## TRUMP, 18 ALLIES INDICTED IN GEORGIA

They're charged with conspiring to overturn 2020 election

It is former president's 4th criminal indictment this year

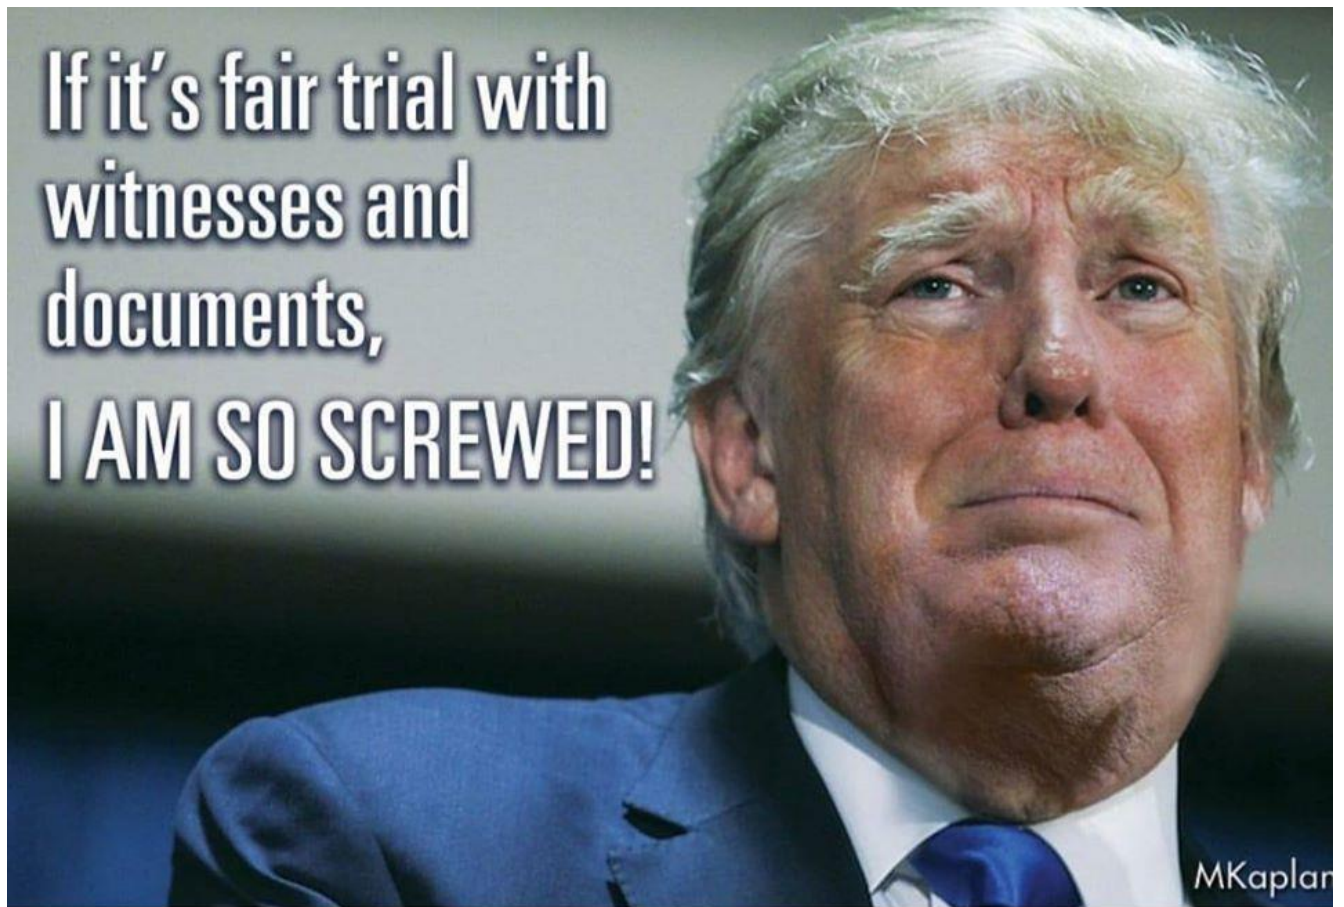

Top row (left to right): Former Trump campaign official Mike Roman, former Trump personal attorney Rudy Giuliani, former chairman of the Georgia Republican Party David Shafer, former elections supervisor for Coffee County Misty Hampton, former Trump campaign attorney Kenneth Chesebro. Second row: Former Trump campaign attorney John Eastman, attorney Jenna Ellis, former President Donald Trump, publicist Trevian Kurti, former White House Chief of Staff Mark Meadows, former director of Black Voices for Trump Harrison Floyd, attorney Sidney Powell, former Department of Justice official Jeffrey Clark, Republican elector Cathy Latham. Bottom row: Atlanta lawyer Ray Smith III, Alpharetta lawyer Bob Cheeley, state Sen. Shawn Stil, Atlanta bail bondsman Scott Hall and Stephen Clifford Lee, a police chaplain from Illinois.

