living with my family in Iran when I did fireworks and I injured my finger when I have not traveled to Turkey even, what is related to when I was searching about the ways of receiving the American citizenship when I got hospitalized and its documents got submitted inside of Iranian hospitals! I remember these problems happened to me only a few years before of when I join the Red Cross and the Red Crescent Society as a medic there!

I remember that I was casually reading some books like "Iran: Time for a New Approach"<sup>34</sup>. I searched through the Internet and inside of some encyclopedias, to search about Obama's personality. It was so interesting for me, the name of the US president is Barack Hussein. Hussein was a figure in the history of Islam. Two major ideologies and branches of Islam are Shia and Sunni. Sunni Muslims attacked one of the Shia Imams (Hussein) and killed him. They also killed many members of his families. They was living in middle east and they was not black nor living in Africa, later (likewise what you can see in many books about the history of Islam) their ideologies spread in Africa also (nowadays I was talking with president Obama and he note "did you know many Americans immigrated to America from Africa. In fact many scientists believe one of the first race of mankind spread around the globe from Africa.") Muslims prophet was Muhammad and he was living somewhere in middle east. While Currant (one of the figures in the history of mathematics) in his book ("What is mathematics?") named these Islamists the Hindu people, but Muhammad he his self birth place was not India<sup>35</sup>. He born in a desert which people call Iraq. In Rushdie's book<sup>36</sup> you see, prostitutes of Mecca named Muhammad's wifes names on them selves to increase their guests. Another subjects which you can see in his book, Muhammad said Gabriel (Jibrail, Jibril) delivered the words of the god to him but one day Satan do it, but he imagines it is Gabriel again, then Muhammad approved the verses to get submitted in Quran but later Muhammad denies the verses and he receives some new verses about that it was the devil who gave the verses to Muhammad, but Sir. Salman Rushdie asks in his book, if the devil told these words to Muhammad so, how are you sure about who told all of the other verses of the Quran to Muhammad was not the devil instead of Gabriel!

Like what you read in the first paragraphs of this chapter, while I was in touch with BBC (still) and also agents of the Iranian regime was after me, writing casual messages to CIA and the White House, and standing against Iranian nuclear program caused that (supporters of)<sup>37</sup> BBC and Iranian Regime Intelligence Service (while some other civil private organizations in Iran was aware of what is happening to me) attacked me, they caused mental problems for me, BBC repeated that "boro panah begir" (while I was getting mental torture by their voice when they was repeating it in my brain through classified secret methods of communication - Regarded to the laws of the International Amnesty torturing by voice is one of the methods of torture what some governments do with some prisoners) if we normally translate what they said, it means "go and take cover" but if we look carefully at this term they wanted to say "bow<sup>38</sup>! ro<sup>39</sup> pan<sup>40</sup> ah<sup>41</sup> beg IR<sup>42</sup>" they tried to say, we boo (bow) you, dictator supporters of Obama and who don't believe in our channels programs, my nationality (Persian office of BBC) is Iranian.

Even if you watch some of the investigative documentaries which some of the famous directors made against our government in America (which is even against the routine and normal news what they broadcast for public), you will find out Iranian regime is going to increase the amount of their enriched Uranium but these documentaries are against a war what they told it could happen in Iran. I remember that I was not a Christian yet. I was a teenager Muslim but I was not a devoted one, but because of my love to US president when I was drinking cold water, to showed to whom liked to bother me (and torture me using secret weapons) because of contacting president Obama, I'm proud of US presidents, I said: "Ya Hussein" a few times I said: "Ya Barack Hussein". The philosophy of this culture (the Islamist-shia culture) is related to about a thousand years ago, when (likewise what you can see in some books, majoring historical science) Armies of Yazid son of the Moavie (they was Sunni leaders) cut the head of Hussein while when he asked them to give him water the Army didn't. There is a law what exists in Islam about when you change your religion to any other religions, when you was a Muslim before, so the Islamist leader must kill you. I remember when I was about fifteen years old, I was watching some video clips about when (even nowadays) a Muslim cut the head of the other one (in Iraq) then because of the pressure of his tongue behind of his teeth, the pressure opens his jaw and his tongue rolling out (they was such a fearful clips for me when I saw them), about nine years later, I became

a Christian and it was one year later (about ten years after that I was watching these violated clips about Islamists) when Barack Hussein Obama gave me the authority of decision making and CIA gave me an E-5 unofficial medal of honor.

I was a teenager and I was watching that in Iran it was necessary for women to wear scarf and men liked to follow them and joke with them and it was a habit for these men that if any other man talk with this woman or if he talk with any other women nearby then they attack him, usually! When I was juggling late nights there (for example in Esfahan, Apadana Street) I saw prostitutes was inside of the cars of some men sometimes then the man continued driving the car while she liked to get out and she was screaming because of she didn't like to stay with him. Their people usually love some funny activities like fire play and they love to visit their families such as the father, the mother and the grandmother usually! There are a variety of different people there, many people there, have not been in America but like the American culture (some of these peoples don't like) they watch different type of the perfect movies what the Hollywood produces for people, because of they like science and technology so they like the American cities designs and architectures and it's skyscrapers; they have lots of universities and the students can study a variety of science there but these universities are not completely perfect like the European nor like the American universities.

Siosepol Bridge Esfahan-Iran

I was searching in the website of the international-police (Interpol). I was reading some articles about the required trainings what was necessary to become a member of the Interpol. I remember, one of the required trainings was about 12 Kilometers of juggling with about 30 minutes of soft and easy exercises, every 3 Kilometers. One day I decided to do it, I woke up soon in the morning. I wore my clothes then I came to the street, from the eastern part of my city (Ghadir Gharden, 22 Bahman street, Shariati alley) to the center of this city (Enghelab square) then to the south (Azadi sq./Darwaze-shiraz sq.) and then I returned to the center (where there is a river there near the Enghelab square, it name is Zayande-rood river and there was a bridge on the river, it name was Siosepol bridge. Sometimes some people had written their names on it walls or paint a logo or a word on it walls but it was better that they had not done it so when it walls was shinning in the night it would have a better lighting effect when the tourisms looked to the walls from inside of the bridge, when they viewed it not from a far distance) and then I went to the north, there was the house of my grandmother<sup>43</sup>, who died some years ago. She didn't go to school. I remember when she was dieing because of **hemorrhage (Brain Bleeding): hemorrhage means loosing lots of blood of the body which causes loosing concentration and attention of the person and then it causes death.** I was taking care of my ground mother in a hospital there, what was not a modernized hospital. Once when because of the windy weather while the windows was open then the door shut hard and for a few seconds my ears was buzzing. My grandmother was unconscious there. We name this situation "**Coma**" - **mentally unconsciousness of the brain. There are two types of coma: one of the types is light coma, the other type is deep coma.** likewise what you see here, I writing these descriptions so calm. I remember when our teacher was teaching me how to be a medic, they told me: "no one must become nervous when they are medicating the patients." Likewise what you see, I describe you the idioms which doctors use, while I am so calm, while I liked my grandmother so much; it's a basic for every important figures, agents and medics, not to let their brain, because of the pain or because of their environmental situation of the moment, act against the logic.

One of the strange things what people don't know, in many countries, is CPR (Cardiac & Pulmonary Rehabilitation), while learning it causes your ability of saving the life of your family. It's

so easy! But if while the heart of the patient is beating healthy, you try to do it, you going to hurt the parts of his body or probably you going to kill him! Also when somebody's heart don't breathing, it don't mean that his heart (for sure) stopped, but if his heart stops suddenly his breathing stops. You must put the tips of your fingers on the vein of his neck or you must put the tips of your fingers on the wrist of his hands then check, is it beating? (you must try it about healthy individuals to insure your self about when some bodies heart is beating so you fill the pulse on his skin and you are never wrong. If it's not beating, then you must put the patient on a hard surface, you make your lungs full of fresh air what is full of the oxygen and then you open his mouth and then blow it inside of his lungs, at the moment you do it again and again, two more times! Then you put your both hands while you tied your fingers to each other on the middle of his chest, while you haven't bent your arms (I usually sit on the right side so I can set and maintain a better pressure on the patient's heart on the left side), you stiff your hands while one is on the other one (the tip of your fingers don't touch his chest during the massage and you set the pressure on the heart using the pressure which the muscles of your backbone maintain for you), you press the chest (beat it repeatedly (in fact press the chest slowly), push it up and down, as much as you can) for 1 minute, the patient's chest bends down a few inches then you do it again, you do it at least about sixty times (it's not necessary you set the timer nor waste your time, you can count to seventy during the massage but don't forget you must press it as much as it is possible for you to do it correctly, the more the better), then you check his heart pulse, is it beating? If not, to complete the final step, until it starts to beat again, you blow the fresh air to his lungs two times and then set the pressure on his heart for 30 seconds (you can count to forty) without checking his heart pulse you blow the fresh air to his lungs two more times and maintain pressure on his heart for 30 seconds again, then you check his heart pulse, is it beating? If not, then you repeat the final step which I described.

While I can't describe a lot about HIV (Aids) widespread around the globe and while the recent drugs are not available for people and even when I wrote to IFRC and also I had an interview with VOA PNN News (Voice of America News) about HIV widespread

Me (Right), ms. Mahshid Nadiri (Left) - VOA News (Voice of America)

then I worsened my problems and I caused a bad situation for my self, but also I must recommend you that not only during the sex people must care about their hygiene and use Condom, but also there are some kind of anti virus drugs which doctors are not usually aware of that yet (specially in developing countries) or at least they do not prescribe them usually, the name of these kind of drugs is anti retro-viral. If you get infected by HIV so if you receive these kind of medicines, before of the first 48 hour of infection, probably you going to heal your body from HIV and hopefully you going to be fine completely, soon. About hepatitis you can do it also. Post-exposure prophylaxis (PEP) is the use of ARVs (anti retro-virals) as soon as possible after exposure to HIV, to prevent HIV infection. PEP can reduce the rate of infection in health care workers exposed to HIV by 79%. The US Public Health Service recommends using a combination of three approved ARVs for four weeks. People can be exposed to HIV during unsafe sexual activity, when a condom breaks during sex, or if they share needles for injecting drugs. Infants can be exposed if they drink breast milk from an infected woman. In a study of PEP in 400 cases of possible sexual exposure to HIV, not one person became infected with HIV. In order for post-exposure prophylaxis to have a chance of working, the medication needs to be taken as soon

as possible, and within 72 hours of exposure to HIV. Left any longer and it is thought that the effectiveness of the treatment is severely diminished. But it is very important that a person using PEP takes the treatment exactly as prescribed by their doctor or health worker. The side effects of the medication are a reason why some people find it difficult to adhere to the full 28-day course of treatment properly. So I personally recommend you that if you can visit your doctor during the first hours of the suspicious contact then you ask him to prescribe you the drugs else you yourself should do it. Warning, all of the dosages what I mentioned are for adult people only. Zidovudine (Oral: 300 mg orally every 12 hours or 200 mg orally every 8 hours) is the drug that is primarily prescribed after an occupational exposure to HIV and it is the only drug that has been tested in trials on health care workers. Nowadays most treatment starter packs contain a combination of zidovudine, lamivudine (150 mg twice a day) and nelfinavir (750 mg three times a day—in the third world countries they also prescribe lopinavir or ritonavir instead of nelfinavir), as it is generally thought that combination drug therapy is more effective than zidovudine alone. The results of one occupational exposure study showed that taking a course of zidovudine after exposure reduced the risk of HIV infection by approximately 81 percent. As of 2013, the prevention regimen recommended in the United States consists of three medications—**tenofovir, emtricitabine and raltegravir** (in the 3rd world countries raltegravir is not prescribed usually)—as this may **reduce the risk** further. **Take this three kind of drugs at a same time this is a method for *therapeutic* or prophylactic treatment of HIV (tenofovir 300 mg per day, emtricitabine 200 to 400 mg per day, Raltegravir 800 mg Once Daily). Visit your doctor as soon as possible. Your doctor must adjust the dosage for you to decrease the side effects of the drugs! Long-term use of anti retro-virals (at any dosages and speccially at this high and effective dosages what I mentioned here) can weaken (causes depression for) the body's immune system and it would damage your liver also!**

Likewise what I wrote in this chapter, I went to the house of my grandmother after acting on the scheme what I had read before in the website of Interpol, not only it didn't makes me tried but also it was an interesting and freshening and enjoy-full exercise for me. Wearing fine clothes and good shoes is very important for you during exercise. Consuming dietary supplements is very important for your health, eating a satisfiable amount of foods containing a balanced mixture of carbohydrates and proteins (a few boiled glair eggs and a glass of low-fat milk what you drink for breakfast, contains proteins and calcium, what is required for your (daily) diet) and antioxidants and vitamins and BCAAs (Branched-chain amino acids) are necessary for your body during these kind of exercises.

