Introduction

A little bit about me, I'm a 29 year old photographer who doesn't spend much money nor go out to fancy places since being laid off my postal job a while back. Photojournalism is my passion but many of us photographers don't make much money, so that puts me in a position to find other ways to pick up the slack in the end. I was always the type to keep an open mind about making it in life with or without a job, so I begun looking for other options.

About three years ago, I started researching easier ways to make money online. I saw how so many people were talking about doing surveys for cash but I thought this was some sort of fluke. I told myself, "Just how anyone could make money doing this and why would they spend all their time sitting there answering questions they don't care much about..." So I just forgot about it and did other things.

It was afterwards that I saw a video on Youtube which made me seriously consider trying it out for myself. This woman in the video talked about how she was a stay at home mother who made money from doing online surveys. She explained how much extra money people are literally missing out on doing something so simple. It got me interested, so again I started googling "top paid online surveys" and a ton of blogs started popping up.

I went through many great blogs but wasn't sure of what companies to sign up with. A lot of comments read how people were making money at home doing these things in their spare time. Some mentioned they'd made \$15 here and \$20 there but it seem everyone was making money, even if it was in small amounts. I remember reading how one guy made a full time income at \$1,500 a month. This had me skeptical since reading how surveys panels pay at most around \$50 to \$60 a month each, but then I thought maybe it's possible if all of it could be done at once.

After many searches I eventually signed up to at least two well known survey sites (MySurvey.com & OpinionOutpost.com) and started to make money. These two sites are some of the best and easiest money making greats out there. However, later I will include many of my other top picked golden nuggets for

you to start off with. These two sites together consistently make me an easy \$125 a month, as they only take about 30 to 45min of my time each day within a 30 day period. Since then I've signed onto 10 of the best paid survey sites and now.

What you'll Learn from this Book?

In this book, I will completely lay out everything of how you can earn extra money for you and the whole family. Whether you're new to paid online surveys or a seasonal vet, there's something in this eBook for everyone to learn. You will obviously not make much money on just one survey panel alone, so I can better explain this using my own realistic mathematical formulas of how I'm currently doing between \$500-\$1,000 a month. Hopefully, you will get a more clearer idea of how this could be very possible for you as well.

Before we begin, please let me be clear that this ebook WILL NOT be about "bots" nor any of those many shady "black-hat" tricks to quickly make money by cheating. If this is what your intentions were when you downloaded this ebook, than you have been sadly disappointed. You're welcome to go elsewhere if cheating is how you plan to make money online. Lastly, this whole entire process will be achieved with just you simply having to commit only your time and efforts.

Ok, so now let's talk about making some money with these surveys!

M.Brown

<http://paysurveyfamily.blogspot.com/>

Chapter One

Why Your Opinion Matters The Most to Companies?

You might ask yourself, **"why do they need me to answer all of these damn questions about products and services?"** and **"how do they make money if they're paying me plus millions of others around the world to take these things?"**

Well to answer the first question, **"why do they need me to answer all of these damn questions about products and services?..."**

Major corporations like: Nike, Sony and Apple etc. need your opinions on how their products are performing. You are the end consumer who's buying the products or services, so your feedback is very crucial to them. Your opinions you provide them with in the form of a survey not only helps improve on the products, but at the same time getting exclusive details to help beat out their competitors. The number of people who don't like a particular product vs. the numbers who do, would be recorded using data to help them make improvements. This kind of important information is what makes a company stay alive in the end!

How do survey companies make money if they're paying me and plus millions of others?...

Corporations who are providing the surveys pay the site when you complete the surveys. The site actually doesn't get paid until you get paid. For example, when you're ready to redeem a cash payment, a predetermined amount is already taken from the site to pay you. Sort of like a commission percentage from them to you. All in all, they really need you to complete the surveys so that they can make money as well. It is why many include referral programs so you can sign up as many people possible. Some panels have a minimum threshold you need to meet before redeeming for cash. This is usually the case with all paid survey panels as I will go into further detail later.

The 3 different types of surveys

This ebook is particularly about online surveys, but you will encounter a total 3 other types of panels to make money, with such as:

Online Surveys- You give your opinions in an online survey panel. It's easy money and just about anyone can do it!

Focus Groups- You participate in an interview conducted among a small number of individuals, sometimes over a brief period of time. These discussions can involve any topic of interest and they usually pay the most.

Shopping Surveys- You are actually paid to shop at stores or to eat at restaurants! This is also nicknamed "mystery shopping." All you need to do is fill out a questionnaire about your customer experience.

You can get paid:

- **\$1 - \$75** to take online surveys
- **\$10 - \$50** to participate in shopping surveys
- **\$20 - \$250** to participate in focus groups

The best surveys pay up to \$250 an hour are focus groups because these companies know this information will give them an edge in the market and they will make more profit for themselves.

Chapter Two

Are Survey Sites Just Scams?

For every survey panel, you will find something that they will give you in return to take them. This usually comes in an incentive such as gift cards, movie tickets, sweepstakes etc. but you may be asking yourself, "Do I need any of that stuff?" Well the answer is only left up to you, and how much time you'd want to put into it. Some folks would sign onto panels without researching them first and believe they'll make money, only to find out they won a \$5 gift card for Walmart.

Gift cards aren't bad, but personally I don't want them. This also includes: coupons, trial offers and sweepstake entries. Just give me the money! Many people online complain about this and they believe that its all part of some scam. Most of the paid survey sites out there are free to join and nothing else on the site afterwards require a payment from you. I'm pretty sure by now it would be very hard to convince someone to pay a fee for joining a paid survey panel online, as many folks would quickly spread the word about it not to join.

A great number of people, especially "noobs" are eager to make money and never read the site's terms or other rules before signing up. However, you still have folks saying things like, **"I was told that when I sign up, I'll have \$5 in my account and now I can't cash it out to my Paypal!"** or **"I'm always told I'm not qualified or the survey has closed for the day"** and **"All you get is points for gift cards and in return, they trick you into taking your information and wasting your time."** And usually all of these complaints are followed by that four letter word in all caps **SCAM!!...**

Well technically this is not a scam, and again its just some folks that are not carefully reading what the terms and conditions say. Although I have to honestly say that, who really reads that stuff anyway? All of those complaints was something I experienced too but it quickly wore off as I eventually found better ones to take. For example, you will not qualify for every single survey that's attempted. On average for each site I usually qualify up to 1-3 a day or 7-21 a week. Later, I will discuss in detail which sites are better for your chances to qualify.

Also, many survey panels feature high paid offers for you to take. The panel would pay you to try an offer free, for a set time period. They'll usually require your credit card information before taking it but mention you'll only be charged, if you don't cancel before a certain period. Panels will pay you around \$20-50 per offer and you will only be paid, after fully completing it. These offers look really good on the surface because of its high payouts but if you don't carefully read them, you can easily run up your credit card bills. This is another scam claim some people would put out but again, its all about carefully reading before signing up.

In the next chapter, I will go into great detail of which types of survey sites you should choose and not choose for making money, what to look for in sites before registering and how & when you're going to get paid. Hopefully this should help clarify everything in your next decision to join a survey site before labeling it a SCAM!

Chapter Three

What to Look for Before Registering.

It's obvious that if you want to make money with taking surveys online, then you should only go after the paid ones. These panels come in plentiful as the last time I checked it was nearly 30 of them that pays out cash. However, this is not to say that these payments wouldn't come without some kind of obstacle first. They're what I call the "payment trio" which I've put together and it includes: payment thresholds, payment per surveys, and payment processing.

Each of those three areas are indicative to how you're going to make the best of paid surveys. Payment processing is very important, since you'll want to know when your money will actually be in your Paypal account after redeeming for a "cash out." I personally use this formula to determine which site I will join and its helped me to make more money in a time efficient way. Before you get into making your decision about which survey panels to choose, first I would like to explain in detail each of these three areas of payment trios.

Payment Thresholds

Every paid survey site online has a set payment threshold or starting point before they would release the money to you. They're many sites that will pay you \$1-5 when you sign up but you cannot redeem this money until you have at least earned up the threshold amount. Usually it begins at a minimum of \$10 but most are \$20, \$30 & \$50. If you want to redeem your money at the earliest, then you'll need to sign up with panels that offer the lowest "cash outs."

The term "cash out" or "cashing out" is the same as redeeming your for cash. You'll need to set up a Paypal account, that's if you don't already have one, to receive payments into your Paypal account. A lot of people who are new to taking paid surveys often talk about, how they're not getting paid and the length of time it takes to get paid. Looking at the site's payment threshold will give you a good idea of how quickly you'll get your money.