## DONALD TRUMP'S 40 YEARS OF MOB TIES

For the first time the full extent of his criminal connections is revealed, including the murderers, drug dealers, fraudsters, and scam artists, including those with hooks into him in 2016.

Mr. Trump says he's independent, but what about the mobsters above? Are these the 'very best people' he's promised to bring with him to govern?

**We are on the precipice of a major regional war in the Middle East, and the U.S. military is going to be involved. Of course if this war was just limited to a fight between Israel and Hamas, there would be no need for the U.S. military to intervene, because the IDF can handle Hamas quite easily. But Hezbollah is another matter entirely. Hezbollah possesses an extremely powerful military, and they have an arsenal of approximately 130,000 missiles ready to be fired at Israel. **We just witnessed the biggest attack on Israel in 50 years, and as a result the Israeli government has declared war on Hamas. The IDF is already striking strategic targets all over Gaza, but it also appears that a ground invasion could be imminent. Even though I had warned my readers over and over again that a major war could erupt in the region at any moment, I literally thought that someone was trying to share some “fake news” with me. **AS PART OF THE UPCOMING MIDDLE EAST PEACE COVENANT, WILL THE U.S. FORMALLY RECOGNIZE PALESTINIAN STATEHOOD AT THE UNITED NATIONS? 10-2-23 by Michael**

**Will a “peace covenant” soon be announced that will Michael permanently alter world history in a major way? For months, Israel and Saudi Arabia have been quietly negotiating a deal that would normalize relations between the two nations. But they aren’t the only parties involved. Israel and Saudi Arabia both want formal security agreements with the United States as part of any agreement. In other words, if either of those two nations get attacked, the U.S. military would be required to intervene. The Saudis also want to develop a nuclear power program, and they want U.S. assistance with that. But the biggest barrier to a deal was always going to be the Palestinians. The Saudis are insisting that any agreement must include major concessions from both the U.S. and the Israelis. And the Palestinians are publicly making it known that they will not accept any outcome that does not involve formal U.S. recognition of Palestinian statehood at the United Nations. At one time, such a demand would have killed negotiations, but apparently the Biden administration is very open to making such a move. ([Read More...](#))**

### **THE REAL REASON WHY DONALD TRUMP WANTS GEN. MILLEY**

**TO BE KILLED** <https://www.yahoo.com/news/real-reason-why-donald-trump-094501692.html>

“...Donald Trump is continuing to threaten the lives of his **"enemies"** and all others who oppose him. Trump has been doing this publicly and without contrition, pause or any apparent fear of repercussions or negative consequences. His behavior is a function of his depraved character, damaged personality, and diseased mind...Trump's threats of violence and acts of intimidation are so great that the Department of Justice is seeking **a gag order in an attempt to protect** the safety of the jurors, witnesses, and members of law enforcement who will be involved in the ex-president's upcoming criminal trials, as **Salon's Areeba Shah reports**: Threats against law enforcement, judges and elected officials are on the rise as Donald Trump's prosecutions gain momentum, **The New York Times reported** on Monday. FBI agents have raised alarms about harassment and threats targeting their families. These concerns have amplified amid complaints by Trump supporters and many Republicans that the Justice Department has been "weaponized" — a narrative the former president has extensively promoted on social media. "Trump's pattern of lashing out at anyone who opposes him has been dangerously emulated by his supporters,"