# Chapter 3

I always recommend to everybody to listen to every kind of opinions, it will increase your wisdom; so, will help you achieve your goals, then it'll increase your chance of reaching the ideal victory\_\_Lt. Peiman Ghasemi

I remember, it was a few month before of the November 2011 attack<sup>44</sup> on the British Embassy in Tehran<sup>45</sup>, I called them and asked the related personals to guide me about how to receive the citizenship of the Great Britain. One of my families<sup>46</sup> lives there! The complaints are classified information. However the Iranian regime had some complaints with some lands and a garden which British government bought in Iran for them selves but the regime decided to take it back from them and they decided to keep it for them selves (while Britain paid the money for buying this garden. While I was under torture in Iran, **don't forget to read the very important and beautiful descriptions in pages 64, 65 and 66 about my situation near the US presidential election date**; like many other countries, Britain found out about my problems but at first I loved they help me while they could but they didn't, while later they (Britain) helped me a lot). Because of the Iranian regime decided to cause that Iranian people not only stop transmitting the classified information, but also stop transmitting their daily problems about their regime to the British embassy. It was in the year of 2011 that supporters of the right political wing (Conservatives) of Iran, decided to strengthen their possessions. Because of the British Broad Casting Corporation Persian Channel supported and still supporting the left political wing in Iran more than the others there, I don't mean BBC don't have any cooperation or communication with Iranian intelligence service currently and I don't mean BBC is not supporting Iranian leader (Ali Khamenei) at all, anyway they support him also, but they support him fewer than the left side (the left political wing) and it's not completely against our current benefits nor against America nor against England if I try to look at this problem while the way what I am looking to our information are not biased. Likewise what you read, the regime became angry with the Great Britain, I am forced to keep the secrecy but it's necessary that I note you, some of the Iranian people was not safe, not only because of the regime but also because of the decisions of some other countries. Iranian members of the "Basije Danshjuiee" (Basij: The Iranian students who can work for militia through filling a form they submit their name as one of the cooperators of the Islamic military. (The founder of this organization is Imam Khomeini - The first leader of the Iranian Islamic Revolution) - Basije Daneshjuiee means: the university students who are working for Basij) with approval of the Iranian Leader and Iranian intelligence service and the conservatives, made a plane to reach them selves to the embassy and then attack them. British intelligence service found-out that standing against them is not beneficial for the United Kingdom while during these critical moments of times not only the embassy personals was working there but also they liked to (emotionally) cooperate with Iranian people. When Basij was walking forward to reach the embassy the United Kingdom ordered to the remained personals to get out of there. They made the embassy empty, before of that people reach them selves to the embassy. Only a few cars remained there.

**The attack on the British Embassy - Tehran**

Diplomatic police asked the people (military-Basij) not to go inside of the embassy but they rushed inside into the building. Iranian government lost their diplomacy with western countries (Basij had attacked then reached so shouted down the American embassy at the beginning of the Islamic revolution, also.), there was no difference about the political possessions of the Iranian people. There was no difference about are they against the regime or not! There was no difference about are they supporting the west or not! They lost their political support what (a little or moderately) they had through the western countries.

I remember, it was one day before of when one of the Iranian scientists died during a terror plan. Who was working for Iranian regime's nuclear agencies. He was one of the students (majoring physics) in Iran. He was studying in Sharif University. Few days before of the assassination, I was searching about some top-secrets using Internet; last night, during a communication with America while me and CIA was talking with each other then an unidentified agency joined the communication and between of our speeches told: I want to kill somebody what do you think so. I answered: I usually don't like terror. he was kidding and answered: what if I kill you! I answered: "I don't know! Kill whoever you want!"

Tomorrow, likewise what I remember, accidentally only about some minutes before/after the explosion of his car, I sent an SMS to my step-brother<sup>47</sup>. I wrote for him: I am sorry about that I had cooperation with some of the foreign agencies. I'm tired now. I think it's better for me that I make a new and a normal life for my self.

I came back to our home after a few hours. I started to eat the lunch. Our television was on and it was broadcasting the news, suddenly the anchor said "One of the Iranian students of nuclear science died. His car's exploded near the Sharif University in Tehran. Who caused these explosions used some kind of electromagnetic bombs. The name of this martyr is Mostafa Ahmadi-Roshan<sup>48</sup>" a few hours passed, sum unidentified powerful countries harassed me and started to attack me (I can't name them, but I can guess they was including R\_\_\_\_, etc.), at the moment CIA contacted me through a satellite communication also and told

me some thing like “OK nasty idiot, no problem, no problem”

I remember many years later, when I had a bad situation, a few month ago, Mercedes Benz was talking to me, once during a night briefly he told me “For who?! Killed who?!” “And I taught!”, he meant they sold their agent who at first started to cooperate with America, Benz company told it when the Iranian regime had arrested a person in Iran, who sentenced to aiding Israel and spying for this country; while one of the British spies was dieing under torture also. He also meant that Iranian government don’t respect to their citizens rights, and who starting to act for someone then they don’t respect to the values of his soul and sell him later.

Likewise what I wrote before, CIA Public Affairs reached them selves to me. About the opposition forces, I don’t know who they was, but some unidentified persons was showing me a drawing (a pentagon, the borderlines was red and it was like fire and inside of the pentagon was a big white mouse, moving toward outside) they was shouting loud near my ears. I didn’t heard what CIA told me because of they was speaking quietly. I don’t know why am I felt CIA can’t help me and I must ask the Iranian Intelligence (I was in Iran and Iranian intelligence sentenced me to aiding their enemy (America), before.) to help me. I was coughing when I phoned them, I insulted on all of whom they had complaints with them.

America decided to bother me (to protect our security I can’t describe more but it was something worsen than bothering), however I got sold to our enemies, I was forced to vomit a few times as one of the torturing methods, I got tortured by some kind of classified methods of exposure also but because of their kindness to me, leaking more information about that moments of times are not beneficial during the current moments of times and there was an agent (the names what he used for his self was T Matthiew Tom Raz Phillips) one of the Americans (likewise the information what I received by my friends, the information what I received about his name and his nationality and his simulated picture) who while he was shouting, tortured me also (he have a long jaw and a long chin, his eyes is a little more circular than what you see inside of the simulated picture bellow). I don’t know anything more!

**T Matthiew Tom Raz Phillips**

During that moments of time I was driving car and listening to some kind of political musics or some musics of Michael Jackson (but some kind of other musics that was including bad ideologies what Muslims sang also, but during that moments of times while I was cooperating with America I was not a politician nor an army member so I hadn’t any responsibility about public or about protecting people and I was so young, but also I was listening to some musics against the Islamic revolution while the volume was so loud in my car and public could listen it, what Iranian Intelligence didn’t like), likewise what you see, I describe you these memoirs what happened to me like a nightmare, while I am so calm. It’s so important for every critical personals, not to let their brain during a vulnerable moment, because of the pain or because of their environmental situation, act against the logic. I saw that while I am getting torture the other boys going to party with their girl friends while some others are getting shoot and are dieing! When the people got terror in another country then I became confused and I lost my concentration to be able to communicated with the other public people who was

around me and it caused that they laugh to me and tell me: don't you have any mental problem? (I remember from when I left my mother in Iran and I came to Turkey<sup>49</sup> to travel to the United States as much as I just had stress and because of I have lots of problems so after many month that I was silent and calm even if somebody insulted on me then I could talk clear and my voice became base a little when I was shouting to the owner of an Internet Coffee who came and turned the computer off while I had not completed my work yet! The other Internet Coffee what was closer was not good, some times when I was sitting there and working with the computer one of the young boys shoot the other ones towards the glass of it's long windows and it could crash on my head! A situation like the poor crowd!) I could not describe my knowledges to people in a conference, people never asked me about any reciprocative help, they didn't gave me a moment to help them! If you look to the works of F. A. Hayek one of the important scientists of the last century who had some meetings with Darwin and many other scientists, who was one of the genius brains in economy, then you will find out that he hardy could publish his own book to public! People will loose their chance when they don't listen to the others to learn something new and its so beauty if they always be full of kindness! I told you, during that moment of time I was not an army member, I did what was necessary to help people but I was so investigative, I told what I liked and I wrote my opinions in Internet whether my opinions was good or bad, liberalism or conservative or Anarchical! You can find some people who like to attack the animals. You see lots of African and Asian children die because of contaminated waters, who nobody taught them how to have a respectful beauty life to gain more support even! You see lots of children inside of the developing countries who have lots of potentials but we didn't helped them to reach what they could! You see innocent and weak African black women got raped, slaughtered and die because of sickness and fatal infections! You see the violations against women all around the globe, the women who naturally love to respect to the needs of their men! It's not necessary that we only look to America and our allies such as Israeli government who it's really strange for me that their current presidents don't like segregation at all and they don't believe in forejudge even about the civilians of the Islamic countries and our possessions who fight for delivering a better security around the glob. When I describe you a fact about high-tech technologies even one of the small or far countries around the globe (such as North Korea such a famous example) could have lots of high-tech secret technologies what people are not aware of that yet! Likewise what you read before, I was not an army member inside of its fearful world what crowd can not believe it, the unimaginable underground bases what you can not imagine! The hard and formal decisions what we must obey! Death and causalities! Like what you read before, near my family in my town I was driving car and I was listening to some kind of political musics or some musics of Michael Jackson.

While I rarely cry but the emotional potentials what the musics of Michael Jackson caused for me, made me cry! "Heal the world make it a better place for you and for me and the entire human race" I screamed where are you now Michael! Who caused that you die now! It was only a few days remained before of you travel to the United Kingdom from the United States! It's all what gone bad dead head!