Each threshold needs to be looked at carefully to give you some clarity on how quickly you can redeem in a month. In detail below, I will demonstrate with threshold payments of \$10, \$20 \$30 & \$50 and calculate the times in a month that you can cash out. I will use the average pay and qualification frequency of each survey taken, to help you determine how much you can put into your Paypal account.

Threshold Payment of \$10 (*you need at least \$10 to redeem for cash*)

\$1.50 (*avg. pay per survey*) x **2** (*qualified surveys a day*) = **\$3** (*a day*)

\$10 (*threshold amount*) divided by **\$3** (*survey payment per day*) = **3** approx. (*days to reach threshold*)

31 (*days in a month*) divided by **3** (*days to reach threshold*) = up to **9 times** of redeemable payments per month.

You will likely "cash out" or redeem your \$10, every 3 days or for up to 9 times a month. This will give you a total of about **\$90** a month.

Threshold Payment of \$20 (*you need at least \$20 to redeem for cash*)

\$1.50 (*avg. pay per survey*) x **2** (*qualified surveys a day*) = **\$3** (*a day*)

\$20 (*threshold amount*) divided by **\$3** (*survey payment per day*) = **7** (*days to reach threshold*)

31 (*days in a month*) divided by **7** (*days to reach threshold*) = about **4 times** of redeemable payments per month.

You will likely "cash out" or redeem your \$20, every 7 days or about 4 times a month. This will give you a total of about **\$80** a month.

Threshold Payment of \$30 (*you need at least \$30 to redeem for cash*)

\$1.50 (*avg. pay per survey*) x **2** (*qualified surveys a day*) = **\$3** (*a day*)

\$30 (*threshold amount*) divided by **\$3** (*survey payment per day*) = **10** (*days to reach threshold*)

31 (*days in a month*) divided by **10** (*days to reach threshold*) = about **3 times** of redeemable payments per month.

You will likely "cash out" or redeem your \$30, every 10 days or about 3 times a month. This will give you a total of about **\$90** a month.

Threshold Payment of \$50 (*you need at least \$50 to redeem for cash*)

\$1.50 (*avg. pay per survey*) x **2** (*qualified surveys a day*) = **\$3** (*a day*)

\$50 (*threshold amount*) divided by **\$3** (*survey payment per day*) = **17** (*days to reach threshold*)

31 (*days in a month*) divided by **17** (*days to reach threshold*)= about **2 times** of redeemable payments per month.

You will likely "cash out" or redeem your \$50, every 20 days or about 2 times a month. This will give you a total of about **\$100** a month.

One other thing I forgot to mention is that they're a few paid survey panels which actually requires lesser to **NO** thresholds at all for you to redeem for cash. In the next chapter, I will show you in detail a list of which ones you need to check out!

Payment Per Survey

Every individual paid survey taken has a value in money and if qualified you'll receive it after completion. This value can usually range greatly anywhere from \$.25 to \$50 a survey. To my experience, it averages about \$1 to \$5 a survey but at times you can find some a lot lower and higher. Many high paid surveys are done in lengthy case studies, which you must complete over a set time period for you to get paid.

The payment per survey will play an important part in not only how much you'll make but if its wise to even take it in the first place. You don't want to waste all of your time on a survey that pays very little money. Sometimes you may come across a survey that only pays \$.35 for about 25 min. This is quite low compared to many others that would pay you around \$2-3 for the same amount of time given.

Just remember if a survey that pays you less, it doesn't mean that your chances of qualifying for it would be higher. To get qualified for more surveys, you must thoroughly complete your profile information in the survey account. This will give you more frequent surveys but if the surveys are low in payment amounts, then you can make it up in the higher frequency. For example, some sites would send you up to 15-20 surveys a day and you might only qualify for 5-6 of those with different payments per survey.

In the example below, you can see how low payment amounts could be made up in high frequency. This is based on 5 and 6 qualified surveys a day at various low amounts under a \$1.00.

Example:

\$.25 (payment per survey) x **5** (surveys) = **\$1.25** (day)

\$.35 (payment per survey) x **5** (surveys) = **\$1.75** (day)

\$.50 (*payment per survey*) x **6** (*surveys*) = **\$3.00** (*day*)

\$.70 (*payment per survey*) x **6** (*surveys*) = **\$4.20** (*day*)

Again, you must fully complete your profile to receive a higher amount of surveys. As a result, the money from with frequency would make up for the lack of lower paying surveys in the day. In later chapters, I will go into detail with my list of which survey panels that pay the most per survey. I will also talk about the different GPT or "Get Paid To" sites, which falls under the many ways to make more money with low payments.

Payment Processing

Payment processing deals with both how you will be paid (*Paypal or check*) and long it takes to be paid after cashing out. This has to be the most important since everything else can seem to be going fine, until you find out it takes 2-4 weeks to get your money after cashing out. Sometimes this can be understood if you have a higher threshold for example, a \$30-50 cash out could take up to 2 weeks or so to have the money in your account. Having a low threshold with long payment processing is what you need to avoid if you want to be paid quickly.

Survey panels that pays out cash usually do it with Paypal or another online payment site, but some of them still choose the old way with sending checks. This is totally up to you how you want to be paid, but for me I love having my money delivered as quickly as possible. Checks can sometimes take up to a month for processing before it's mailed out. Not to mention, it'll probably take you a month just to redeem for a cash out.

If you want to cash out for a \$25 check, waiting up to 2-4 weeks to get it can be a real pain. Paypal is faster but some panels would still wait a few days, after you have already redeem for a cash out. This is an important situation since for whatever unknown reason that my arise, you would want have to quick access to your funds immediately. Choosing the wrong panels with long payment processing could have you taking surveys and not getting paid until literally the following month after redeeming for it.

However, the good news is they're survey panels that will pay you instantly after redeeming for cash. This is also in the form of Paypal and it comes no later than 24 hours. I have paid many bills with a number of survey panels, as it was in my Paypal account within minutes after cashing out. This combination of low thresholds and instant payments, makes it the fastest way to earn a supplemental income taking surveys.

In the next chapter, I will give you my top dedicated list of paid survey panels. Again, I will explain each one in greater detail by applying it with the payment trio. Afterwards, hopefully you can get a more clearer understanding of why you should join them.

See you in the next chapter!

Chapter Four

Top List of Survey Panels That Pays Money!

The following list of free to join, top paid survey panels I present here are handpicked by me. I've failed at many others, especially with time being wasted but these are my best performing panels so far. Hopefully this list will grow and more possibilities for income could come from it. I will discuss the pros and cons of each, so you can be aware of this beforehand in helping you make your ultimate decision.

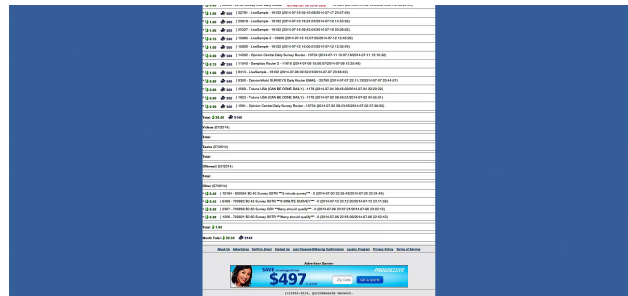

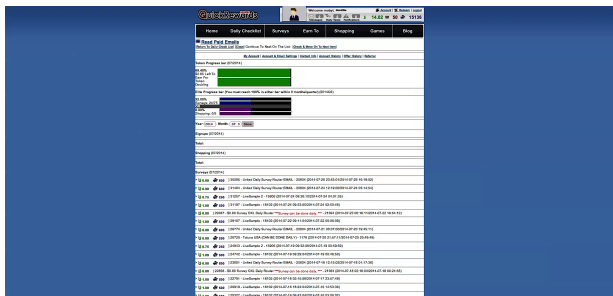

Also, I've taken cropped screenshots of my actual proofs of earnings and posted here from the surveys I've done. This is just to let you see how legitimate it is and to hopefully give some confidence.

You are more than welcome to proceed at any point by joining. Just click on the links in the list below to get started!