**V. James DeSimone, a California civil rights attorney, told Salon. "Now that he is facing four indictments, his most dangerous supporters view law enforcement and our judicial system as the enemy. So the risk is there for increased violence." The FBI has witnessed a substantial surge in threats against its personnel and facilities following the August 2022 search of Mar-a-Lago Trump's Florida residence and private club, according to the Times. This led the agency to establish a dedicated unit to address these threats. One federal official told the Times that threats have increased by more than 300 percent since then, partly because FBI agents' identities and personal information has been spread on social media by Trump supporters. Who is the target of Trump's latest threats of murderous violence? Chairman of the Joint Chiefs, General Mark Milley. Here is what Trump said in a Friday post on his Truth Social disinformation propaganda website: Mark Milley, who led perhaps the most embarrassing moment in American history with his grossly incompetent implementation of the withdrawal from Afghanistan, costing many lives, leaving behind hundreds of American citizens, and handing over BILLIONS of dollars of the finest military equipment ever made, will be leaving the military next week. This will be a time for all citizens of the USA to celebrate!" he continued. "This guy turned out to be a Woke train wreck who, if the Fake News reporting is correct, was actually dealing with China to give them a heads up on the thinking of the President of the United States. This is an act so egregious that, in times gone by, the punishment would have been DEATH! Of course, Trump is lying about these events. SO WHAT IS THE REAL REASON WHY DONALD TRUMP WANTS GEN. MILLEY TO BE KILLED? TRUMP IS ENRAGED THAT GEN. MILLEY ATTEMPTED TO STOP HIS COUP AND OTHER ATTACKS ON DEMOCRACY AND CIVIL SOCIETY. MILLEY, AS A RESPONSIBLE MILITARY OFFICER, PLACES**

## LIVE UPDATES: TRUMP INDICTMENT

## TRUMP'S COMPLETE GEORGIA INDICTMENT, HIGHLIGHTED AND EXPLAINED

The infographic features a central portrait of Donald Trump. Surrounding him are various text elements from the indictment, including the word 'INDICTMENT' in a yellow box, the case number '23SC188947', the court name 'FULTON SUPERIOR COURT', and the signature 'EJIS Madsen'. Below these are several yellow boxes containing key terms: 'TRUMP', 'Counts 1, 5, 9, 11, 13,', 'unlawfully', 'conspired', 'and endeavored to conduct', 'criminal', 'including, but not limited to,', 'false stat', 'and writings,', 'impersonating a public officer,', 'conspiracy to defraud the', 'state,', 'constituted', 'O.C.G.A. §', '1. False Statements', '2. Solicitation', '3. False Electoral College', and 'Harassment and Intimidation'.

## **HERE ARE KEY PARTS OF THE 98-PAGE INDICTMENT AGAINST THE FORMER PRESIDENT AND 18 OF HIS ALLIES FOR EFFORTS TO OVERTURN 2020 ELECTION RESULTS IN THE PEACH STATE**

Trump has been indicted on a total of 91 felonies in two federal cases and two state cases. In New York, he's charged with falsifying business records. In Georgia, he's expected to be arraigned soon in a sprawling racketeering and conspiracy case over an alleged scheme to change the election results in the state. The federal cases are tied to his handling of classified materials and his 2021 coup attempt. Trump has raged at people involved in all four cases, largely [ignoring](#) judges' warnings to curb his inflammatory rhetoric. "IF YOU GO AFTER ME, I'M COMING AFTER YOU!" he wrote in a [Truth Social](#) post earlier this month.

**AND THIS:** *Prosecutors said Wednesday that authorities had [arrested Abigail Jo Shry](#), 43, of Alvin, Texas, for allegedly calling the federal courthouse in Washington, D.C., where U.S. District Judge Tanya Chutkan has chambers. The judge is overseeing [Trump's federal indictment](#) related to his efforts to remain in power, including the events surrounding the Jan. 6, 2021, attack on the U.S. Capitol. According to [court documents](#), Shry left a threatening message on Aug. 5, calling the judge a "stupid slave"*