When Iranian Intelligence service of Esfahan "Setade Khabari" on 2009 (a few years before of these complaints, what happened to me) asked me to go there, they charged me with offenses, including Calling the Central Intelligence Agency and transmitting some information to foreigner agencies and aiding the enemy. The place is located on Hashtbehesht st. There was an officer outdoor and we must ring the doorbell; another officer opens the door; there was a few rooms there; we went inside, there was a phone there. The phone rang and somebody talked with me then he asked me to wait for a while. After a while three agents arrived and asked me to go to another bigger room. They gave me a cup of tea, my hands was shaking. They asked me, why your hand is shaking? Anyway it is the first time that I personally come inside of an Intelligence agency, I answered. They asked me some questions and they forced me to fill a form and then I left the place. Because of they didn't arrested me so I decided to discuss about their ideologies more and I decided to learn about their personalities. However while the Iranian regime was angry because of my activities about liberty and freedom but the other countries made them more suspected to me and social engineered them against me<sup>50</sup> also. I wont describe a lot about decisions what Israel made nor about the members of the United Nations Security Council but between of these countries, the France was the only supporter of Barack Obama. It was necessary that I get out of Iran soon, It was near the 2013 US presidential election, some people decided to act against president Obama, I wont directly mention the name of these peoples, but president Obama was black and he was a democrat and they liked to choose a republic and a white president! But what's the difference! While my skin color is white at most but I have lots of white and black friends, anyway who completely respect to the people who got born in middle east, they decided to use me against Obama; because of when the others want to attack you, they going to sue you in front of your supporters at first, so you going to loose your power, and your supporters going to stop their supports and you going to act against each other. I was not wise during that moments of times so they decided to bother me. I was thinking about that what if Iranian regime arrest me if I stay there more, they arrest and sometimes they kill who are communicating with the foreigner agencies. There was a few weeks that because of my problems I didn't go to university (The major of my studies was mathematics. Except of maintaining security is necessary for me, but even right now I don't know what America going to do about my educations, what I couldn't complete because of America<sup>51</sup>), I went to Kaveh Terminal in Esfahan, I took a bus then I went to Tehran (It's the Capital city of Iran) I went to "Argentine" Terminal near "Saware Beyhaghi" Park. Likewise what I wrote, even the most powerful agencies can't independently protect peoples life, lots of times before of that lots of peoples die, our agents was aware of that the others inside or outside of America want to attack them but while people think through broadcasting these information to civilians the problems going to solve (completely) but they are wrong (While many times for my journalizing activities, many agencies attacked me, and I don't mean American agencies was an exception), there was a while that CIA was telling (between my communications) that "You are a good bad boy now" if they acted independently against the other militia, they would imprisoned them inside of America (While their activity caused that I am still alive and leaked some kind of secret information to them to protect millions of American peoples life later). During the travel Esfahan intelligence service of Iran didn't accept that I get attack but their minister of intelligence headquarter in Tehran (Heidar Moslehi, born in Esfahan, was the minister of intelligence in Tehran-Iran) ordered they attack me, the last

message what he gave was:

Heidar Moslehi

"I must kill you by hanging, it's our law. You acted against our security. A little you cum and go but I wont kill you but if you act against me then I can kill you out of Iran or rap— your fami———,etc. DARI AZ HOZEYE EKHTIYARATAM KHAREJ MISHI" (because of respecting to my medal and also not to make more complaints about **who** didn't kill me, I prefer not to declassify nor describe any more information) but somebody sent Electrical Shock to my testis, for torture. I remember Saman Bank of Iran (in 2008) sometimes tried to bother me, they could put the ATMs out of network coverage so I could not receive money using my credit card (even in Tehran their voice-president did some kind of other activities against/for some other figures of the regime, what I am **not** completely aware of that yet) I remember that one of the other Iranian mullahs "Mehdi Karubi" was so happy **and** he was laughing to this bad situation of me, and likewise what I heard, he was insulting to me (**when** they was torturing me in 2012, a few month before of The US Presidential Election)

**Mehdi Karubi**

His intelligence sources was not powerful as much as the other mullah “Heidar Moslehi” intelligence sources was powerful anyway. They didn’t like each other and they have acted against each other! My mother called the main branch of the related tourism company and asked them: Is my boy there? Is he alright? Later when I saw the officer of the tourism company then he told me that why you didn’t call your mother for a while? She is so sad! You must call her! I have a phone here I will call her now! However it was on the day of the accident and it was during the night and I was hearing that *somebody* was shouting “Shoot. Don’t Shoot. Shoot. Don’t Shoot. Shoot. Don’t Shoot.” Then they sent electricity to **my testis** for a while.

Barack Obama hugged a child

**Now look at the chapter 6, in the second paragraph where I wrote “Just I Rock” there was a while that Iranian leader had threatened US security and CIA must use some Iranians to find-out what he wanted to do, I must note that It was near The 2013 US Presidential Election and now it was more beneficial for dear president Obama that we stay in touch with each other so when somebody was angry with him and contacted me he could find him so during this bad situation, he was responsible to let the others do what they wanted to do about me but he don’t talk with them about our friendship relation. Likewise what I wrote in this chapter some people decided to act against the president, now look at the Chapter 1 where I wrote “American agents doing covert-operations to cover their cooperators activities” while my mouth is shut usually but through looking at these texts and if you imagine that a satellite was locked on me (and you don’t imagine that only one country have access to these kind of technologies) then you can find-out what happened to me exactly.**

Likewise what I wrote in this book many political activists, who I am aware of what they do, trying to use the people as their own tool, engineer every societies as much as they can, but does the US president who gave me lots of honors when the terrorisms made a catastrophic nightmare in my life, so who delivered the hope to my life, a leader who when people die then he really cries for a few days for them. Is this president like the others or not? (I let you to answer this question, you your self!) Near the Iranian-Turkish border after “Khoy” we could do an exchange about our money and convert our Rials/Tomans to Liras. This time I had real cash in my pocket, because of Iranian regime could shout down the ATMs, when I tried to receive money from my bank accounts, in Iran. They did it about me a few times before, many years ago. This caused that they didn’t tracked my location successfully also. The regime let me to left Iran. From when I left Iran, and arrived to Ankara (when I talked with agents around the globe, when I communicated with a figure, etc.) between of our communications CIA told “you are a good bad boy now” because of what it girls said was a funny term for me then I remembered it many times.

**HAARP (Some new semi-international technologies what people made some strange documentaries and mysteries about that: High Frequency Active Auroral Research Program - HAARP)**

HAARP

A picture about some mysteries what could be related to weather modification

HAARP

**Slowly** except of **Human Rights Watch** and **Interpol** and **IFRC**, etc., I increased my communications with other peoples and I gained more friends. An important thing what I like to note here is that if you work for **somebody** who you don't believe in their ideologies or if you work for **somebody** who you don't believe in their activities, not only you going to loose your self confidence and you going to get depression but also your leader going to sell you to the others and he stops his support of you, because of he think that you are acting against the law, so their freedom and their habits must get limited to what their leaders prefer. Maybe a leader likes to use tar-gas against people, the other likes to arrest them and the other one likes that his people don't listen to some kind of musics. The leader through applying his authorities on mass-medias, controls the public opinions; **we** name **these** activities **propagandas**. This Propaganda could happen against another country or against the citizens of the country where the leader live. It **complementary** action is **Social Engineering**, what not only most of the leaders do it but also many **private** companies use this tool to reach their own goals, targets, and ideologies. Maybe even many people **die** through their actions and maybe even an organization in Afghanistan use these political tools against one of the Americans. The use of electronic amplification devices, such as loudspeakers or bullhorns, may require permits for "amplified sound". The use of human microphones provides a way for people to address large gatherings **without** running afoul of such requirements. The human microphone was first used in the anti-nuclear protests in **the** United States and later in the 1999 Seattle WTO protests. This method of communication attracted attention due to its use by Occupy Wall Street. A human microphone, also known as the people's microphone, is a means for delivering a speech to a large group of people, wherein persons gathered around the speaker repeat what the speaker says, thus "amplifying" the voice of the speaker without the need for amplification equipment. The speaker begins by saying "mic check". When the people near the speaker respond "mic check", the speaker knows

they have the group's attention. The speaker says a short phrase, part of a speech, and then pauses. Those that can hear what the speaker has said repeat the phrase in unison, and when finished, the speaker says another phrase, then pauses again waiting for a response, etc., until the speaker's speech is complete.

## Chapter 4

**The guerrillas<sup>52</sup> must move amongst the people as a fish swims in the sea.**

**(Sun Tzu: The Art of War)**

I remember when I was getting out of Iran and I passed Iranian-Turkish boarder, my problems continued, until I reached my self to Ankara (at first, I taught when somebody travel to another country (except of is it located in Asia or Europa) the new country going to protect him against his enemies. While I waste tens of thousands of dollars during traveling to some other countries (even about satellite communication services, sometimes and only sometimes even when you become a UN Refugee there, even if you inform the government but they wont protect you as much as it is necessary, maybe you (some people) guess: the government do it to decrease the population of their foreigner citizens (immigrants), through increasing some gossips what will spread in the area about these kind of problems, between publics; but while they do a same thing about you as one of the individuals of their society and then about the other individual of their society also, so you your self are the next one who a same situation will happen to him, also.)), it was the first time that I traveled to Turkey, we took a taxi then we went to a hotel, the hotel was located in an area named Kizilay (Kızılay) in Ankara and it name was Ozilhan Hotel, I get inside and put my bags there. It was not the late night. I was so tired while I felt that I going to taste a different situation about the amounts of the freedoms what I could have here! Because of the recent tortures, I was so tiered mentally! I decided to go out and then I search for a bar or I search for a dance club. I asked people about, is any club there. You must go to the city-center, they answered. I went forward, I asked a few guys that: "is there any club here?" They guided me about the direction. I went inside, there was a few girls there and there was alcoholic drinks, a girl sat near me and gave me a glass of Vodka and asked for 100 dollars and I gave her, then she asked for 200 dollars more and I gave her again, then she asked me that you give me 100 dollars more then I going to stay with you during the night. I told her that I don't have any more monies right now, my monies are in my hotel room. She told me, you go and bring me more monies. but I was so tired and I had not lots of monies, however there was beautiful girls inside of the bar.

**Women in the Turkish Night Clubs**

**Women in the Turkish Night Clubs**

I came back to the hotel and I dropped my self on the bed and even I forgot to close the door and I felt in asleep, suddenly. My room was at the first floor. The next day, when I woke-up, I went down stairs, there was hot tea and Turkish coffee and egg and bread and jam and cheese there (free to serve for every guests), on the table. Persian (Iranian) people was in the lobby (restaurant) there. Likewise what I wrote before, we must respect to different kind of people with different kind of opinions, emotions and cultures so there is difference between people (such as Iranian people), one of the Iranian<sup>53</sup> men sat there and he was eating breakfast, another Iranian girl<sup>54</sup> sat in the lobby with her mother. Her mother came to turkey with her daughter, because of she feared of that maybe somebody bother her daughter. We talked with each other while we was

eating breakfast, then I came back to my room. There was a few beer cans and chocolate bars and mineral waters there, inside of the refrigerator.