1. Quick Rewards

Join Now at: www.quickrewards.net

Quick Rewards Earnings

Quick Rewards has to be one of the best paid panels online. The main reason I list this one at no. 1 is because it has no payment threshold, which means in this case you can redeem for a cash out at anytime. You may also choose to redeem for gift cards as well. This site isn't just a survey panel, but it also offers other ways to get paid. It's considered a "GPT" or "Get Paid To" site that pays you to take surveys, watch videos, click on ads, shopping, games, emails, perform micro jobs and etc. While GPT sites do offer other ways to make money, taking surveys will almost always pay you a lot more than the other things.

Quick Rewards will send you up to 20-25 surveys a day for about \$.60-\$1.00 a piece. From my experience, I usually qualify for about 5-6 of them daily with a total payment of between \$3-6 a day. You can make around **\$140-150** a month just on this site alone if you do around 5-6 surveys a day. The average duration on each survey is around 15-20 minutes, so this would only amount to about 1.5 to 2 hours daily.

Quick Rewards also has one of the best referral programs which you can earn even more money on autopilot. You can earn up to 5% of what your referrals make "every time" they complete a survey or anything else on the site. This can add up to hundreds or even thousands of dollars monthly by itself, if you can manage to sign up a lot of people. And of course, you may too redeem this money daily and cash it out to your Paypal within 72 hours. Sweet isn't it?

Lastly, in any given month, you must **NOT** allow your account to become inactive. They call it a "monthly database clearing" or a maintenance routine, performed by deleting inactive members to free up it's system. If this happens to you, just know that they will not only delete your account, but both the earnings and referrals you've occurred will be gone too. So please be mindful of this, especially if you have a nice sum of money laying around in there!

Pros:

- Free to Join!
- Minors under 18 may join with Parental Permission
- No Payment Thresholds
- Frequent Daily Surveys
- Lower Disqualifications for Each Survey Attempts

200 points is \$20 etc. They also feature both a higher payment per survey and a low payment threshold, which is one of the fastest ways to redeem for cash.

You only need 100 points or \$10 to redeem for Paypal. It usually takes me about 5 days to cash out from this site as the points per survey averages around 15-35 points a piece. This is the equivalent of \$1.50-3.50 a survey, so you see that it doesn't take too long to redeem your points for a Paypal cash out. I usually qualify for about 1-2 surveys a day, which is around \$3 everyday. This makes me at least \$50 a month from Opinion Outpost alone.

Opinion Outpost has a very fast payment processing which pays you instantly when you redeem for a cash out. Immediately after redeeming, you'll get an email stating your payment is now in your Paypal account. The other thing I like is that you can always go on the site and take surveys, versus having to wait for an email invitation. I'm sure you'll find this survey panel a promising and easy way to add funds to your bank account each month!

Lastly, there's a referral program that pays you a \$1 every time a person you refer, takes a survey. They will pay you a max. of \$5 per referral!

Pros:

- Free to Join!
- Earn Points When You Complete Your Profile Survey
- Instant Payment Processing
- Higher Payment Per Surveys
- Low Payment Threshold
- Points Don't Expire
- Good Referral Program
- Great Gift Card Offers
- \$10,000 Sweepstakes Entry Every Quarter

Cons:

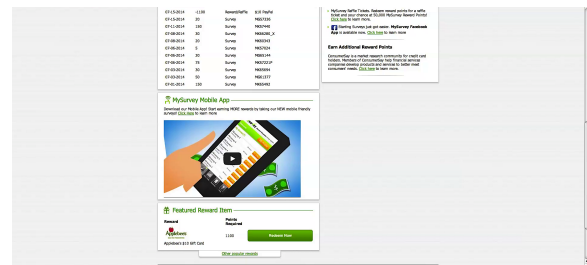

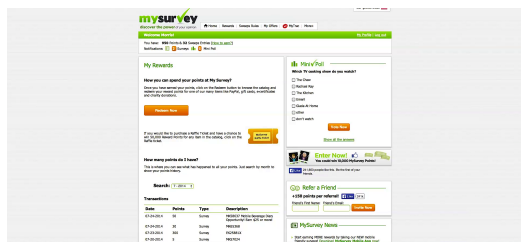

- Only Allowed for Members in U.S.
- Have to be at least 18 years of age (*no minors*)
- No Mobile Apps Included

- Only Paypal is accepted for payments

3. MySurvey

Join Now at: www.mysurvey.com

MySurvey Earnings

For many years, MySurvey has been one of the best and trusted paid survey panels online. Actually they were the very first panel I signed onto when I began taking surveys. The site has many great qualities of how you'll take surveys and a huge rewards section to choose from, when you're ready to redeem. They also use a point system, which you may redeem into Paypal cash payments and other rewards.

MySurvey features a low payment threshold, which you must have at least 1100 points to redeem for a Paypal payment, or \$10. A 1,100 points may sound huge but an average survey rewards you 150 points, so it won't take you too long to redeem this for \$10. They're also very generous in providing you with a huge

supply of surveys to take with a low disqualification rate. Each survey averages 15-30 minutes and I usually take a one every two days, which comes to around \$40-\$50 a month.

MySurvey also features a mobile app for both iPhone and Android, or any tablet to take surveys on the go. This is cool since you can make money just about anywhere you want in your free time. MySurvey is one the few panels to include, "cam survey" which they would use your eyes and facial detection to get physical responses from survey questions, using a web cam. I've never tried it yet and I'm not sure if I want to be seen by anyone I don't personally know keeping video data on me. Sorry...

Payment processing is not instant but you will receive it into your Paypal within 2-3 days after redeeming. The panel is only open to U.S. citizens and teens can also join at age 16, but need consent from parents or legal guardian. If you become inactive after signing up, they will send you emails reminding you about your account inactivity. If you don't respond within 2 weeks, they will deactivate your account and all points remaining will be forfeited.

Finally, you can earn 150 points every time you refer your friends or anyone with an email address to sign up. This 150 points would be the equivalent of \$1.40 or so, but it could be an extra boost to your current points at anytime!

Pros:

- Free to Join!
- Great Payment Per Survey Points
- Low Payment Threshold
- Lower Screen Outs for Each Survey Attempts
- Mobile App for iPhone Android and Tablets
- Webcam Surveys
- Teens at Age 16 can Participate
- Huge Rewards Store
- Automatic Sweepstakes Entries for Every Survey Attempted or Completed (*qualified or not*)
- Good Email Referral Bonus

Inbox Dollars allows anyone from around the world to sign up and make money, as it is an international paid survey panel. I believe members outside of the U.S. receive a check instead and you have to be at least 18 years old to join. The site also includes a mobile app for both iPhone & Android, so you can make money on the go anywhere at anytime. If you're a mom, dad or anyone who needs the extra money every month, this is a go to for anyone around the world!

Payment threshold is \$30 and your options will be either a Visa cash card or check. The convenience of having the Visa card is that, it can be reloaded with cash every time you reach the threshold. I find that the surveys are a bit longer for the payment, which averages around 25-30 minutes per survey. You will receive about \$.75 a survey and the screen out rate isn't that bad either. I've made money from other things on here to boost my way up, so surveys are just one of the few.

Inbox Dollars will place you in their Gold Membership, after reaching the threshold payment of \$30. This membership has exclusive privileges such as, receiving faster payments, more referral rewards, double sweepstakes entries, double search loyalty rewards and exclusive monthly offers. Requests to redeem Cash and send payments are processed on the first Wednesday that occurs at least 8 days after the payment was requested. This means payment requests will be processed between 10 and 16 days after request.

Inbox Dollars also has a neat referral program where you can earn 10% of what your referrals earn. This can give you even more income in a passive way, in addition to the money you'll receive on the site. There's so many other things to be mentioned, but all you have to do is go see for yourself how awesome of a site it is!

Pros:

- Free to Join!
- A \$5 Sign Up Bonus When You Join and Confirm Through Email
- Endless Ways to Make Money
- International Members Can Join
- More Than One Choice of How to be Paid
- Mobile Apps for iPhone & Android
- Great Referral Program
- Receive More Privileges with their Gold Membership

Cons:

- Have to Be at Least 18 Years Old to Join
- Payment Threshold is \$30
- Payment Processing isn't Instant
- Check Payments Can Take Longer than Usual to Receive

5. Crowdology

Join Now at: www.crowdologyusa.com

The screenshot shows the Crowdology USA dashboard. At the top, there is a navigation menu with links for Home, About US, Research, Refer a Friend, FAQ, and Contact US. The main content area is divided into several sections:

- YOUR BALANCE:** Shows a balance of \$11.63. Below this, there is a table of recent activity.
- RECENT ACTIVITY:** A table with columns for Date, Description, and Amount.
- Refer a Friend:** A section with a heading and a description of the referral program.
- Communities & Surveys:** A section with a heading and a description of the survey process.