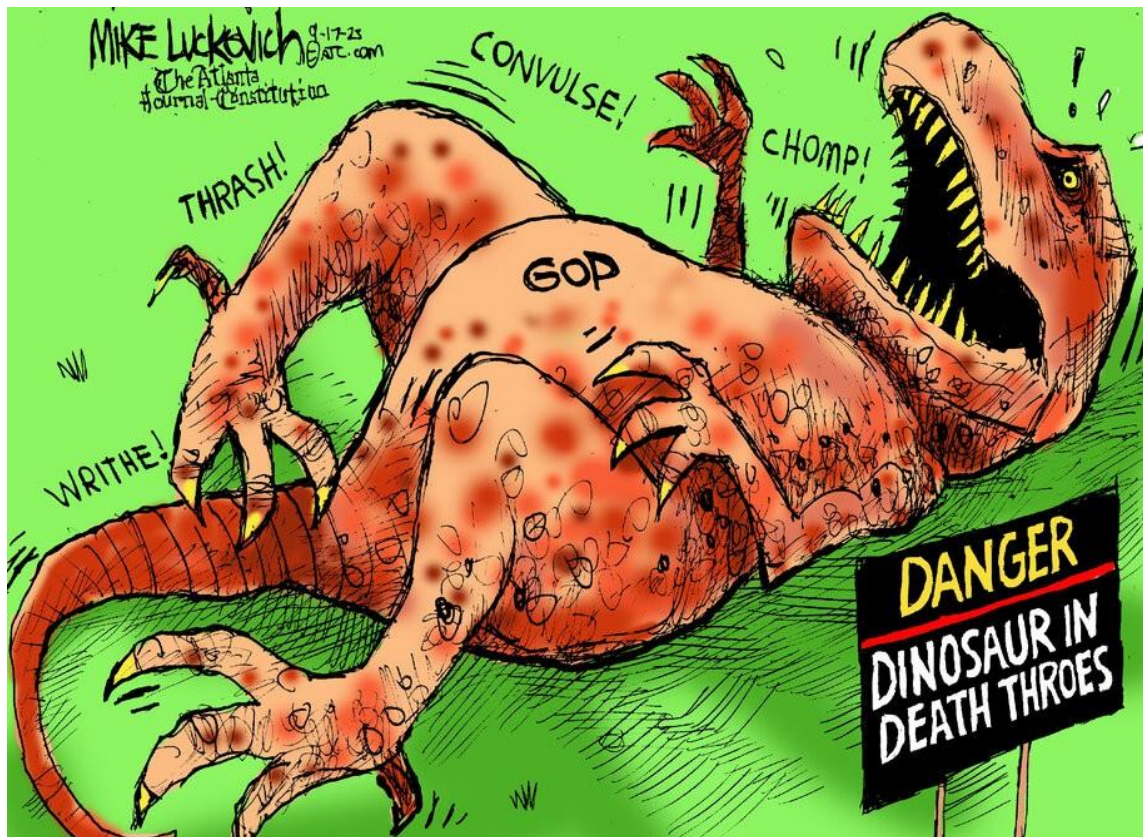

*and saying Chutkan would be “targeted personally, publicly, your family, all of it.” The call was made two days after Trump was arraigned in the Jan. 6 case. “You are in our sights, we want to kill you,” Shry allegedly said in a voice message. “If Trump doesn’t get elected in 2024, we are coming to kill you.” Shry also threatened to kill Rep. Sheila Jackson Lee (D-Texas), who, like Chutkan, is Black.*

## **THE QUESTION TRULY IS: HOW DID TRUMP HAPPEN TO AMERICA?**

**Time to put 'law in america' in its proper perspective. Specifically, much as would be so in an exclusively maximum security prison environment for convicts of the most serious crimes, the notion of laws, rules of law is preposterous. Beyond the propaganda, obfuscation, etc., lies the greatest fraud, certainly of the 20th and 21st centuries; viz., america. Anthropologically speaking, america is unequivocally a total, unmitigated evolutionary disaster. <https://albertpeia.com/peia-v-united-states-et-al.jpg>**

**MSNBC ANOTHER LAWYER FROM TRUMP'S ORBIT SLAMS HER FORMER CLIENT Jenna Ellis originally described Donald Trump as an "idiot." Then she joined his legal team. Now, she has effectively come full circle — and she's not alone. Sept. 19, 2023 By [Steve Benen](#) It might seem like ancient history, but during Donald Trump's 2016 campaign, Jenna Ellis was not a fan. As regular readers might [recall](#), the Republican lawyer [repeatedly](#)**

**described** the then-candidate as an “idiot,” adding that she considered him an “unethical, corrupt, lying, criminal, dirtbag.” Ellis even took aim at Trump’s supporters, saying they didn’t care about “facts or logic.” She later changed her mind. In fact, despite her rhetorical record, Ellis actually joined Trump’s legal team, becoming a rather enthusiastic proponent, not only of her client’s lies about his 2020 defeat, but also of **radical tactics** that would allow the then-president to remain in office despite the election results. Evidently, she’s come full circle. The Daily Beast **reported**: Jenna Ellis, Donald Trump’s former senior legal adviser and current co-defendant in Georgia, has made a dramatic break from the former president, saying she will not support his third bid for the White House based on his inability to ever admit to wrongdoing. “I simply can’t support him for elected office again,” Ellis said during an episode of her show American Family Radio. “Why I have chosen to distance is because of that frankly malignant narcissistic tendency to simply say that he’s never done anything wrong.” **JUDGE: TRUMP COMMITTED FRAUD FOR YEARS!** [ DUH ... **Elite investor Jeremy Grantham blasted bitcoin and issued bleak forecasts for stocks, home prices, and the US economy in a recent interview.**