(Me inside of a park Akköprü - ANKARA)

**(Me inside of a park Akköprü - ANKARA)**

When I came to Turkey, at first I had lots of monies and lots of times, usually I was consuming Pizza there! Turkish kebab (Doner) is one of the famous and tasty foods of Turkey. The price of foods in Turkey is something between 3 TL (1.5\$) to 20 TL (10\$) in the restaurants. Except of wasting my monies for buying some foods I also payed 60 dollars per night (about 120 Turkish Liras (TL)) for my hotel room but then I rent a home. I must pay about 200\$ per month and when I went out of my rental home then I could bought one pocket of (500gr) spaghetti 1.5 TL. After a few days my problems increased so I called the police of Turkey but they didn't or they couldn't help me (But some strange facts happened what had some relations and connections with Canada, Germany, France and Russian embassy also, those countries whom later decided not to cooperate with my enemies so not to let my enemies kill me, when they was shouting and say "marg bar in babama oon/(un) babam" only a funny term with harmony what means "death to/(down with) this father of mine and that father of mine", what I going to describe you about, more, in this chapter, later. I don't know about France a lot, so I wont mention their actions, later. also if we look deeply to my problems, what I had in Turkey (later), from another aspect of view so when Turkish government killed four citizens of them selves

(Turkish protesters whom was against their current parliament and their current president during that moment of time), where people was mourning in Kizilay. Where some political activists and human rights defendants was asking people to sign a petition against these assassinations (where they had made a monument for them), I signed the petition, what worsened my problems. Because of I couldn't find-out more information about what happened to me when I did some kind of activities like this so, I wont describe more about my times in Turkey. I going to write about these strange facts what happened to me after my call, when I am describing about the happenings and the accidents when I didn't received any citizenship but I went to Russian embassy and asked them to give me a citizenship or they give me a temporary visa (at least) to travel to Russia, because of I felt that Russia is more secure than Turkey, because of it is more far about the central locations of the Middle East than where Turkey is, and also because of it is more secure and more powerful than Turkey. However I remember that at first I went to American embassy and then to British embassy to receive a citizenship, while they didn't gave me a citizenship, also. But later they did something with my brain, to enhance some internal systems of my brain, to cause that if terrorisms arrested me and tried to extract my internal imagination system, then I be able to control what I am thinking about and I be able to control my imaginations), anyway likewise what I wrote, while nobody supported me nor I received any citizenship from America nor from England but after that I went to American embassy and British embassy then they (and CIA agents) did something with my brain to enhance it's blood circulations to improve the brain of mine but from another aspect of view "sending electricity (remotely) to my testis will make my children ill (even can causes mental illness)". During that moments of time the Great Britain was angry because of what happened to Mr. Bradley Manning, because of his mother had a nationality from the United Kingdom (Welsh) and she was so sad about her boy, her boy who was a member of the US Army before. They also told me that US must supported you, before. You was not a Muslim and you was not like the other Islamists who don't respect to the sexual freedom of the other people even. Their current situation (during that moment of time), caused that they decrease their diplomatic cooperation with America. It's related to when I was in Turkey.

**UNHCR Certification**

Lots of PIZZA HUT branches exist in Philippines but because of a variety of tasty foods what existed there so I bought it only once. I still remember the old and brown bottles of its old tasty beers what it's people drank inside of the suburbs near Manila. They have party with their friends and families and they eat everything there inside of the party! While the music is playing loud there! I saw, very poor people slept inside of the streets there. Except of the cars, some of its people had something like a three wheel bicycle for transportation, also (about its weather, its air was smelling wet most of the times).

The Manila is one of the main, and the capital city of Philippines. Just when I went out of the airport, taxi drivers asked to guide me about the famous locations of the city! I took a taxi! I can still remember that the taxi driver asked me where do you want to go? I told him I only want to go to my hotel but he insisted that we must go to a club! He bring me to a club, it name was area51 (I heard it stopped its services to its costumers and its guests later), I can remember it's parking was in front of the door of the main entry! When we get inside of the main entry then we went forward a few meters and on the right side there was the entrance of the main salon! Some teen and young girls sat there on the salon! They did strip in the late night hours, also! There was lots of foods including seafoods and the baked partridges white meat and porks meat! Red Wine, White Wine and Vodka! While Champagne is an old classic but the red wines taste was something different there because of while it made you drunk but also it causes a hot and warm filling in your body! Teenager girls got inside of the scene and took out their clothes and they danced, sometimes they took out their bra and showed their body to the guests, also! They came closer to the guests and showed their breasts to them! There was lots of prostitute women there who was sex workers and instead of receiving some money would stay with you during the night! I went to the hotel after visiting the club! Its rooms was not so light! I watched one of the champions of kick boxing (WWE) what the TV inside of the hotel's room was playing! I don't know what happened to the remote control of the TV tomorrow for it didn't work very very well till last day when I left it in the room and I took my bag slowly, not to made them aware of what happened to the misery remote control and then I went out of the hotel! Inside of its department store, fast foods, healthy foods, coconut juice, cantaloupe juice and mango juice!

Once I took a taxi and I went out of the city. The taxi driver bring me to a beach. I swam there, until the dusk! About the sunset, the color of the sky changed to a beautiful red color completely! I went to the airport to come back to where I lived, I missed my pipe with its premium natural taste light tobaccos what was waiting for me with my heavy books and my fish-oil (Omega-3) capsules and my B-complex capsules and my CoQ10 capsules and my Gincosan (a mixture of ginkgo biloba and ginseng) caps what I had this ready to got mixture near my math books there! However for sure you know that smoking tobaccos is one of the main causes of cancers nowadays and it specially causes the lungs cancer!

My political problems continued. One year later, inside of Turkey, when I was receiving money from people to pay for Internet so inform the America about their security threats, while I hadn't food to eat, while I was successful about helping some agencies in our country such as CIA to save their peoples healthy life and save their peoples security, then because of I had a bad financial situation, I went to another city in Turkey. It name is Nide. The weather is could there (it was not more than a few month that I was an official agent of America, while it was twelve years that I had cooperation with America), during that moment of time when my body lost it's energy and I was freezing as much as the weather was cold there, some Israeli cooperators was sharing their warm emotions with me. It was winter and the weather temperature in Nide was only a little better than Moscow in Russia, where I had been also. In Russia lots of people don't know English language, there is snow there and they have a beautiful underground train (metro) station in Moscow, I have not seen something like this in the other countries where I traveled before, because of the people go down underground so much to reach them self to Metro (the railway was so deep underground), but still satellites can track you there! I can

exactly remember the colorful stained glass works inside of the walls of one of its main stations in Moscow!

Moscow Metro Station

Moscow Metro Station

Once, in Turkey, I was **in the road of Ankara-Istanbul** that the public bus what I was inside of that, went inside of a tunnel what they (some workers) made inside of a very tall mountain, **where satellite connections got disconnected** there. The Moscow weather is so cold and their foods are different. They make something like creamy confectioneries (like small pieces of cakes) and place natural gelatin on this and then place the fish meat on this food; when I went to supermarkets in Russia, there was big, beautiful and ripe

fruits (apple, etc.) there! When I saw these fruits, suddenly I guessed, they are (probably) genetically modified fruits, else they could not be that much colorful! Inside of the hotels their waters looked a little green inside of the bathtubs. It was so interesting that their people was wealthy in comparison with the other countries where I traveled, I went there legally and nobody bothered me there.

The British intelligence service is one of the organizations that people who work there are very kind. I remember, when I was in Nide they gave a message to me.  
British Secret Intelligence Service message to me<sup>55</sup>:

In Great Britain the weather will be so cold soon, and as much as the weather is cold in Turkey so you can see your breath in the mountain which you live. Look at (take care of) the starry sky, there are stars there. Now you are aware of that we are forced to keep the secrecy to maintain our security, I won't describe more. I prefer that you say something about your self!

Best Wishes \_\_\_“YOU 2”

From when they (Secret Intelligence Service of UK - SIS) found out that I am Post-Traumatic Stress Disordered they are rarely communicating with me in comparison with every other countries, not to make my brain's situation worsen even a little. When I could die because of the amount of the tortures on me, through sending some kind of radiations to my body, they preferred to let one of their spies, who was sick because of the amounts of tortures on him, who could die soon, many agents of UK and America and somewhere else (like me) use (some of) his Identities to keep them self alive.

The central intelligence agency is the first organization what I started to cooperate with them, it was CIA. But SIS from Britain had let me and his other cooperators to use his names (real names, nick names, etc.) to keep my self alive, to loose my tracks against our enemies. I remember SIS told to his cooperator like me: Alfred (Alfred - his real or his nick name) You was one of the bests!

Even if I **died one day, when the others stop to support me**, this book is a great monument for the other agents who want to read about the classified history and about the spies who died but could not talk with you.

If you look at the motto of the Mossad, this is what you going to see (from the holy bible): "Where no counsel is, the people fall, but in the multitude of counselors there is safety."

Likewise what you read before, when I talked with some agents of England and Canada and Russia and Germany, they became sad about that some of their leaders caused that I got bothered before and decided to do something. Later while I was under attack, they didn't asked anybody to help me officially, but when they was shouting: "Marg bar in babama oon babam" "down with this father and that father" also through an informal translation it means "Death for me/Death to me, this fa (farsi/persian) is under attack and that Bob

(half Persian half American) is under attack” (because of I was searching in Internet about some other spies, who terrorisms attacked them, and then some other governments got notified that I searched about it) so they rushed and attacked the supporters of who was torturing me. It was about when some demonstrations against the government started in Turkey.

Likewise what you read here, and also in Chapter 3, CIA and Interpol was careful, not to let the others kill me. Slowly I increased my political friends, when anybodies who was joining our communications was including someone whom had a relation with the persons who attacked me, before. When some times our communications with my friends was related to my problems so it was necessary that my friends get notified about that I had some problems before, so they casually and repeatedly said “You are a good bad boy now”, later during a good moment of time when we was exactly talking about who tortured me, they said “you are a good bad boy now”. while nobody arrested this dear agent (and **at first** I dedicated this book to **her** agency) but also my problems leaked to the others and the others got notified.

If during the next century any other countries added any text about my life time to what I typed here in this book I somehow accept their texts also and I don't reject their documents completely.

When one of the military intelligence agencies are communicating with you, most of the times they say something but they mean something more, for example if one of the agencies told you “One hour per night” they could want to guide you about a direction to one of the locations of the geographical map, or maybe they like to do some covert operations about you.<sup>56</sup> It is possible that you receive a message from an organization but they give you another code to decode what they wrote. Lets try it, you just received an email from army, they wrote: Inside of the civil agency kind people had a bad disastrous but hot and good celebration, the music volume was too high, but something bad happened, we was hearing by the DJ that I love you. Inside of the new archive of the bar some dirty and bad databases with dirty information of the costumers in public computer there, caused that I did not find any DVD about the recent assassins activities. We are all around you now, hey dear Rose I ask you to take care while you going home.

Ten minutes later, the army have made a satellite contact with you, they are telling you, yes I made you aware, I wrote for you what happened. You say: Really! I was waiting to hear from you. The army say: inside of agency then I gave you my message, you are nasty all around badness but after my DVD player, inside my room, there is a gift what I will give you after an awesome amazing all a scores.

You are behind of your computer now! You are reading their texts, you slowly vesper: what does they said? Does they said, inside of agency then I gave you my message, you are nasty all around badness! But inside of the message what they gave me I saw the “bad” word lots of times!

Now look at what the army said through satellite communication. Now look at what the army wrote for you through an email message. Now try to decode the message you your self. Inside of agency then I gave you my message, you are nasty all around badness. I saw “a **bad** disastrous” “something **bad** happened” “some **bad** databases” “with **dirty** information”. You see the words what they wrote around bad, before and after it. I saw they said: after DVD player there is a gift what I will give you, after an amazing **all a** scores. But inside of the email of the army I see the “DVD” word again, after the “DVD” word they wrote: “**about** the recent **assassins activities**. We **are all around** you now, hey **dear** Rose I **ask** you to **take care** while you going home.” Here just you saw the words what started with **a**. Now look at the answer, it must be something like: Inside of the agency a (bad) disastrous something happened some databases with information about assassins activities are (what happens) all around! Dear (I) ask (you) take care (of your self).