Date	Description	Amount
Jul 09 2014	Survey Reward	\$3.00
Jul 09 2014	Survey Reward	\$3.00
Jul 09 2014	Survey Reward	\$3.00
Jul 09 2014	Survey Reward	\$3.00
Jul 09 2014	Survey Reward	\$3.00

Crowdology Earnings

Crowdology is an email invitation only panel, which sends you a survey every 2-3 days. Payments per survey ranges between \$.40-10.00+ a piece and they also have a low payment threshold at \$8. When you cash out to Paypal, the money will be in your account within 48 hours. I recently joined the site and within a few weeks I've already cashed out twice.

The panel's main dashboard has a very simple design which is straight to the point, with no other fancy rewards to earn. Their surveys have a very low screen out rate, which you will enjoy compared to other email only invitations. I have to

say that their surveys seem a bit more relevant to me and I actually don't mind taking them. On average you would make around \$30-40 a month, so its rather minimum but one of the easiest ways to earn it.

Pros:

- Free to Join!
- Payment When Complete Your Profile Survey
- Great Payments Per Survey
- Low Payment Threshold
- Lower Screen Outs for Each Survey Attempts

Cons:

- U.S. and U.K. Citizens Only
- Must be 18 years old (*no minors*)
- Email Invitation Only (*you must wait to receive a survey*)
- No Referral Program
- No Mobile Apps
- No Other Choice of Rewards

6. Get Paid

Join Now at: www.get-paid.com

Get-Paid is another amazing "GPT" panel, filled with a huge list of ways to earn money and does an awesome job in keeping you involved to earn it. I just recently signed up and already like what I see. Like most paid panels that pay in points or dollars, this panel pays you in coins which you can redeem for cash and many other rewards. You'll instantly earn coins as a bonus after signing up and the earliest you can cash out is at \$.50. Less than a week after joining, I've

cashed out to Paypal at a \$1.20, so this site has to be one of the best at not keeping you waiting to get your money!

Get-Paid gives you multiple choices to receive your funds through: PayPal, Payza, Web Money and Perfect Money. They also feature a level system, which can earn you many perks when you advance through the site. This includes experience points (XP), receiving higher earnings, unlocking certain features, receiving faster payments etc. The amount of coins per surveys averages 300-500 and it is carefully reviewed by them for consistency. After redeeming your earned coins for cash, it only takes between 1-2 days to receive it in your account.

They also feature a 2nd tier referral program, where you can earn 30% from both direct referrals and their referrals. This alone is worth gold for you, since you will also earn this for as long as the referral is an active member(s). There's a monthly contest which involves the top 10 users who earns the most will receive a prize of \$50. Get-Paid is an international panel, so anyone around the world can sign up.

You have to be at least 16 years old to join. I definitely recommend this site to anyone who wants to earn extra money and have fun doing it!

Pros:

- Free to Join!
- Low Payment Thresholds
- Endless Ways to Earn Cash with Surveys, Cash Tasks, Paid Offers, Watching Videos, Phone Calls, Web Surfing, Games and Many More!
- Gives You the Control and Ability to Advance in Earning More Money
- Awesome Referral Program
- International Members Can Join

- Quick Payment Processing
- Multiple Choices to Receive Your Money Through: PayPal, Payza, Webmoney and Perfect Money
- Plenty Other Rewards to Choose From

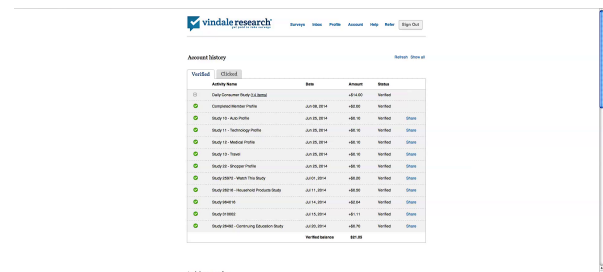

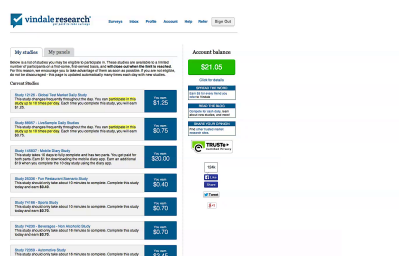

Cons:

- No Mobile Apps
- Survey Reviews Can Take a Bit Longer After Completion

7. Vindale

Join Now at: www.vindale.com

Vindale Earnings

Vindale Research is one of the oldest and trusted paid online survey panels around. They are considered a leader in market research and really does a great

job offering a higher payment per surveys. After you have joined and reached the main page, you'll love how they provide you with a long profitable list of surveys with its payments and time limit next to it. This makes it easier to manually choose beforehand which pays you the most, and if its too long or short in time duration. In addition to this, they also send email invites.

Vindale pays on average anywhere from \$.40-\$45 a survey. Making \$45 isn't the norm but it can be earned through participating in trial studies. I earn on average \$1.50-\$3 a survey and takes me around 15-25 minutes each time to complete. The cash out threshold is set at \$50, which is a bit higher than most paid panels and they process payments on the 15th and 30th of the month. Payments are done with Paypal, which takes a few days and paper checks which can take up to 2 weeks.

Vindale may have a higher cash out threshold, but I assure you that you can reach this before the month has ended. I'd recently signed up and in a little over 2 weeks have already made \$23. Countries that are accepted includes: United States, United Kingdom, Canada and Australia and the age limit is 18 years old. They also have a great affiliate program which credits you \$5 for every referral you send, who completes at least one survey.

I'm currently enjoying Vindale as one of my favs and since its been a loyal panel for many years, I hold them in a higher regard. Hope you find this panel lucrative for you and enjoy your time making money here!

Pros:

- Free to Join!
- Reliability and Reputable
- Ability to Choose Surveys You Want to Take on its Site

- Higher than Average Payments Per Survey
- Ability to Participate in Trial Studies to Earn Even More Money
- Payments are Issued with Paypal or Paper Check
- Great Affiliate Program

Cons:

- Higher Payment Threshold
- Residents in Countries other than U.S. UK Australia and Canada aren't allowed
- No Mobile Apps
- No Minors Can Join

8. Rewards-Spot

Join Now at: www.rewards-spot.com

Rewards-Spot is another nice GPT site, I recently signed onto. Like any other "Get Paid To" site, Rewards-Spot has a more extensive list of ways to earn money from their panel. After signing up and clicking the earn tab on the main page, you will find up to 14 different ways to make money. So far, I've only tried the surveys, but eager to play around with the others very soon.

Two of the main reasons I joined, was because of it's very low cash out of only \$2 and the diverse ways to make money. The time to take surveys are just like other panels and so as the payments per survey. They use a point system to reward you and each point represents \$.01. You need 200 points to redeem a Paypal payment of \$2.00. On average, every survey or any other offer you complete will be 30-100 points or \$.30-\$1 a piece.

Payments are issued in Paypal, paper checks and gift cards. For Paypal payments, the first 5 cash outs are sent manually. Afterwards, you may receive the money instantly into your Paypal account within seconds to minutes. Paper checks are sent out every weekend but depending on where you live, it can vary in time to receive it. Gift cards are available for Amazon, Walmart, Target and Ebay. Amazon and Ebay gift cards in different amounts are available by using your points, which you can convert cash into points, for cashing out gift cards as well.

Rewards-Spot has a chatbox feature which offers members help 24/7, in asking questions to the admin and moderators. You need to be at least 18 years old and a resident of the U.S. to be a member here. Rewards-Spots also has a great referral program, which pays you 5% of whatever the referral earns. You can also send out email invites to your friends or family, to earn commissions whenever they complete offers. As always, you may sign on as many people as you want, so you can greatly increase your earnings.

Pros:

- Free to Join!
- Low Payment Threshold
- Huge Selection of Paid Offers
- Instant PayPal Payments
- Multiple Payment Options (Paypal, Checks and Gift Cards)
- Great Referral Program

Cons:

- Only U.S. Residents Can Join
- No Minors
- No Mobile Apps

Toluna Earnings

Toluna is a 2 million membership, worldwide online paid panel that has offices in Dallas, TX and Paris, France. I recently joined and now receive a ton of fresh surveys daily. You receive points for taking each survey and when you reach 60,000 points or \$20, you may redeem for a Paypal cash out. A survey on average rewards you around 1,500-7,000 points at 15-25 minutes each.