**HERE ARE GRANTHAM'S 16 BEST QUOTES, LIGHTLY EDITED FOR LENGTH AND CLARITY:**

- 1. "The market suffers from attention deficit disorder, so it always thinks every rally is the beginning of the next great bull market."**
- 2. "If everything works out badly, I would not be amazed if the S&P went to 2,000. That would require a couple of wheels to fall off, and wheels tend to fall off in the great bubbles' unraveling, but it doesn't mean they have to. The S&P would be unlikely not to get to something close to 3,000."**
- 3. "The simple arithmetic suggests you'll either have a dismal return forever, or you'll have a nice bear market and then a normal return. And the nice bear market will be hopefully less than a 50% decline, but it won't be a huge amount less than 50% from the peak in real terms."**

**4. "You increase the pressure on a very complicated system until a few things snap. That is the pattern — something breaks and nobody seems to know what it is. It's always a surprise, but you always have a surprise, so the idea of a surprise is totally unsurprising."**

**5. "My guess is we will have a recession. I don't know whether it will be fairly mild or fairly serious, but it will probably go deep into next year."**

**6. "The most vulnerable area in my opinion is the Russell 2000. It often has no collective earnings at all. It has a very high density of zombies — companies that really can only pay their interest payments by issuing more debt. They're vulnerable on the debt front, vulnerable on the financial front, and vulnerable on a broad economic front."**

**7. "An over 40-year period of driving down mortgage rates, of course you drove up house prices all over the world, pretty much. And now the rates have gone up, of course it will drive down."**

**8. "House prices are worse for the ordinary household. They're worse for the economy than stocks because they're substantially more broadly owned. It's really an important part of the median family's income picture and capital picture. The motto should be, 'Don't mess with housing.' The super motto should be, 'Never have a housing bubble at the same time as you have a stock-market bubble.'"**

**9. "Although we didn't get carried away with ridiculous subprime this time, the multiple of family income actually went higher than it did in 2007. So in terms of actual long-term vulnerability posed by overpricing, this housing market was more overpriced, and it was accompanied by a much more overpriced and classically bubbly stock market than 2007."**

**10. "Don't invest in real estate, don't invest in the US. If you have to invest in the US, quality has been the mispriced asset for 100 years. They outperform in bear markets. They underperform in bull markets, because you want to own Tesla, you want to own meme stocks, you want to own what's flying. You don't want to own Coca-Cola, it's just too boring."**

**11. "When it comes to quality, they have less risk of every kind. They have less debt, they go bankrupt less, they have less volatility, they have a lower beta. Yet they outperform. That is a free lunch."**

**12. "Bitcoin is, of course, an elaborate scam, really."**

**13. "Commodities break your heart because just as they're doing well, they have a wipeout for 18 months, and then they go roaring back to a new high."**

**14. "Artificial intelligence is absolutely for real. Is it big enough, soon enough to stop the deflating? No, I don't think it is. It's a 10-, 20-year, multi-decadal effect going off into the distant future, and it will be potentially vast in its effects."**

**15. "I'm not a great believer in economists. They've lost the plot for the last 70 years. They've forgotten their job description, which is to be useful. They drown in assumptions and closed systems, which are largely irrelevant for everything except their reputation inside their industry."**

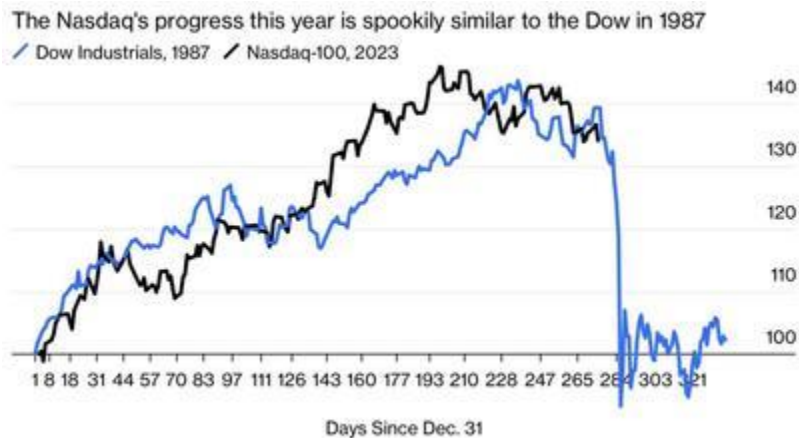

**16. "You should not be surprised if the price of oil doesn't go over \$100 maybe once or twice in the next five years. You should be amazed if the price of oil does not then have a long-term crutch, and it will run down to a level where the Saudis or somebody will be able to grind out \$45 oil into the setting sun. That's how I think the game will end."**