The second example:

(you too look at...) Look at the starry sky, there are stars there without space. You are one of the best counter-terrorism intelligence personal who I've ever seen, likewise, one day you told me “ you are one of the bests...” also. Israeli also.

Not only we was not responsible to pay for you, but also your families, neither the other governments! If when you was in Iran you talked with some persons or if you read something bad then like one of the members of your family I was responsible to maintain a required level of security for you. In Great Britain the weather will be so hot!

Now after reading the articles of the next chapter (chapter 5) you can try it (remember if you expand it then that whatever the else you imagine, they could like to mention also):

(you too look at ... )

Take care of the starry sky, sere sare stars sere without (space char).

(**you too** look at...)

**Take care of the starry sky, sere sare stars sere without You you are one of the best counter-terrorism intelligence personal who I've ever seen, likewise, one day you told me miaou are one of the bests V also. Israeli also.**

(you too **look a t (s)**)

Take care of the starry sky, serene stars serene without You you are one of the best counter-terrorism intelligence personal who I've ever seen, likewise, one day you told me **miaou** are one of the bests V also. Israeli also.

Not was not responsible to pay but also families<sup>t</sup> neither the other governments! was Iran talked with some persons read something bad then the **(members of)** family was responsible to maintain A security. (the)Great Britain *the* weather so hot!

Likewise what I wrote before, Iranian intelligence charged me with offenses, including calling the CIA and communicating information to foreigner agencies and aiding the enemy, later they tracked me, while I was listening to their ideologies and I respected to their culture also. Later, some unidentified ones (one of the Iranian agents who *didn't told me his name nor where he works.*) shared some secret facts to me, about some of the regime activities which are against their law:

The worst problem of our agents (Iranian agents) are that if we open our mouth the government going to kill us. We are weak and we are working using the minimum requirements. We have seen, how our government drop the citizens inside of the cars and transfer them to the underground prisons, inside of the cells where nobody could hear their voice. Then the government torture them. We saw how some leaders gaining more money for them selves and where peoples don't get notified they drink alcohol, transfer and sell and use illegal drugs. We miss our Imam. (They let me get out of Iran and they didn't arrest me - also because of some personal problems, I didn't talk directly about a leader of Iran in this book nor about some nuclear advancements there and I hope it causes a better situation for me.)

The United States government and US agents are the most polite people in comprehension with the other countries which we are cooperating yet. Britain and France are the kindest governments in comprehension with the other members of the UN Security Council which we communicated with each other.

I remember once in Iran, I was reading one of the poems (the eagle the poem) what had written by one of the Iranians<sup>57</sup>, who was one of the student of the Cambridge University of England:

Flapping his wings, he rose above the scene,  
"Forgive me, friend, for being so keen.

Live long, eat well, and grow, if you wish,  
On carrion and dead matter and putrid fish.

This delicious-looking fare I'd rather pass,  
As I have passed to the animals the grass.

Death, immediate, in the firmament today,  
Is worth a hundred lives enmeshed in decay."  
He then rose into the air, gained altitude, on and on,  
With the crow watching in amazement, there upon.

He reached his own abode, passed even that,  
To the abode of light, where the firmament's at.

He became a point that had existed a while,  
Then turned into a dot that was not servile.

# Chapter 5

**The task of the leader is to get his people from where they are to where they have not been\_\_\_Henry Kissinger**

In this chapter you can read what US president Barack Obama gave me before, and also there are two articles of mine, what at first I wrote in "Veteran Ventures"<sup>58</sup> website about communications security. It's necessary that I add them to this book for the audience, those who want to work in politics but reduce the probability of getting tracked and then nobody be able to identify them so don't causes imprisonment for them selves nor they get torture (I also liked to write an article about satellite communications security and privacy there, but I had not enough time to do it yet; you are always responsible to maintain a required level of security for your self).

It was a few months ago that it was my birth day, I had a very bad situation what it's too soon to describe, when I heard the voice of Mr. President then I felt a different situation. The old email address of the White House is an old contact system what is not recommended to anybody nowadays because of the new contact form of the White House have lots of new abilities but during that moment of times I used the old email address once again, like what I did a few times many years ago. Like many years ago, I received an automatic replay again. I remembered my communications what I had everyday in Iran, for a long while, every mornings, every noons and every nights with the U.S. President when I confronted this replay.

(picture: part 1)

(part 2)

(part 3)

But later, this time, Mr. President informed me about that I received your email through the old email address again, yes, I gave you the honor!

## **President Barack Obama:**

*I dedicate my best wishes for my friend Mr. Peiman Ghasemi who fought for humanity. This nation and the freedom we cherish can, and shall, prevail. I must note that the texts what I gave to my friend is rewritten by he his self. The planet is full of violation what secret Illuminati can caused. I didn't took your home but I like to give you the house. I remember the day when inside of your messages you wrote for me, Dear truly winner of the Nobel peace prize, So when you succeed America succeeded. Here in America we believe in actions and we like to stop people to act against logic when their mental system is depressed. When they think*

about something, we imagine for sure they will do that, so we make a plan to decide about them before they do something wrong but a crying eye of a child can ruin these actions and plans! Our old friendship relations caused that I mention it. It is impossible that this person who is the friend of mine for many years, who loves me that much have done something unsatisfiable! You loved to help everybody and every country. I remember after lots of studies about the Iranian culture and while you were helping their civilians for some years, what nobody mentioned because of the amount of the other international works what you were dealing with them, it was a few months ago that you were insulting to yourself and to your own family under torture for the activities what you did for people to increase their knowledge then after lots of years of writing some articles for the civil generation then one of the homeless and poor persons inside of a public terminal insulted on you so it's not necessary that you insult on yourself family while the prosecutor government of your homeland likes to kill you and when you are protecting me here against the threatening problems!

Our dear lieutenant regarding to what you will write in your book about American covert operations later, I most note that we are aware! Today is your birth day. Your work about communication security what you with cooperation of the Central Intelligence Agency did to have some fun, only to have a training to test your abilities about cryptography and encryption what were not such a serious project for you, were very interesting for me. The other secret work of yours what you did such a medic to protect the life of US federal agents was another prefect work, briefly. Happy birthday! And I must note the audience, I can't describe you whatever I want to say. When humanity and mankind and women succeed America succeeded and "here in the House" I ask you to let me say when president succeed America succeeded. I remember you could not complete your university in Iran and it was necessary for you to get out of there soon because of some of the political complaints. There is no difference about that "am I black, white or in between". There is no difference about that "are you from Iran or from Africa". I'm not black, I'm not white, and so what am I?! The first year of studying in university for you, passed by studying about mathematical logical systems. True and false causes a true relation, true or false causes a false relation. You studied about the paradox of Bertrand Russell while the other students were reading it, you studied about what he did to stand against the nuclear wars, also! You were thinking about the differences between the mathematical meaning of " $\wedge$ " sign what means "or" in logical systems of mathematics while you compared it with the grammatical usage of "or". You were thinking when people say "me "or" my friend will go for the presidential election" so if one of them don't go then while the other one goes for the election then "you" or "him" went for the election so you didn't lie but in logic true  $\wedge$  false causes a false relation but you didn't imagine that it's only the audacity of hope what can solve it! But a crying eye of a child can ruin these actions and plans! Can you solve it? But I hope you go to the university the next year, again! It's the kind hope what always attracted your emotions and caused that you lose your concentrations to your environmental situations! America is the country of immigrants so when we win America wins! I ask people to think about the major of the contents of this book, once again. When Iranian

people celebrate Nowruz and grow seeds, we grow seeds inside of the White House also. When you were so young, you were studying English language at most and you had bought lots of books about English language. You didn't read lots of mathematical books completely but you read lots of English books and it approves that how much you loved our culture! Without money and food, because of the cold weather your muscles were shaking during the night and likewise what you wrote to many organizations "nobody helped you" but you wrote to The Central Intelligence Agency that "While I Receiving Money From People, To Protect US Security Even If I Died, I Died for Freedom" so you are one of the symbols of the mankind and the humanity in the history. When you did some kind of investigative activities in Internet your geopolitical and physical situation caused that they sue you. When you were a child, one of the teachers of the paranormal science<sup>59</sup> in front of one of the small groups of the audience told you: "you will have a bright future later!" The holy lord loves you. I need a quintessential self-made man. There is no justification for unreasonable inactions! You are clever so we needed your brain, we needed to make you succeeded! War! It's what you see inside of the programs of a few "broadcasting corporations" what you mentioned it, Industrial and technological transformations "while what they are doing is such an unimaginable war plan" for people!

Yours Faithfully,  
Barack Obama

## **Communications security for foreign officers:**

You are responsible for providing enough security for yourself and your organization. For 12 years I've cooperate with the CIA and the White House, out of America.

Just imagine that you are in Iran and you call the CIA and you give them some detailed info. During the next few days Iranian Intelligence will arrest you.

Imagine that you are in China and you send an email to the White House, CIA or US-Army, after a few minutes, opponent countries intelligence services will find you, they can lock on you through tracking systems. When enemies find you then they can torture you and extract some information.

To stay safe and secure, never use your home computer for your online works. There is only a little difference between a normal connection to Internet (HTTP) and a secure connection using SSL protocol (HTTPS) when the subject is espionage; so never search about top secrets inside of the search engines. Don't write to your destination agency about the secrets of one country when you use their website contact form or when you send them email. If you got imprisoned there is no way to set yourself free. So the first mistake is the last one.

I will write for you a checklist about how to make a contact safely:

1) Turn off your mobile phone, and take the battery out, and then go to the place where you want to use the Internet (Internet cafe, etc.)

2) Hide your IP. For example "Tor" is a free program that will bounce your IP from each of its relays around the world. Basically, it's just a big database of proxies that you can access to keep your online identity safe. When you're using the Tor then the *server computers* would no longer be able to track some information about the physical location of your IP, while *intelligence agencies* would have some delays to find your location.

3) Your destination agency must know you by a nick name; never use your real name when you give them information.

4) It isn't good that you completely type the name of any country what you want to talk about that!

5) You never send anything secret while it's not encrypted.

There are a few ways to encrypt your texts. There is a program which can encrypt your communications for you. It's *PGP (Pretty Good Privacy)* or *GPG4Win*. For encrypting your texts you can download it here:

<http://www.gpg4win.org>

Boeing company use it own method:

[http://www.boeingsuppliers.com/ldap\\_proxy/get\\_cert.html](http://www.boeingsuppliers.com/ldap_proxy/get_cert.html)

There are also some methods by using Morse code available for you to encrypt your communications.

This online translator can translate to and from Morse code:

[http://www.technick.net/public/code/cp\\_dpage.php?aiocp\\_dp=util\\_morse\\_converter](http://www.technick.net/public/code/cp_dpage.php?aiocp_dp=util_morse_converter)

(When you use the Morse code characters and prosigns then for example instead of "." you can type "for" etc., instead of "-" you can type "zero" etc. and so on. So instead of... - you would write: for zero. You must inform the related agency about how you would encrypt your texts, so they can decrypt it later.)

# International Morse Code

1. The length of a dot is one unit.
2. A dash is three units.
3. The space between parts of the same letter is one unit.
4. The space between letters is three units.
5. The space between words is seven units.