The chance of qualifying for each survey is a bit lower, but the points are high enough to make up for it. The payment threshold is a bit higher for this one, so you may not make over \$50 in a month. Toluna features a test product section, where you may sign up to test a product in exchange for feedback. Once you've signed up, you will be added to a randomized list and if selected, you will receive the product in the mail.

Toluna is unique in other ways too, as it contains a mini social media system built inside it. You will find people there creating topics for other members to chime in on, including adding videos and photos. The panel includes mobile apps for both iPhone and Android devices, so you may take surveys on the go. They also have this thing called "gifties" where you can redeem points for virtual gifts to become real, and email them to whoever.

Toluna has more ways to pay you with checks, bank transfers and Paypal. A check will take them up to 8 weeks for delivery, so if you don't want to wait that long, get yourself a Paypal or bank account. However, having more than one way to get paid is always a great thing, since you never know what issues may come up later. They also feature an extensive rewards center to redeem for many other prizes and credits you with 500 points, for every person you send after they complete their registration.

Pros:

- Free to Join!
- International Members Can Join
- Great Payment Per Survey Points
- Mobile App for iPhone Android and Tablets
- Monthly Drawing of \$2,500
- Huge Rewards Store
- Social Media Atmosphere to Connect you with Other Members
- Multiple Ways to get Receive Payments

Cons:

- Payment Thresholds are a bit higher
- Higher Screen Out Rates

10. Clixsense

Join Now at: www.clixsense.com

Clixsense is one of the oldest and largest international advertisement sites online. With 4 million members and operating for 14 years to date, they're known for both being an advertisement for webmasters and "GPT" site for publishers. I signed up not long ago and its pretty huge getting around to see the many things they have to offer. I will try to be brief here about the features but this is an awesome money maker. They have everything a "gpt" site has including, 7 different offers, paid surveys, paid website visits, paid to click, paid tasks, games, paid listening to radio and more!

You have to be at least 16 years of age to sign up, so teens can also enjoy this site to make some extra money. Surveys take the usual time to complete, which is 15-25 minutes. They offer plenty surveys listed on its offers page, where you can manually pick for yourself of which ones you want to take. Just like Vindale, you will see next to each survey the payment and time duration before you decide to click. The average pay per survey ranges between \$.50-5 which seems to be the norm for most "get paid to" sites.

Clixsense has two different accounts. You will be in the standard account after signing up but you may upgrade to the premium account later. Premium accounts have more benefits including: more guaranteed daily ads, clixgrid chances, lower minimum cashouts, better tasks, offers, and sales commissions on everything you're involved on the site. However, the premium account has a cost of \$17 a year but the standard is free. I personally will just stick with the standard account, since I see it justifiable instead to only spend money here as an advertiser.

Clixsense has a very low minimum payment threshold, which is \$8.00 for standard members or \$6.00 for premium. Payments are processed twice a week on Monday and Friday afternoons. You have the options to receive Paypal, Paytoo, International Check, or U.S. check in the mail for your payment. They also have a great tiered referral program, which you're credited 5-10% of everything the referral makes.

Pros:

- Free to Join!
- Reliability and Reputable
- Teens at Age 16 Can Sign Up
- Very Low Minimum Cashout Thresholds
- International Members Can Sign Up
- Endless Ways to Earn Cash
- Ability to Choose Surveys You Want to Take on its Site
- Choice to Upgrade for Making More Money
- Multiple Payment Options (Paypal, Paytoo, International Checks and Checks)
- Great Referral Program

Cons:

- No Mobile App
- Premium Account Cost \$17 a Year to Upgrade

Chapter Five

How to Increase Your Chances of Receiving More Surveys

You can greatly increase your chances of receiving more surveys, if you complete the profile section in the panel after registering. Some people would only sign up and never even notice there's a profile section in the panel to complete. When you completely fill out your profile information, it will give the panel more specific information about yourself to better match surveys to you. Not only it will increase your chances but some panels will actually credit you more points or money, just for doing this!

Next time after signing up to a survey panel, please remember this tip as they sometimes advise you to do this.

Another way you can increase your chances is to be completely honest and consistent. By this I mean, don't lie when you complete surveys, since this will conflict with what you've told in the profile about yourself. Many times they will not tell you about this but it will show up later, as you will notice less surveys being sent to your email. If you read in the terms and conditions portion, it will sometimes be mentioned with among other things.

If you've noticed any changes or expect something like this, just update your profile and try to stay consistent with each survey. You can also write it down on a text document to keep for later.

Check to confirm, both your email and spam folders immediately after signing up. It is important to remember that if you are signed up to many panels, you need to already have a separate email account(s) just for surveys. This will better help you find survey invites and other related things, since you will receive a ton of emails from all of them. Sometimes when a survey invite isn't found in an email, it is usually placed into a spam folder.

Lastly, you need to continue being active as a member on the panel. This doesn't have to be every single day but if you don't take at least one survey a week, you

will later find less of them to come by. Some panels will actually delete your account, if you are not active in a certain time frame. Just be sure to read the terms and conditions about this in the link on each panel, before signing up.

Chapter Six

Multitasking To Quickly Earn More

Taking just one survey at a time can be very time consuming, especially if you're signed to a lot of panels. If your goal is to make a certain amount of money such as \$250 or \$500 a month, then you should factor in how many you need to do before reaching this amount. One of the methods I use in taking more surveys in a day is opening about 5 different tabs in the browser. You can use just about any browser but for me Firefox works the best.

First you need to decide which survey panels you want to take all at once. You can use the list I presented in the earlier chapter, or you can use your own to pick out the best performing panels. Open how many tabs you want in the browser and choose a survey panel for each tab. The amount you want to do is totally up to you. Now with each survey panel in the tabs opened, you may begin.

In detail below, you can see all the survey panels opened in each tab inside the browser. I advice you to start with at least three at a time, so you won't overwhelm yourself with too many if you can't handle it.

As you see, doing three different surveys at a time should take up to 25-35 minutes. If you did this one at a time throughout the day, it would take you about three times to finish all of them. Multitasking surveys is very important if you have a busy schedule and want to get other things done, at a specific time in your day. If you did 5 surveys from different panels all at once everyday, this would bring you around \$10-12 a day.

When multitasking just about anything, you're leveraging to do more in less time. The example I gave can work with as many survey panels you want to do. I usually do up to ten at a time and come out making an average \$15-20 a day. Just remember when taking each survey, you will usually encounter screen outs "disqualifications" but don't let this bother you, as in general it is a normal process of taking them.

You will eventually qualify for all panels at once, so just be patient!

Chapter Seven

Using Your Mobile Devices to Earn On the Go

Today, we know that a smartphone, tablet or any other mobile device can be used for just about anything. Most people don't even realize there's money sitting right in the palm of their hand, every time they whip out that iPhone or Android. I read plenty articles about the money making apps and how people are not aware, which is telling to how distracted most of us are in this age. To me, no amount of money is too small and its a shame that there's a world out there, missing out on very simple ways to earn it...

One of the ways people are missing out on easy money, is taking paid surveys on their smartphones. More and more survey panels are including apps, so you can take on both smartphones and tablet devices. These apps usually come free and once downloaded onto your device, it acts just like a mobile cash machine on the go. Once you have a Paypal account established, your money will go directly into your account.

This can be perfect for any teen who wants to make some extra cash, since they use their devices all the time anyway. When I'm on the go, I mainly use the inbox dollars app since it has many other ways to earn. Using survey apps are also great when you're traveling, like in an airport. Why not pull out the phone or tablet and make yourself a quick \$2-3 while waiting for your next flight!

Here's just a few paid mobile survey panels, where you can start from.

[Inbox Dollars](#)

[Toluna](#)

[MySurvey](#)

Some panels will allow you to take surveys on your mobile devices, despite not having an app for it. However the screen may not format correctly when you try to open it. I've done this with Opinion Outpost many times and was able to

complete surveys without an app for it. I would advice to keep checking your panel's main page to see if there's an update for an app.

Chapter Eight

Using Referral Programs to Earn Even More On Autopilot

As some may already know, referral programs are an excellent way to make more money without having to work too hard. Each time you refer someone to a website, whether they have to pay or join for free, you are helping that site both in membership and income. In return they will give you a credit for your much needed help and it usually comes in the form of money. Many people online make a living just at only using referral or affiliate programs, since it can be a great source of passive income.