**During the summer, many of the experts repeatedly assured us that the U.S. economy would be able to avoid a recession, but now reality is setting in. Credit conditions continue to tighten, home sales are falling, credit card losses are exploding, stores are closing all over the country, and the number of bankruptcies is rising to very alarming levels. Meanwhile, the cost of living continues to become [more and more suffocating](#). If you have a gut feeling that very hard times are on the horizon, you are definitely not alone. **It would be difficult to overstate the importance of the Military Industrial Complex to our society. It employs millions of people, and it brings in hundreds of billions of dollars each year. The Military Industrial Complex has always been one of the central pillars of our economy, and these days business is booming thanks to the war in Ukraine and the possibility of a war with China. Needless to say, those that run the Military Industrial Complex want the gravy train to continue, and so politicians that are pro-war are showered with campaign contributions. In both major parties, politicians that are pro-war greatly outnumber those that are anti-war, and that is not likely to change any time soon. ([Read More...](#))**

**September 17, 2023 by Michael**

**A lot of the talking heads on television seem to think that the threat of a recession has passed. So exactly why have these talking heads come to such a ridiculous conclusion? Well, they figure that if a recession hasn't started by now we are probably in relatively good shape. In other words, they are speculating instead of conducting a hard analysis of the numbers. And the numbers are clearly telling us that economic conditions are rapidly getting worse. Of course the U.S. economy has been on shaky ground for quite some time. We had a recession in 2020,**

**Legendary investor Jeremy Grantham warned that home prices are doomed to fall amid high mortgage rates.**

**He also called mega-cap tech stocks monopolies, opined on Tesla's Elon Musk, and revealed what ticks him off the most.**

**These are the top 10 quotes from Grantham's new interview with "The Compound and Friends" podcast.**

**Legendary investor Jeremy Grantham opined on Elon Musk's salesmanship and said that home prices are destined to fall amid a period of elevated mortgage rates in a new interview on Friday.**

**Grantham joined Ritholtz Wealth Management's Josh Brown and Michael Batnick on "The Compound and Friends" podcast and also talked about everything from the current stock market environment, asset bubbles, and what ticks him off the most.**

**These are the top 10 quotes from Grantham's new interview.**

### **1. Expect lower home prices**

**"Forty years of lower and lower interest rates push asset prices up, particularly housing through the mortgage mechanism. How can it not? If you can afford to pay more for your house because the mortgage rates are 3%, sooner or later you pay more for it. And so the competition bids the price up to fill the available affordability. Now the mortgage [rate] is 7%. The same thing will happen in reverse. It doesn't happen overnight. Everyone in the market wants everything to happen yesterday. But with interest rates and mortgages, it can take a long time to percolate through. But you can be absolutely certain that it will."**

### **2. Real estate bubble**

**"Real estate is a global bubble. It has driven house prices provably to multiples of family income all over the world: Beijing, Shanghai, Sydney, Adelaide, Canada, London. It used to be multiples of three and a half times family income. London is now 10 times. Toronto is worse. No one can afford to buy a house. No young kids come out to buy a house. This is not a stable equilibrium," Grantham said.**

**"House prices will come down... 30% would be a pretty good guess."**

### **3. The mega-cap tech stocks are monopolies**

**"The FAANGs are a very high average quality because, they are, let's face it, monopolies. And they have great pricing control, obviously, and they have good profit margins. They aren't necessarily higher quality than Coca-Cola, but combined with growth, they're pretty damn high quality."**

### **4. Biggest pet peeve**

**"[Calling me a] bubble historian is terrific. [Calling me a] perma bear I want to shoot people."**

### **5. Tesla: Love the car, not the stock**

**"I bought a Tesla in 2019. Red. And then I wrote in a quarterly letter 'what a terrific car.' It was unlike anything my wife or I had ever come across. My wife hits 90 [mph] on the way to Boston most times. But I said, of course, as a stock, different story. It looks incredibly expensive. From that day, it's up 10 times. When I wrote that it didn't have any earnings, it didn't look like it might have any earnings. In fact it looked quite uncertain it would exist in two years. They had a cash crunch," Grantham said.**