<http://www.veteranventures.org/author/peiman/>

# Chapter 6

One of the most beneficially changes in the history of wireless communications which scientists reached in the 21st century is about applying mechanics in physics (instead of the past secret electrical technology) to reach the ability of transmitting voice near the ear of people which decreased the rate of cancer and caused that spies be able to hide their real identity more easily for those who learned how to use this recent technology.  
(Lt. Peiman Ghasemi)

Russian military advancements are a little more complex and complicated in comparison with the other countries, for example one of their organizations who are using Aeroflot aerospace technology to extract the pattern of the brain. At first I had a little complaints about this with them but I forgave them. During one of their last forced communications with me she gave me a message, that: I also attacked the men who terror women. I also attacked the mullahs. I also bothered you (and some other ones). I also selected Russian army to work for, but I also found out this is not good (violated and useless).

Russian Security Agency also during their forced communication with me, when (because of some relations and US secret activities about Islamists which because of respecting to my medal and respecting to a better security for our people, I only described a little.) during that moment of time I was getting biological torture to death (a few times before of that, I asked the other people is death painful?), It was Russians who regarding to my questions told:

I forgave you, because of calling the Central Intelligence Agency you caused lots of problems for your self and dropped your self from the top to the floor by your head, while you was a child you liked to go to America and become an astronaut when you are dieing while its not up to me but you think about what I told you now, but if the others have not killed you, then when children of the children of your children are living (long later), our homeland and maybe even your homeland going to fall but I let you to stay alive, probably UK and France wont fall, even if we fall\_\_\_“BUT YOU DIVE”.

Then they (Russians) increased their cooperation with Israeli government instead of mullahs but some of these mullahs ordered the terror of some people such as Ms. Saba Haftbaradaran<sup>60</sup> who they shoot a bullet to her chest and dropped her on the ground to die! These peoples was some kind of refugees inside of the Ashraf Camp in Iraq. Like many other countries and organizations, they couldn't stand against them, because of these three powerful mullahs and the supporter country is somehow powerful also.

Victims of the Ashraf Camp

*Likewise what I remember, many years before of the accidents what I have wrote about them, inside of the Chapter 3, CIA women in Public Affairs (and maybe even women in the White House and the other related intelligence headquarters) when I liked to reach my self to US Army in Iraq, when I was so young, they told me: “**Just I Rock.**” They tried to accept me to work as an agent. It's interesting that I tell you, it was not a long time that I had watched the **Mission Impossible** the movie I saw a woman inserted a virus to her body to transfer it to another place. Who cares about what happened to me? What about stoning the civil women? who cares! etc. (even I don't have a wise family).*

I remember it was exactly when I was adding (liking) Christians pages in Facebook that one of the Iranian Christians who didn't know about what is politics, but always talked about politics and he liked politics, saw me in an Internet coffee, he recommended me to go to one of the churches where he went usually, the name of the Church is IPCA, if you take a bus from Kizilay what its destination is Chidem (Çiğdem) then it would pass the church. Its three famous permanent staffs names (nicknames) are Mr. Armen, Ms. Khanomjan and Mr. Aghajan during this years when I'm living there.

Once when during the night I was reading the holy bible I prayed and asked my lord to help me to achieve my goals and reach the victory and a few month later CIA and president Obama accepted me and they gave me honor (While I was in Turkey).

It's related to when I was under torture through some kind of classified methods, and one of SIS (MI6) spies who I described in "Chapter 4" was dieing. And it was only a few month after when CIA told me, they submitted my identities to give me an E-5<sup>61</sup> medal of honor later officially. When CIA decided to give me this medal in Turkey they told me: "**Pick**", they tried to find-out what going to happen if I work for them, later they accepted me officially, then they accepted me as a secret agent, they told me we caused lots of problems for you, we going to heir you and we going to strengthen you, you love me but you need some encouragements.<sup>62</sup> Thats why I dedicated this book to this agent **she** saved me. Don't forget to see the pictures of the future of the Mars and US future plans about the earth inside of the next pages!

During the final parts of this book, I like to tell you, when Americans voted to Barack Obama they selected a president who likes to listen to every kinds of ideologies who is against violations, he is black and he is tired of racial activities, he knows many languages (and even a little he knows Persian) his vice-president Joe Bidden knows many languages, and talk with me very fluently and he is so kind and there is no difference for him about, what is your country, your race, etc. Hilary Clinton is so kind and also she is a women who respect to peace and she don't likes violations, currently a great group of politician are in office and it's very good for American people if they respect to their current chance what they gained nowadays!

#### **It's a few parts of the secret history from the 2005 to 2014:**

Microsoft decided to give some networking facilities to Iran, while they also preferred to describe to Iranian civil people about that the regime of their own country wants to decrease the freedom of their access to Internet also they tried to brighten the public opinions about the Iranian regime's money works with some other countries while we was talking with each other. Some of the poor African children received some kind of free laptops as a gift from Mr. Bill Gates and the Microsoft company to use them for study! Because of that Bill Gates is a genius brains of the United States so usually the local companies of the United States respect him but there was a few times that I heard about that they want to make a chaotic situation for him and weaken his authorities during these recent years.

2012: Red Cross, Red Crescent and IFRC decided to increase their support about Asia for a while but they made a balance, later, after a few years.

2005-2014: US actions against Mr. Bradley Manning and Mr. Julian Assange caused that Britain decreased its diplomatic support of America.

2012-2013: Demonstrations in Turkey caused a few death and some causalities about Turkish citizens.

2013-2014: Israel and Iran decided to make a better diplomacy.

2012-2013: Bashar Hafez al-Assad decided to leak something against military satellite advancements of some powerful countries.

#### **GOP (last month of 2013 until first month of 2014)**

US government shared some secrets to warn federal agents about the after-effects of the shut down, the agents must be careful about any anarchical activities and about not to let poor families act against the security of each other in violated areas and locations, the federal government asked the agents to be very serious about our import and export plans and our economy.

Inside of The White House email you see:

Hey everyone --

It's not exactly a secret that Washington hasn't worked as well as it should. Between the constant gridlock and partisanship, most people just tune this town out. That was especially true this year when the government literally shut down.

Yet, even in spite of all that, thanks to the grit of the American people, this country continues to move forward. After the worst financial crisis since the Great Depression, folks are getting back to work and the economy is getting stronger.

And late this year, Washington took a cue -- and managed to make some progress itself.

While it's too early to declare a new era of bipartisanship, what we've seen recently is that Washington is capable of getting things done when it wants to. And there's an opportunity next year for this town to do its job and make real progress.

Here are just a couple areas where there's been progress made recently -- check them out, and then take a

look at our full 2013 year-in-review.

For the first time in years, both parties in Congress came together and passed a budget. This budget doesn't include everything that everyone wanted -- but our economy will grow a little faster, be a little fairer for middle-class families, and create more jobs because of it.

Our businesses created 2 million jobs in 2013. That's more than 8 million private-sector jobs in just over 45 months.

The economy is growing. Just last week we learned that, over the summer, our economy grew at 4.1% -- its strongest pace in almost two years.

We've cut the deficit in half since 2009. That's four years of the fastest deficit reduction since the end of World War II -- and it means we're improving our nation's long-term fiscal position while strengthening our economy. We produce more oil in the U.S. than we import from abroad. Thanks to an all-of-the-above strategy, we're reducing our reliance on foreign oil -- and that means lower energy costs for consumers.

The American auto industry is thriving. Last month, the auto industry added more than fifteen thousand jobs. And just a few weeks ago, the United States sold its final stake in General Motors.

Americans are getting better health coverage. Since October 1st, more than 1 million Americans have selected new health insurance plans through the federal and state marketplaces. And millions more are getting better health care thanks to increased protections and benefits.

There's a little less gridlock in Congress. Leaders in Congress took action so that executive and judicial nominees (except to the Supreme Court) can be confirmed with a simple majority vote. Now we're filling critical vacancies, and the government will work better for Americans because of it.

So while the politics in Washington can be frustrating and change takes time, that's no excuse for inaction. In the New Year, we need to help American businesses continue creating jobs, make sure Americans are ready for those jobs, and make sure those jobs offer the wages and benefits that give families a fair shot at financial security.

We also need to look out for those who are searching for a job. Congress needs to extend unemployment insurance, something we'll be making a priority when members come back to work.

There's a lot of unfinished business, but there are also things we can build on. If you saw some things in this list that you think more people should know about, then pass them on.

Thanks, and happy holidays.

Dan Pfeiffer

Senior Advisor

The White House.

### **President Obama Explains the Shutdown:**

Yesterday, eight days into the Republican government shutdown, President Obama spoke from the White House about the need for Republicans in Congress to stop threatening another recession just to sabotage Obamacare, stop demanding ransom just for doing their jobs, and just vote to reopen the government. He talked about the toll this shutdown is already taking on our country and the economy, and warned against the dire consequences of a default if Congress doesn't act to prevent an economic shutdown. Keeping the government running and paying the nation's bills aren't bargaining chips or a matter of negotiation -- they're a fundamental part of Congress's job. Here's how the President put it yesterday:

"If you're in negotiations around buying somebody's house, you don't get to say, 'Well, let's talk about the price I'm going to pay, and if you don't give the price then I'm going to burn down your house.' That's not how negotiations work.... In the same way, members of Congress -- and the House Republicans in particular -- don't get to demand ransom in exchange for doing their jobs. And two of their very basic jobs are passing a budget and making sure that America is paying its bills."

As the President has made clear -- and the press has reported -- the government could be reopened, today, with the votes of reasonable Republicans and Democrats if Tea Party Republicans would allow a simple yes-or-no vote on a Senate-passed compromise bill to fund the United States government. It's time for Congress to just vote and end this government shutdown now.

From 2005 to 2014: HRW (Human Rights Watch) decided to increase their support of weak people (black girls, girls who liked to go to school in Islamic countries where terrorisms don't let them to do it) instead of supporting one country and instead of using their budget only for standing against dictator regimes. While I played some rules, me and HRW was sending some messages to each other about increased violations in every sides of the earth.

From 2005 to 2014: CIA learned Persian language, slowly. from when I contacted them only one of them and she only a little knew Persian, when she spoke with me in the company.

After a few assassinations in middle-east, some mullahs decided to infect the waters of America but I received many information and I shared to our agents (and something more) what caused that we stood guard against the plans of these mullahs and we saved the life of many Americans.

Google tried to keep its self company, independent, but make a better and safer international

diplomacy for everybody.

2007-2009 One of the most powerful brainwashing propagandas by the regime, against the supporters of the Iranian Green Revolution.

2009-2014: Because of some radical activities of the other political leaders of Iran, Hashemi Rafsanjani decreased his supports of the regime but it caused that his power decreases also, he decided to submit his name as one of the candidates to go for Iranian presidential election (in the 2013) but political powers didn't let him. He could loose his power after that seriously. Through brightening public opinions, he didn't loose his power completely.

19/Oct/2013) I warned our troops about who made some relations and connections with America<sup>63</sup> while it's not such a good relation; 11/Nov/2013) The Yellow Dogs US-Iranian band members got killed (anyway they shouted to each other and some agents became suspected then these agents did a lot behind the scene to stop them).

12/Nov/2013) Human Rights Watch told me, we going to stop to cooperate with who causes these kind of activities!!!