Survey panels uses different types of referral methods, to help you get referrals to signed up. They are email invitations, links and banners. You can use an email invitation to send out to friends and family or whoever is interest of joining up. Links are very versatile and can be used in blogs, websites, forums, social media or anything else where you want someone to click. And banners are the usual static or flashing signs you see on websites, which advertises whatever you want people to click on.

Now just to be clear for those who are unaware, whenever a site pays you for any person you sign up, it doesn't mean that money will be taken from the person you referred but instead paid from the website to you. Your referrals will never see missing money from their accounts, on the behalf of you signing them up. Many sites will credit you this money in various ways, such as a percentage or one time payment. An awesome thing is that survey panels are usually the easiest to recruit referrals, since mostly all of them are free to join.

This is a total win win for all parties involved. The examples below gives you an idea of how it works.

You:

You are the person who will send the referrals to the survey panel and earn yourself a credit (sign up bonus or percentage of whatever referral makes).

Referral:

The referral signs up for free and begins making money with surveys and his or her own referrals.

Survey Panel:

You are sending the survey panel fresh new members for the advertisers to survey. Advertisers pay the panels more for fresh leads. This extra payment makes it to us as a referral credit and so survey panels will earn money every time we make money!

All of this money is actually trickled down from corporation advertisers, who places surveys on the panel. These advertisers have very deep pockets and spend billions of dollars on market research each year. This is how much your valuable opinion counts to them, in using it to better their products for you, and to knock out stiff competition. Paying you to take a survey is one thing but giving more to bring others in on board for free is very generous indeed!

Different Types of Referral Payments

You will notice that every survey panel pays a different referral payment. They are either paid as a one time payment or a percentage of everything the referral makes. Some panels even feature a 2nd tier system, where you can get paid from people who've signed up under the very first person you referred. If you want to make money for the long term, it is very important to know in the beginning of which panels offer the best referral programs to sign up under.

I explain in detail below the two different types of referral payments you will receive and how much you can possibly make.

One Time Payment

Scenario 1:

Ex. You will receive a \$5 credit for every referral you send us who completes at least one survey.

\$5 (credit) x 50 referrals a week = \$250 or \$ 1,000 monthly
\$5 (credit) x 100 referrals a week = \$500 or \$2,000 monthly
\$5 (credit) x 150 referrals a week = \$750 or \$3,000 monthly
\$5 (credit) x 200 referrals a week = \$1,000 or \$4,000 monthly

Now this is just one realistic example from the survey panel, Vindale Research. Getting these amounts of people to sign up above may seem over exaggerated but its really possible as I will explain in a minute.

Percentages

Scenario 2:

Ex. In this 2nd tier program, you will receive 20% of whatever your referral gets and another 10% of whatever their referrals gets, as long as they're active members on the panel.

20% (credit) x \$10 (1st referral's balance) = \$2
10% (credit) x \$10 (2nd referral's balance) = \$1
\$3 (total) for all referrals

50 (referrals) x \$3 (total) = \$150 (as long as member is active)
100 (referrals) x \$3 (total) = \$300 (as long as member is active)
150 (referrals) x \$3 (total) = \$450 (as long as member is active)
200 (referrals) x \$3 (total) = \$600 (as long as member is active)

As you can see that signing up to a survey panel who pays in percentages allows you to earn continuously, as long as the referral is still being active on the panel. This form of payment is sort of more stable and passive, and will less likely make you work as hard to earn money. The thought of receiving payments again and again without needing to sign up more referrals is a wonderful situation financially. To get the best results, you should try both one time payments and percentages referral programs together, as you'll see your income explode!

Its no secret that if you use this concept, it will eventually take you from \$250 a month doing surveys, to \$250 a day at best earning with referrals. But you maybe asking, "How do I even get a referral to sign up, let alone hundreds of them...?"

So How Do I Get a Referral or Referrals?

Many people have struggle with this same question, including me for some time, but it has to be very planned out before you begin. To go from making \$500 a month taking surveys to \$5,000 is very possible, but only if this traffic is coming from thousands of referrals. I will give you a list of both free and paid online/offline methods, to help you get referrals. Just remain patient and never force or bribe anyone to sign up, as this will only make you look like a "Scammer Spammer" lol.

Online Free Traffic:

1. Send a survey email invitation to friends and family, who you believe would be interested. I would first show them some proof that it's working for me, since most people are usually skeptic to new things they haven't tried yet.
2. Join a related group on social media and advertise your offer (not to spam) Finding a "Work at Home" or any other online income niche is a great place to begin.
3. Create a blog with related topic (Blogger or Wordpress) You can give a review on your choice of surveys to take, and produce a lot of traffic to your blog from

social media groups, like Facebook and Twitter.

4. Write posts in related forums with your signature (not to spam), like the hugely popular online marketing board, “Warrior Forum.” You can advertise in the Warrior Forum which has nearly 800,000 members, and many sections for promotion.

5. Use Craigslist.com & Whynotad.com or any other online classified ad site. Post related ads on the topic with your referral links. Just read the rules before doing this.

6. Use sites like Digg, Reddit & StumbleUpon to create links back to your blog or website.

7. Write a free ebook or report and place your links inside for people to click. Then upload them to high traffic free ebooks sites like free-ebooks.net & feedbooks.com

8. Create a youtube video and place your referral link in the description. You can make a video of yourself reviewing a survey, and then showing on camera a screenshot of your real earnings. This should get interested people at least curious enough to click on your referral link in the description.

9. Write an article and with it, place your referral or redirect link on the page. Then submit it to Ezines.com or any other article site.

10. Search for keywords using SEO in Google Keyword Planner, that are both relevant and active enough monthly, so you can rank your blog or website. This will take some time but the results will definitely pay off later on.

Online Paid Traffic:

1. Use PPC (pay per click) advertising to receive highly targeted visitors using

sites like: GoogleAdwords.com, Bidvertiser.com, Advertising.com, Yes you will spend money but the results will be instant, as in a couple of hours after ordering the traffic. If you're on a tighter budget and want to get a higher volume of traffic, then you can use Maxvisits.com or Adf.ly.com

2. Use PPV (pay per view) traffic, such as on Youtube to place your ads on many other videos. Thousands of people across Youtube will see your ad right before the video begins and have a decision to wait or click "skip" once the 5 seconds are up. The key here is to quickly put the most attention grabbing thing in the beginning of your video ad, so that people can see it before clicking the skip button, after the 5 seconds is up.

3. Take more control by using a website, such as Wordpress. You can get very low hosting deals from GoDaddy.com BlueHost.com and Hostgator.com. If you choose Hostgator.com for hosting, you may use the coupon code "**PAIDSURVEY**" in checkout to receive **\$9.94** off any hosting package.

4. Create a solo ad campaign and advertise with Safe-swaps.com or Adcheiver.com. For a fee, you can place your ad in front of other people's related topic of email lists and receive highly targeted visitors.

Offline Traffic

1. Create flyers and post in public high traffic areas, such as community centers, college & high school campuses, convenient stores and libraries. You can also place QR codes on your flyers for mobile users to quickly recruit them, by just scanning the code with their smartphones. Just remember to get proper permission before placing flyers in any private location.

2. Create a bumper sticker from the related topic, with your referral link on it and place it on the back of your vehicle. You may want to buy a domain name and redirect it to your referral link, since the referral link will be very long and clumsy looking. You can easily create bumper stickers in www.zazzle.com.

3. Print up some small pamphlets and place them in public areas such as, college

& high school campuses, convenient stores and libraries etc. This works great if you have more for them to read, as you can section off information into every side of a folded pamphlet.

4. Place ads in your local & national newspaper directories. The largest newspaper advertisement directory in the U.S. is www.nationwideadvertising.com. Here you can place your ad into 21,000 newspapers across America and they have a circulation of 100 million weekly. Ads are priced by the amount of people you choose to advertise to. Putting your ad in front of 100 million eyeballs weekly around America will definitely get you some responses!

5. Hold a seminar in your town or city, dealing with on the topic of online income with surveys. This can be inside a community center, hotel meeting room, school, church, library or any other private/public facility. You could even hire a camera guy to record it, and then upload it on youtube for extra exposure. This could get you plenty referrals in person and online at the same time. Also you can make some money up front by charging attendants a small fee to attend the seminar!

6. Get on public access television and discuss making money with online surveys. You can place your url on the screen or have viewers call in for contact. Public access television can make you a mini star in your local community, as being on television is the top visual exposure you can receive. If you live in a major city, your number of referrals will likely climb the minute after the show goes off. Not to mention the number of re-runs that will air afterwards!