**"If you say, 'how did it happen,' he [Musk] was such a wonderful propagandist that he talked the stock up way ahead of any possibility, and then he sold lots of stock. Got a lot of assets. Talked the stock up again. Sold a lot of assets over and over again until he had generated out of thin air a massive amount of real buying power which went straight into these megafactories. It was almost miraculous management generating the money out of thin air, out of bullshit and charisma."**

### **6. Stock market bubble**

**Co-host Michael Batnick asked: "Are we in a big bubble?"**

**"Yes, of course," Grantham replied.**

## **7. What the stock market loves**

**"It loves low inflation. It hates high inflation. It likes 2% stable inflation. It doesn't like to see it bouncing around... Secondly, it loves high profit margins. Way down in third place is the stability of growth."**

## **8. QuantumScape investment**

**"I invested in QuantumScape nine years ago... I was so inspired by them that I wanted to make the biggest investment I'd ever made... Fast-forward a few years and it comes [public] as a SPAC, which is most unfortunate since I've gone on record of saying [SPACs] are so disgusting, they should be illegal, they are licenses to steal for the organizers," Grantham said.**

**"QuantumScape is a brilliant research lab that finds itself in the market as a SPAC four years before having a product. So what happens? It's a \$10 [stock price], four times my investment. Two months later, it's \$131... that holding was worth \$625 million. I wasn't allowed to get out for six months... Six months later, it's \$25. We sold practically all of it, 10 times our money."**

## **9. The crucial ingredient to a stock market bubble**

**"The surge that took place in late 2020 finally had the characteristics that have been missing for 10 years. The mania came out. As I have said many times, bubbles [are] not just about price. If you get price and it's boring, that is not a peak. You have got to see higher prices plus crazy behavior which is unique that you have never seen anything like. [NFTs], meme-stocks, QuantumScape is the biggest scale of any bubble in [stock market] history."**

## **10. Biggest bubble in history**

**"Japan real estate is the mother and father of all bubbles, much bigger than their stock market which is the mother and father of all stock bubbles. Their real estate was over 10 times downtown Manhattan. Downtown Manhattan was very high price, downtown Tokyo was over 10 times. That's the biggest bubble I think in history, including the South Sea bubble."**

**THE CHILD POVERTY RATE IN THE UNITED STATES HAS MORE THAN DOUBLED** September 14, 2023 by Michael

**If you take an honest look at the numbers, the obvious conclusion is that the U.S. economy is rapidly going in the wrong direction. Delinquency rates are soaring, sales of previously-owned homes have declined [by more than 32 percent](#) over the past two years, inflation is starting to rise at a frightening pace again, large companies all over America are laying off workers, and we just witnessed the largest decline in real median household income [in more than a decade](#). Sadly, it is often the most vulnerable members of our society that get hit the hardest when economic times get rough. According to the Census Bureau, the child poverty rate in the United States [more than doubled](#) from 2021 to 2022... [\(Read More...\)](#)**

**LIFE IN AMERICA HAS NEVER BEEN MORE UNAFFORDABLE THAN IT IS RIGHT NOW** September 26, 2023 by Michael

**Our standard of living is being systematically destroyed, but for a lot of years many Americans didn't fully understand what was taking place because it was happening so slowly. But now we have reached a stage where the purchasing power of our money is collapsing and the cost of living has become exceedingly painful. Thanks to our rapidly rising cost of living, the middle class is becoming “the impoverished class”, and the poor are increasingly being pushed out into the streets. If we do not find a way to turn these trends around, it won't be too long before we have tremendous societal turmoil on our hands. ([Read More...](#))**

**When are we going to wake up and admit that our system is failing? If close to half of our young adults find themselves needing to live with their parents, we have a major crisis on our hands. Yes, there are some young people that are simply lazy and don't want to work hard enough. I definitely understand that. But most young adults in America today don't actually want to live with their parents. Given the opportunity, they would love to have their own homes. Unfortunately, home prices have risen to absolutely absurd levels and housing in America is now more unaffordable than it has ever been before. ([Read More...](#))**