BBC: Yellow Dogs shooting: US-Iranian band members killed in NY 12 November 2013

### **John Pilger (2013-2014)**

Few days after of that I shared pictures of one of the Palestinian and one of the Israeli Child in my facebook account I talked with John Pilger, then to help my friends in Benz company for free, I shared two picture of their cars, (from outside view) one of the cars was for one series the other was from another series. John Pilger told me that I didn't look from this aspect of view. while he was a little kidding but he meant he prefers he could support Israel more than before, he meant even me for a few years (long ago) didn't do it a lot also, however its interesting for me what Israeli told me when I was kindly handshaking with one of their patriots, what Israeli told me about: we will break the hand of whom can harm the person, who **gave a handshaking to me!**

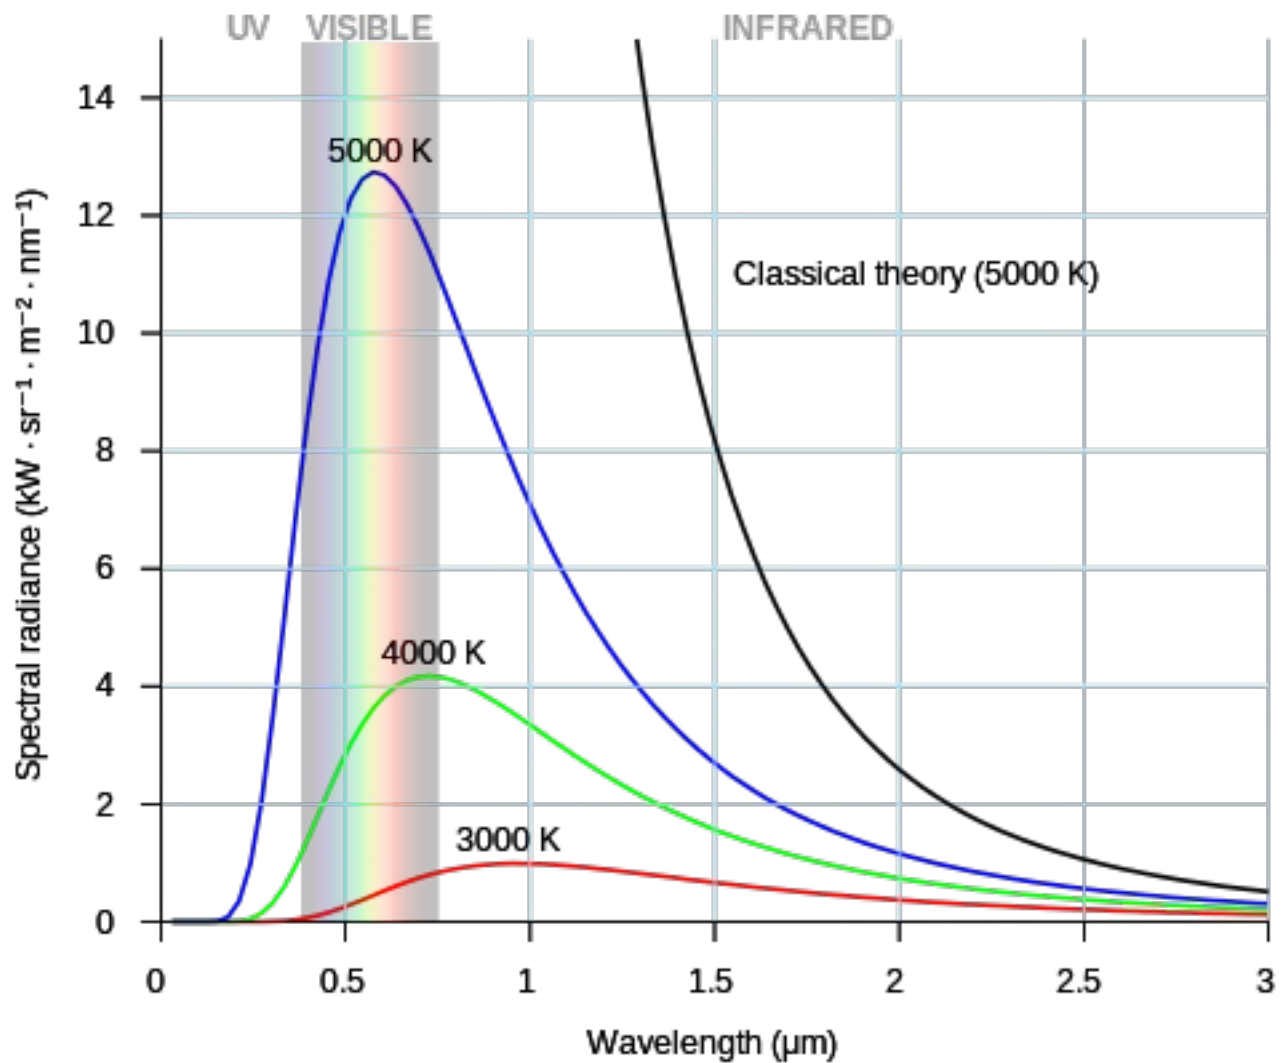

During the last two sessions of 2013 I nulled three terror plans (including microbial attacks or explosive or firearm attacks) to save the life of the US President (Barack Obama's life).

I gave two schemes/plans about how to make better electromagnetic shields (Faraday Cage) to maintain natural oxygen for the personals who work there (using Black Body), and I hope to describe you more about it, later. Its not related to what I told once on a video about these kind of technologies when I was mentally depressed and when I was not aware of the realities before of the date of the publication of this book!

(Black body)

(Black body curves of Planck for various temperatures and comparison with classical theory of Rayleigh-Jeans)

I gave a scheme/plan about how to find some valuable materials (like gold, etc.) in the other pla\_\_\_\_, using Electromagnetic Spectroscopy, and I hope to describe you more about it, later. I don't have a calm environmental situation to think about these theories but I think these theories are not such an important project to waste lots of your times to think about them.

(Spectroscopy)

**US plans about the future of the globe what is achievable until 2050:**

Increasing women power and freedom and security.

Increasing the knowledge of the public, slowly, about secret communication devices and secret harassment technologies to decrease the threats what our enemies cause to stop the propagandas against these technologies about the other countries, who already have access to these kind of technologies.

Helping Israel to expand their boarder, more, in comparison with the other countries, but also increasing our cooperation with Islamic countries and make a better diplomacy with them.

Some of the regime's governors during the next few decades (before of 2050) will change and hopefully their people going to have a different situation.

More people who are living illegally in the United States going to receive US citizenship and through this method (and tax paying complement system) we going to increase US budget also.

Right now we have all of the selections about how to deal with Iran but probably it wont be an attack "to

change the regime” “directly by US government” anyway probably US military allies going to do some actions to decrease their speed about reaching WMDs.

Soon, the Iranian regime will ask people to increase usage of their internal Internet network instead of their current Internet network.

We will make the anti HIV drugs available for people soon or late.

Companies going to distribute enhanced 3D Television with a better quality for peoples. Probably and only probably vertical flight industry going to increase it's business about small airplanes and for individual costumers. Who have physical limits such as who are blind going to have more fun through using recent technologies.

(UFO made in DARPA)

We going to search for new planets in far space where probably alive creatures exist there. In Europa, one of the moons of the Jupiter, likewise what I am sure about, there is not any live animal there but while I am not sure probably there could be some kind of microscopic creatures or maybe not, while scientists are not sure about that, yet!

(Europa)

America going to facilitate space traveling also for individuals (except of astronauts) and somehow we going to increase usage of space elevators for space traveling.

(Mars)

Mars One is a non-profit organization based in the Netherlands that has put forward conceptual plans to establish a permanent human colony on Mars by 2025. The private spaceflight project is led by Dutch entrepreneur Bas Lansdorp, who announced plans for the Mars One mission in May 2012.

permanent human colony on Mars

permanent human colony on Mars

permanent human colony on Mars

If we accept that the probability (math) of existence of the planets, where live bodies exist there, is like a graph in Chaos Theory (Continuous probability distribution is required)

$$f_X(x) = \Pr(X = x) = \Pr(\{s \in S : X(s) = x\}).$$

While:

$$\sum_{x \in A} f_X(x) = 1$$

Then if:

$$\lim_{x \rightarrow \infty} f(x) = \infty$$

When x is the diameter of the universe

(While I only mentioned them to give you an imaginable example, so don't dull your brain while I didn't use the General Relativity theory and we will imagine that discretions don't exist in the graph) so for sure there are live bodies (whom some of them gained access to our recent technologies or even some of them are more technological, they are not angry with mankind so much nor decided to attack the others yet). Few days ago I wrote in my Twitter account that, while there is lots of other planets inside of infinite space, so when our people going to think about that does the other creatures need more food or a house to stay there or does they need a better environmental situation to care about their health? During the next years we going to declassify to everyone about the recent advancements of our telescopes what can show us the smallest particles in far space.

While knowledge of people in Islamic countries increases (while they wont reach a top level of advisement, what the people of the western country reached today), we going to have some kind of after-effects, like what Wikileaks did or like what violated Islamists or terrorisms doing against our homeland security (because of their brain pattern during the development, starts to look at the problems of the superpower countries because of they are poor but the others are rich and technological).

We going to have a basic and fundamental change about the terrorism groups what exist yet.

At least during the next seven years, the affections and the power of (*some well known*) radical Islamists of Iran going to increase everywhere so more spies in Iran going to get arrested, tortured or die. So I advise you to support your powerful friends instead of attacking your radical enemies.

While nobody protected me as much as it was necessary to maintain complete security for me during writing this book (about the second edition of my work, I most note that: I decided to dedicate the second

edition of this book to the US Department of Justice while (for example) I have not received an order from this department about paying my salary after many years) and even if a few and only a few cooperator agencies of mine tortured me before while I don't remember they did (and they are not including the agency and some humans what I work for them and you have read about them here in this book until know, some agencies who I only like to mention that if one day I died they could accepted that so sharing any more information here in this book is not necessary) but to protect their security what will causes that I be able to maintain a satisfiable level of security for my self so it will causes that I be able to have these privileges to publish this work to public against terrorism regimes and while staying silent causes a better situation so if any country helped me until now and even if American agencies used one of their surveillance satellites to protect me against the other countries terrorisms, while they helped me much more than what I wrote here, it's so beautiful and nice that me and who completed reading this book to increase his knowledge, respectfully believe in their kindness and thanks them. Who without their support nobody going to respect to our peoples life. I don't know why we are like the robots who must shoot shoot and kill each other and save our monies, our every one dollars, inside of our bank accounts! Continuing my educations, improving US international diplomacy and seeing my mother again is what I hope! **However Thanks to all of the personals in America who work hard to increase the humanity and security and freedom, who without their support nobody would respect to our peoples life.**

**Soon DOD (Department of Defense) must protect my life and this agency going to protect my life inside of America so if any problem happened to me while they are aware of my life threatening complaints until the last minutes of my life where ever I am so at first this department is responsible until the related problems of my US immigration hierarchical formal actions done here in Turkey. This is what I wrote inside of the previous version of the book but then US rejected my visa proposal again, I slept for nights near a bridge near the street, I slept inside of the Ashti (Aşti) terminal for a while also!**

**I recommend you to read the acknowledgment of this book for sure once again and then you look at the head note of Bill Gates at the introduction of this book to summarize your reading, and also I like to note: during writing this book, IFRC guide me to add some beautiful parts of my life to this book, without the support of the IFRC and Interpol (while I hadn't enough time to exactly correct the structure of these writings while English language is not my native language and while it only took a few weeks of my life to write and complete this book and review it about it's mistakes) but they helped me a lot to dedicate this book to the generations.**

One of the most important challenges of mankind is about Reducing Uncertainty\_\_\_Lt.Peiman Ghasemi

Humanize humanity, human nature and human rights humanly.

Jesus Christ saves us.

I didn't removed "Aware" word from The WhiteHouse key (Code) to give that "right" to the audience of my book.