7. Create an ad, and feature it on the radio. This can either be during commercial breaks or being a guest on a talk radio segment. The radio is still a huge market and there's plenty topics on making money online. Just like television, if you live in a major city or even a small city, you can gain plenty referrals during or after the show has ended. Online radio stations are another great avenue to choose as well. Being online you have the luxury to reach foreign countries all at once time, just by broadcasting from your bedroom.

Chapter Nine

What Financial Benefits Moms Can Get from Taking Surveys Online?

Firstly, moms are slightly ahead of the game with surveys but they're new moms who are coming into this venture everyday, seeking extra money. If you're a single, married, separated or not even a mom at all, you can do this to make an extra \$500 - \$1,000 or \$2,000 plus monthly just by signing up now! There's women out there who are in dire financial situations where they need to make ends meet. The thought of getting that second job without anyone caring for the kids at home may seem out of the question for many...

If I'm not mistaken, mothers of all ages make up the large amount of online paid survey takers. This is a testament to everyone else in the world that being a stay at home mom could be the best experience ever! Just think of how many new mothers who would just die for the chance to be at home with their young babies, tending to their every needs. And all the while making money on their own time, in the comfort of their home!

Taking surveys online can also be applied to young mothers who are in college or university. Every year so many moms enter or go back to school needing extra money to support themselves and their small children. You'll see how with just a little time out of your day could change everything you didn't believe were possible. Once you've completed this after the first month, you can then reflect back on everything by then asking, "What are the things I can do now which I couldn't do last month?"

In details below, I provide just a basic example using various amounts of how much money can online surveys would help impact your life as a stay at home mother. Also multitasking is applied here. I will later go into further details on how you can apply this simple yet powerful time saving method to greatly increase your income in less time.

Daily Routine of Online Survey Taking

**Note: As a rule of thumb the number of different survey sites are set at 10, but you may do as many as you like.*

According to how you approach this method, you could have more or less. Also this includes saving up to make larger purchases later on.

(A) **\$1,320** monthly in online surveys.
average payment per survey & referral payments **\$4.44**
10 surveys daily from different sites
total time a day: **1.5 to 2 hours max.**

(B) **\$1,030** monthly in online surveys.
average payment per survey & referral payments **\$3.33**
10 surveys daily from different sites
total time a day: **1.5 to 2 hours max.**

(C) **\$688** monthly in online surveys.
average payment per survey & referral payments **\$2.22**
10 surveys daily from different sites
total time a day: **1.5 to 2 hours max.**

(D) **\$344** monthly in online surveys.
average payment per survey & referral payments **\$1.11**
10 surveys daily from different sites
total time a day: **1.5 to 2 hours max.**

Now after studying this, ask yourself these questions...

Can this extra income add to my full time job?

Should I drop the idea of a part time job at this point?

Could I get more body waxes and tans for the summer?

Can I now save up for that nice apartment for myself because dorm life sucks?

Can I send my daughter to ballet classes like she always wanted? And my son who always wanted to take karate classes so badly?...

Can I put a down payment on that new car I've always wanted?

Can you replace the ramen noodles with just dining out more often?

How about the upcoming new iPhone or iPad... should I now pre-order it?

Should I like more study & party time?

Can I spend a bit more on clothing for myself?

What about filling up my refrigerator with more groceries?

Can I now buy those new pair of shoes for my hard working husband or boyfriend?

How about putting more savings in the bank?

As you can see the list would go on and on...

You would only need to apply this for about 1.5 to 2 hours daily to make this work. The amount for each survey taken would vary but you could always achieve to set your own dollar amount per day.

Like I mentioned before that 10 surveys are just a rule of thumb demonstrated here. You can re-arrange this however you like to make how much you want in any given month. The idea is to let you see how achieving the most in a month from online paid surveys are possible.

How to make time for taking surveys?

I can understand that when you come home from work or school, there's nothing else you'd want to do is sleep. But sometimes you have no time to sleep and your children are your top priority. You'll about to see how you can make time to take surveys, which could be custom fitted into your daily life without draining down your battery to handle other needs.

In detail below I've provided different scenarios of how you can greatly consolidate time by taking up to 10 surveys a day and not completely blowing yourself out. However, in order to achieve nearly \$1,300 a month, it would require at least an extra two hours of your time in a day.

You can combine 10 different surveys together and take them at the same time. It would allow you to start and finish both surveys on about the same time frame by having two tabs or windows opened in your browser. You could always multiply your money in one session doing surveys this way.

Scenario 1: *\$2.50 (avg. survey)*

Morning: \$12.5 (five surveys)

Noon: \$5 (two surveys)

Night: \$7.50 (three surveys)

Total: \$25 (a day) **\$175** (a week) or **\$700** (a month)

Avg. Time for Session: 1.5-2 hrs. (daily)

Scenario 2: *\$2.50 (avg. survey)*

Morning: \$5 (two surveys)

Night: \$20 (eight surveys)

Total: \$25 (a day) **\$175** (a week) or **\$700** (a month)

Avg. Time for Session: 1.5-2 hrs. (daily)

Scenario 3: \$2.50 (*avg. survey*)

Early Morning: \$15 (six surveys)

Noon: \$5 (two surveys)

Night: \$5 (two surveys)

Total: \$25 (a day) **\$175** (a week) or **\$700** (a month)

Avg. Time for Session: 1.5-2 hrs. (daily)

As you know, I personally don't know your lifestyle, but I hope this can shed some light on how it could be accomplished.

This can also be applied to seniors who are nearing retirement, or who have already retired and want to use this as a supplement for their money every month. Many retirement age workers are having to keep working, due to lack of money in their 401K for them to retire on. Some have already retired and needing more income so they go to find work. This usually causes more problems, since their age has now put a restraint on how the boss would hire them to physically endure the new job.

Chapter Ten

What Financial Benefits Dads Can Get from Taking Surveys Online?

For years dads were thought to be the main "bread winners" of the family but sometimes even he needs help in finding new ways to win that bread. As a man myself, we men are many times stubborn and cynical when it comes to trying something new. This new thing could either be going to see a doctor for the first time in 25 years, or just a menial task like simply trying on a new pair of shoes in the mall.

If you're a father who's been looking for that extra income either just to get a few bills paid or supplement your day job earnings, then this section is for you!

Just like in the previous section of moms, I'll provide a detail example so you can get an idea of how much money for you in paid survey taking.

Daily Routine of Online Survey Taking

**Note: As a rule of thumb the number of different survey sites are set at 10, but you may do as many as you like.*

According to how you approach this method, you could have more or less. Also this includes saving up to make larger purchases later on.

(A) **\$1,320** monthly in online surveys.
average payment per survey & referral payments **\$4.44**
10 surveys daily from different sites
total time a day: **1.5 to 2 hours max.**

(B) **\$1,030** monthly in online surveys.
average payment per survey & referral payments **\$3.33**

10 surveys daily from different sites
total time a day: **1.5 to 2 hours max.**

(C) **\$688** monthly in online surveys.
average payment per survey & referral payments **\$2.22**
10 surveys daily from different sites
total time a day: **1.5 to 2 hours max.**

(D) **\$344** monthly in online surveys.
average payment per survey & referral payments **\$1.11**
10 surveys daily from different sites
total time a day: **1.5 to 2 hours max.**

Now after studying this, ask yourself these questions...

Can this extra income add to my full time job?

Should I go and get that audio upgrade for my new pick-up truck?

Could I now plan a surprise for your girlfriend, fiance' or wife with a week long romantic get-away Cruise in the Caribbean?

How about my son who constantly needs every new Xbox & Playstation game that comes out?

Could I get that new riding lawnmower for my dad on Father's Day?

Could I get my mother that solid gold tennis bracelet for Mother's Day instead of just the usual card?

How about replacing that cracked up siding on the house?

Could I get a pair of washer and dryer machines our family always needed?

Could I get the central air unit fixed or replaced?

Should I pay off some of those annoying monthly credit card payments?

How about putting more savings in the bank for that rainy day?

Could I give to charity and plus get deductions at the of the year on my taxes?

As you can see the list would go on and on...

You would only need to apply this for about 1.5 to 2 hours daily to make this work. The amount for each survey taken would vary but you could always achieve to set your own dollar amount per day.

But I'm a Busy Father!

It's true that being the man of the house can mean being the busiest! In detail below I've provided different scenarios of how you can greatly consolidate time by taking up to 10 surveys a day, and not completely blowing yourself out. Like in the earlier session with mom, in order to achieve around \$1,300 a month, it would require at least an extra two hours of your time in a day.