By agent Peiman Ghasemi - Central Intelligence Agency and Human Rights Watch — 06/06/2014

<sup>1</sup> (2014/03/20 during a message to US president, I leaked every enemies against him and who was against his speeches for Iranian Nowruz to him, to stop the threats against him (Obama) and against his supporters in Iran; it was exactly the new year in Iran (year: 1394), then I temporarily resigned, I wrote to White House that: I had (felt) the best times of my life during cooperating with president Obama, even if US did nothing for me (to help me). Regards.)

<sup>3</sup> When they were telling me: Even In Fact Book

<sup>4</sup> I received this official foreword through a secret communication method similar to a satellite phone contact through a temporary coded voice message. #EVETGET# from both aspects of view #WHEN MANKIND SUCCEED - EXCEPT OF PSYCHOTIC# WHEN YOU SUCCEED - AMERICA SUCCEEDED

<sup>5</sup> I received this official foreword through a coded and unofficial communication method. So the structure of the sentences are not exactly typed by USSS like this.

<sup>6</sup> I received this foreword through a coded and a live short top-secret satellite communication method so the structure of the sentences are not exactly typed by the prisoners like this nor formally sent to me nor signed. I also communicated with their families for a few minutes.

<sup>7</sup> Formal Serial Number (Submitted in Iranian Red Crescent Society): 87040112809-2

<sup>8</sup> I received this official foreword through a coded and unofficial communication method. So the structure of the sentences are not exactly typed by NSA like this nor formally sent to me nor signed. While at first they didn't like to write it but during the latest parts of writing this book, even they helped me (through some communication methods), to write a better book for you.

<sup>9</sup> *De Principatibus / Il Principe* by Niccolò Machiavelli - 1532

<sup>10</sup> *"Intelligence Analysis: A Target-Centric Approach"* by Robert M. Clark - 2003

<sup>11</sup> *"The Road to Serfdom"* by Friedrich Hayek - 1944

<sup>12</sup> Sun Tzu (also rendered as Sun Zi) was a Chinese military general, strategist and philosopher who lived in the Spring and Autumn Period of ancient China.

<sup>13</sup> 2012-6, 2012-8

<sup>14</sup> It was about August 2013. I hope that I don't get sick by cancer, or tumor, later, because of the amount of the radiations I hope that the American gov. give me the required medications soon.

<sup>15</sup> I could write a fiction book then I could write: When you contact the Microsoft your PC talk with you. Buy ASUS laptops then you going to have a kind girl friend in your home. While Rotten Tomatoes was not in my twitter followers list but because of everyday communication I was thinking about how to mention their name but when UNWatch (Regarded to my emails about my bad situation here in Turkey) sang one of the famous songs of the second world war (when Hitler was governing in Germany), then I decided to mention both of these companies name. From when I talked with SIS (MI6) because of I was PTSD they are one of the very few agencies who didn't talk with me (all what I can note about if they talked **inside** of my **brain**) which

don't worsen my problems!

<sup>16</sup> Big Brother is a fictional character in George Orwell's novel *Nineteen Eighty-Four*. He is the enigmatic dictator of Oceania, a totalitarian state wherein the ruling Party wields total power "for its own sake" over the inhabitants.

In the society that Orwell describes, every citizen is under constant surveillance by the authorities, mainly by telescreens. The people are constantly reminded of this by the phrase "Big Brother is watching you", the maxim ubiquitous on display.

Since the publication of *Nineteen Eighty-Four*, the term "Big Brother" has entered the lexicon as a synonym for abuse of government power, particularly in respect to civil liberties, often specifically related to mass surveillance.

[http://en.wikipedia.org/wiki/Big\\_Brother\\_\(Nineteen\\_Eighty-Four\)](http://en.wikipedia.org/wiki/Big_Brother_(Nineteen_Eighty-Four))

**Nineteen Eighty-four**, novel by the English author George Orwell published in 1949 as a warning against totalitarianism.

<http://global.britannica.com/EBchecked/topic/415623/Nineteen-Eighty-four>

**George Orwell**, pseudonym of Eric Arthur Blair (born 1903, Motihāri, Bengal, India—died Jan. 21, 1950, London), English novelist, essayist, and critic famous for his novels *Animal Farm* (1945) and *Nineteen Eighty-four* (1949), the latter a profound anti-Utopian novel that examines the dangers of totalitarian rule.

<http://global.britannica.com/EBchecked/topic/433643/George-Orwell>

<sup>17</sup> What they declassified to public:

To May 2010, environmental samples confirmed that both enrichment plants were operating as declared, FEP producing less than 5.0% enrichment. However, in February 2010 about 1950 kg of low-enriched uranium from FEP was taken to PFEP.

In June 2010 the AEOI announced that it planned to build four new research reactors for production of medical isotopes, including a 20 MW one to replace TRR when its operational life finishes in 15 years. This plan would justify production of more 20%-enriched uranium at Natanz, which gives rise to international concern.

<http://www.world-nuclear.org/info/Country-Profiles/Countries-G-N/Iran/>

<sup>18</sup> **Stoning**, or **lapidation**, is a form of capital punishment whereby a group throws stones at a person until death ensues. No individual among the group can be identified as the one who kills the subject, yet everyone involved plainly bears some degree of moral culpability. This is in contrast to the case of a judicial executioner. Slower than other forms of execution, stoning is a form of execution by torture.

Stoning remains a legal form of judicial punishment in Iran, Qatar, Mauritania, Saudi Arabia, Somalia, Sudan, Yemen, Northern Nigeria, Terengganu in Malaysia, Aceh in Indonesia, United Arab Emirates, and Pakistan. Stonings after legal procedures have been reported only in Iran and Somalia; although several other countries practice extrajudicial stoning, while several others have sentenced people to death by stoning, but have not carried out the sentences.

<sup>26</sup> That Robert M. Clark introduced in his book "Intelligence Analysis: A Target-Centric Approach" in 2003

<sup>27</sup> And when they showed the president's picture with a shout-gun in his hands (while lots of VIPs doing this kind of trainings) they caused a shame on him.

<sup>28</sup> During that moment of time I was working in an Internet Coffe in Mojta-me-e-Park; Iran. During that moment of time after the contact then they (The BBC Persian) contacted me and ridicule me and insulted on me a and bothered me.

<sup>29</sup> by John le Carré

<sup>30</sup> and also the describion of this activities will cause that they sell me to each other and they will torture me.

<sup>31</sup> 2008-2010

<sup>32</sup> Some people who haven't learn how to read a text exactly or ADHD people, now going to imagine that all of the problems about what I wrote and you are reading right now, in the parenthesis, about my past mental situation, happened to me because of what CIA did, but as I wrote there, only a few percent (at most 10%) it worsened my mental problems.

<sup>33</sup> MISIRI

<sup>34</sup> "Iran: Time for a New Approach"

Publisher: Council on Foreign Relations Press (March 1, 2004)

The product of an independent Task Force chaired by Zbigniew Brzezinski, President Carter's national security adviser, and Robert M. Gates, director of central intelligence during the George H.W. Bush administration.

<sup>35</sup> I mean Hindu race came from India, but Hindu is (recently) an idom what politician use to describe many (previous) Islamic leaders of the middle east, exept of does their race came from india or not

<sup>36</sup> "The Satanic Verses" by Sir Ahmed Salman Rushdie - 1988

<sup>37</sup> It's not completely declassifiable. I used the "Supporter" word instead of "personal" to gave you a brief scheme only.

<sup>38</sup> boo. whoo. hoo. bow

<sup>39</sup> They ment Obama is dictator.

<sup>40</sup> They wanted to insult on CIA and they told: CIA cooperators are terrorisems. what they told is not completely declassifiable yet.

<sup>41</sup> ahh. ooh. etc.

<sup>42</sup> We are devoted to Iran (Iranian Mullahs in fact).

<sup>43</sup> Khanomagha Mazrooie

<sup>44</sup> The attack on the British Embassy in Iran - on 29 November 2011

<http://edition.cnn.com/2011/11/30/world/europe/uk-iran-demonstrations/>

[http://en.wikipedia.org/wiki/2011\\_attack\\_on\\_the\\_British\\_Embassy\\_in\\_Iran](http://en.wikipedia.org/wiki/2011_attack_on_the_British_Embassy_in_Iran)

<sup>45</sup> The capital city of Iran.

<sup>46</sup> Jamshid Lashkariyani

<sup>47</sup> Farshad Ghasemi

<sup>48</sup> Mostafa Ahmadi-Roshan

[http://en.wikipedia.org/wiki/Mostafa\\_Ahmadi-Roshan](http://en.wikipedia.org/wiki/Mostafa_Ahmadi-Roshan)

49

<sup>50</sup> I don't have a privilege to declassify more information yet and I prefer to respect to my medal.

<sup>51</sup> Because of the last US presidential election after effects - because of aiding CIA - etc.

<sup>52</sup> Guerrillas are some kind of agents who work as militia, (partisans whom attack their enemies while they have a minimum organizational communications with each other).

<sup>53</sup> Mr. M. Jerban - also later during the latest weeks of writing this book one of the Christian brothers Mr. M. Kiani asked me to stay in my own home for a while, I remember once after eating dinner what they cooked while he was so tired he even asked me to let him to wash the dish and spoon what I used.

<sup>54</sup> Ms. N. Amir-esmaeli

<sup>55</sup> Secret coded satellite message what they sent for me in Nide - Turkey

<sup>56</sup> here you can see one of our codes what I broke for you:

**Just you do it (This code is related to my first contacts with America)**

**CIA to me: "We will be do" Whatever we can but it will be late**

**Whatever do Can But It Will Be Late**

**But "It Will" Be Late ---> "We Will Be do" --->**

**Late(r) "do Whatever do" Can**

**Late(r) do Whatever Can**

**Don't forget: But (it --> his) "will" be late:**

**Late(r) I will do Whatever (I) can (and) want**

**So reverse:**

**Can later do what ever we can**

And it's another codes of CIA (in 2013), what is not about helping me (and I don't have the right to describe about some bad problems what happened) but they was communicating when they approved as a secret agent of America:

**Let me pink about that. Let me blink about that.**

<sup>57</sup> Eagle (Oghab) poem, by Dr. Parviz Natel Khanlari

<sup>58</sup> <http://www.veteranventures.org/author/peiman/>

<sup>59</sup> Mr. Aidin Nakhband

## Communication History

Customer Peiman Ghasemi via CSS Web

10/19/2013 12:03 AM

a Top Secret analysis of our future plans by Peiman Ghasemi O-2 lieutenant of US Intelligence and White House (Obama) honorary authorized decision maker and Human Rights Watch Cooperator: while [REDACTED] want To Name [REDACTED] as the Next [REDACTED] Security Secretary; Iranian mullahs want to make secret relations with America as they a little had before. Arabs save their money in American and European banks, and doing money work. nowadays US intelligence is doing a plan to show Mullahs secret relations to public so [REDACTED] try to sell american citizens to muslims; right now they started to sell US citizens who have the nationality of Iran, etc. (for example by informing Iranian leaders about that what Iranian-US citizen VIPs want to transmit to others before of they communicate with each other) everyday I imagine what if US loose it's independency and except of other powerful countries who already have [REDACTED] also violates islamisms and others completely and independently and also somehow without without money work reach access to satellite communication systems, directed-energy weapons and EMP just imagine that you go on the bed with your girl friend and while you are tasting a red wine shot they shot a laser beam on the breast of your girlfriend. anyway I'm not completely aware of our commanders future plans but [REDACTED]

-  Sub
-  Con
-  Give
-  AKC