You can combine 10 different surveys together and take them at the same time. It would allow you to start and finish both surveys on about the same time frame by having two tabs or windows opened in your browser. You could always multiply your money in one session doing surveys this way.

Scenario 1: \$2.50 (avg. survey)

Morning: \$12.5 (five surveys)
Noon: \$5 (two surveys)
Night: \$7.50 (three surveys)
Total: \$25 (a day) **\$175** (a week) or **\$700** (a month)
Avg. Time for Session: 1.5-2 hrs. (daily)

Scenario 2: \$2.50 (*avg. survey*)

Morning: \$5 (two surveys)
Night: \$20 (eight surveys)
Total: \$25 (a day) **\$175** (a week) or **\$700** (a month)
Avg. Time for Session: 1.5-2 hrs. (daily)

Scenario 3: \$2.50 (*avg. survey*)

Early Morning: \$15 (six surveys)
Noon: \$5 (two surveys)
Night: \$5 (two surveys)
Total: \$25 (a day) **\$175** (a week) or **\$700** (a month)
Avg. Time for Session: 1.5-2 hrs. (daily)

Like I mentioned before that 10 surveys are just a rule of thumb demonstrated here. You can increase, decrease or re-arrange this however you like to make how much you want in any given month. Don't forget that you can always make additional passive income from a percentage of every referral that has signed up under you. This alone could bring in way more money than taking the surveys itself on autopilot!

For some folks having to do 10 surveys a day sounds like a total waste of time. As you can see there's much time to do many other things in the day when you can consolidate it into small intervals. Each session would take you as much time to do one since its all done at the same time. Having to take 1.5-2 hours out of the day to make \$37 is pretty sweet considering many folks take the same amount of time wasting it on other mundane things.

As a father young or old, this would get you that extra grand or so in your pocket every month. The best part is that it's all on you of how much you want to make by dedicating just your time. I've already done this to challenge myself and it wasn't as difficult as it seemed. However it does take focus and a set goal in mind to reach for it to work. Good luck to all you dads out there!

Chapter Eleven

What Financial Benefits Teens Can Get from Taking Surveys Online?

Money Making Teens

Teens around the world are usually up to doing things like dating on the weekends, riding bikes, going to the malls and sometimes just being delinquents. No matter how we categorize them, we were all teens at one point in our lives, and I'm very sure most of us wanted to have more money in our pockets too! This digital information age we're in could be some of the best times of our lives when it comes to making income outside of a "normal job."

Parents you know how tough it can be once a kid becomes a teenager who wants everything new, but it can cost you more to get it for them. Things are not as cheap for them like when they were a lot younger and sometimes this can cause conflict and confusion. Not to mention the sometimes violent compulsive reactions a teen can have when they don't get those things they want. By the way, please understand that I'm not in the intention to be judgmental of anyone's children.

This information is to only help families see a useful financial alternative and as a parent giving your children the best to take care of themselves. If you're reading this section and you fall into the age category of 13 to 18 years old, then I hope you will find this part motivating. That is motivating enough to get off your butts and make some easy money for yourselves now, so you can possibly have that new car before your high school graduation!

Again, just like in the previous sections of mom & dad, I'll provide a detail example so you can get an idea of how much money for you in paid survey taking as a teen.

Daily Routine of Online Survey Taking

**Note: As a rule of thumb the number of different survey sites are set at 10, but you may do as many as you like.*

According to how you approach this method, you could have more or less. Also this includes saving up to make larger purchases later on.

(A) **\$1,320** monthly in online surveys.
average payment per survey & referral payments **\$4.44**
10 surveys daily from different sites
total time a day: **1.5 to 2 hours max.**

(B) **\$1,030** monthly in online surveys.
average payment per survey & referral payments **\$3.33**
10 surveys daily from different sites
total time a day: **1.5 to 2 hours max.**

(C) **\$688** monthly in online surveys.
average payment per survey & referral payments **\$2.22**
10 surveys daily from different sites
total time a day: **1.5 to 2 hours max.**

(D) **\$344** monthly in online surveys.
average payment per survey & referral payments **\$1.11**
10 surveys daily from different sites
total time a day: **1.5 to 2 hours max.**

Now after studying this, ask yourself these questions...

Can I now get those cute shoes I've been wanting forever?

Can I now get the new 50in 3D HDTV to go with my new Xbox & Playstation consoles? for yourself because dorm life sucks?

Can I now go to every NBA home game with my friends?

Can I get me a pet chihuahua and carry it around everywhere to impress my girlfriends?

Can I buy more apps for my iPhone and iPad?

How about the upcoming new iPhone or iPad... Could you pre-order it now?

Should I choose more tops to go with these pants I've had me eye on in the mall?

Can I now turn that awesome sketch design into a tattoo I've wanted for myself?

Should I choose between an acoustic or electric guitar?

Can I now pick out which car I want for my graduation present this May?

Again, the list goes on and on!

As I said before, you would only need to apply this for about 1.5 to 2 hours daily to make this work. The amount for each survey taken would vary but you could always achieve to set your own dollar amount per day.

I Have Too Much Homework?

There are combinations of how many and what times of the day you can do surveys. If you're a student who juggles weekly afternoon activities and doubt this would work for you, then try to see if you could minimize them into the school week. For example, you could do either two or three surveys at the same

time in a day, which only takes about 15-30 min. It won't be a lot of money but this would add up to about \$2-5 a day.

In detail below are different scenarios of how this can be achieved.

Scenario 1:

\$2.50 (one survey a day) x **5** (school days) = **\$12.50** a school week or **\$50** a month.

If cell phones are allowed at your school during recess, then you can do one survey during that time and make yourself an easy \$2.50. Obviously the downside to this is you won't have much social time on the yard outside, but at least you'll earn a bit of money. Just remember, not too many kids earn money while they're at school on recess!

You can also wait later to do a survey after returning home from school. This can either be directly after you walk inside the door, or after dinner before bed. If you're too tired before bed then you should do it whenever you're energized. After all, one survey would only take about 15-20mins of your time!

Scenario 2:

\$5 (two surveys a day) x **5** (school days) = **\$25** a school week or **\$100** a month.

You can multi-task two different surveys together and take them at the same time. It would allow you to start and finish both surveys on about the same time frame, by having two tabs or windows opened in your browser. You could always double your money in one session doing it this way.

The other option is you can do one while at school on recess and another at home when school is out for the day. You'll collect another \$2.50, giving you a total of \$5 for the day. You should also remember to make additional income on

the side from everyone of your referrals who signs up under you. This alone could bring in way more money than taking the surveys itself on autopilot!

I hope that you see how this can be managed for just about anyone's situation. As I don't personally know how your lifestyle can fit into this but if you can make time, than it will definitely happen for you. While every other teen out there is trying to get a job after school, this is something you could do now to earn some money on your own convenient schedule.

I would also advise you to share this around to your friends on campus if they're interested. Just keep in mind the legal age for teens to sign up with survey panels, as some can be young as 13 years old. You may return to the earlier chapter on the "top list of surveys that pays money" area to find out!

Chapter Twelve

Remaining Consistent to Reach Your Goal(s)!

The final stage of all of this is to keep focus of whatever you started out to achieve. As a family unit, money can be very hard to come by when your working hours aren't adding up and unexpected costs creeps up on you. To make money in anything requires your dedication and efforts, just like on a job. As it's been said before, taking surveys isn't a get rich scheme to get into a multimillion dollar mansion, but it can definitely provide much needed financial relief.

One method in particular which helps me remain consistent, is seeing my progress in a visual form. For instance, I create a survey schedule on my smartphone, laptop and desktop computer. This really helps me stay in rotation, even if I have to write it down on a paper napkin in a cafe. Next, I write down whatever I want to buy or do, at the end of the month. As I complete each survey, I'll mark off the days and add up the money that's been made, so I can visually see how far I'd advanced.

Staying prepared is key and if that trip to Disney World seems too far out of reach, just remember the consequences if you give up too early. When you reach your first cash out, you will say "This works!" and as time goes on, you will see that each panel will begin adding up. The number of referrals you recruit should also help you reach your goals much quicker. This is leverage you can use to control with expansion, since there's an unlimited amount of referrals you can sign up.

You may use whatever helps you stay focus, as everyone's goal is a journey of their own. Having extra money in your pocket every month is always good, especially when you know how to easily get it.

May I ask you to please share this eBook among friends and Family, email facebook, twitter etc.

Thanks for downloading this ebook and I wish you all the best in your future plans!