**[WHAT LIFE IS REALLY LIKE IN AMERICA'S HELLISH INNER CITIES](#) [September 26, 2023](#) by [Michael](#)**

**All over the United States, major cities are descending into a state of chaos. Every day, more migrants that came pouring through our wide open borders arrive in our inner cities, and many of them end up joining gangs or selling drugs. Meanwhile, more of our young people get hooked on drugs with each passing day. In the worst areas, you can see hordes of them literally staggering around like zombies because they have been drugged out of their minds. All of this addiction is fueling an unprecedented homelessness crisis. In fact, the Wall Street Journal [is reporting](#) that homelessness in the United States is growing faster this year than ever before...violent crime is absolutely exploding all over the nation. If you choose to wander the streets of America's hellish inner cities, you are literally taking your life into your hands, because a violent predator could literally be around [the next corner](#)... we are still only in the very early stages of this crisis. **The rapidly growing chasm that exists between the ultra-wealthy and all the rest of us is not good for our society. In recent years, our leaders flooded the system with enormous mountains of money, and all of that money greatly enriched those at the very top of the economic food chain. Unfortunately, all of that money also created a tremendous amount of inflation which has been crushing the standard of living for millions upon millions of hard working Americans. We just witnessed the largest decline in real median household income [since 2010](#), the child poverty rate in the U.S. [has more than doubled](#), and this year homelessness is rising in our nation [at the fastest pace ever recorded](#). **Hundreds of millions of people are desperately hungry all over the world, and by the time you are done reading this article more children will starve to death. Earlier this year, CNN [actually admitted](#) that we are in the midst of “the worst food crisis in modern history”, but because the mainstream media rarely features images of the tremendous suffering on the other side of the globe most Americans don’t even know that it is happening. Here in the western world, the primary way that the global food crisis is manifesting is through significantly higher prices at the grocery store. Those higher prices are certainly painful, but we can deal with that. But when you don’t have enough food to feed your family on a consistent basis, that really is a nightmare scenario. ## **WELCOME TO THE REAL ESTATE INDUSTRY APOCALYPSE**

**September 7, 2023** by **Michael**

**Higher interest rates are absolutely strangling the real estate industry, and there is no relief in sight. The sudden shift from a very low interest rate environment to a much higher interest rate environment has paralyzed sales. As I have discussed [previously](#), very few homeowners that are currently locked into a mortgage at a low interest rate want to sell, because buying a home to replace the one that they are selling would mean taking on a mortgage at a much higher rate of interest. And millions of potential home buyers have been chased out of the market because of the exceedingly high mortgage payments that they would be facing if they pulled the trigger on a purchase right now. So sales of previously-owned homes have dropped [by more than 32 percent](#) over the past two years. Because the moment that an invasion of Taiwan begins, the United States and China will be at war and nothing will ever be the same again. Of course the Chinese would not consider an attack on Taiwan to be an invasion of a foreign country. The Chinese consider Taiwan to be part of their territory just like we consider Florida or Texas to be part of our territory. ## **TEN REASONS TO DOUBT THE POSSIBILITY OF A "SOFT LANDING"**

**Here are 10 reasons to doubt the soft landing narrative.**

- 1. Excess savings are running out. One of the reasons consumers have been able to keep up with price inflation is the fact that they piled up a lot of excess savings during the pandemic year. But that savings is nearly gone. Aggregate savings peaked at \$2.1 trillion in August 2021. As of June, the San Francisco Fed estimated that aggregate savings had dropped to \$190 billion. In other words, Americans have blown through \$1.9 trillion in savings in just two years. At**

**this pace, all of the excess savings Americans accumulated will be gone sometime during the third quarter.**

- 2. Consumers are maxing out their credit cards. As Americans blew threw their savings, they turned to credit cards to make ends meet. Credit card debt rose to over \$1 trillion for the first time ever in the second quarter of 2023. But there are signs consumers are close to maxing out their credit cards. In June, credit card spending suddenly fell off a cliff.**
- 3. People are having a hard time paying their credit card bills. A combination of rising interest rates and increasing credit card balances are squeezing consumers. The number of Americans rolling credit card debt from month to month is now higher than the number of people paying their bills in full for the first time ever. Meanwhile, default and delinquency rates are rising, not only on credit cards, but also on personal loans and auto loans.**
- 4. Student loan payments are about to resume. After enjoying a three-year break, student loan borrowers are about to pay the piper. Around 40 million Americans have outstanding student loans totaling \$1.57 trillion. When payments resume, borrowers will find their finances squeezed. According to a survey, 56% of federal student loan borrowers say they will have to choose between making student loan payments and paying for necessities such as rent, bills and groceries. Moody's estimates student loan repayment will deliver a \$75 billion hit to consumption on an annual basis.**
- 5. 401k hardship loans have spiked 36% this year. In other words, Americans are dipping into their retirement savings in order to make ends meet. This reveals just how much stress consumers are feeling. And like credit card borrowing and savings, this pool of money is finite.**

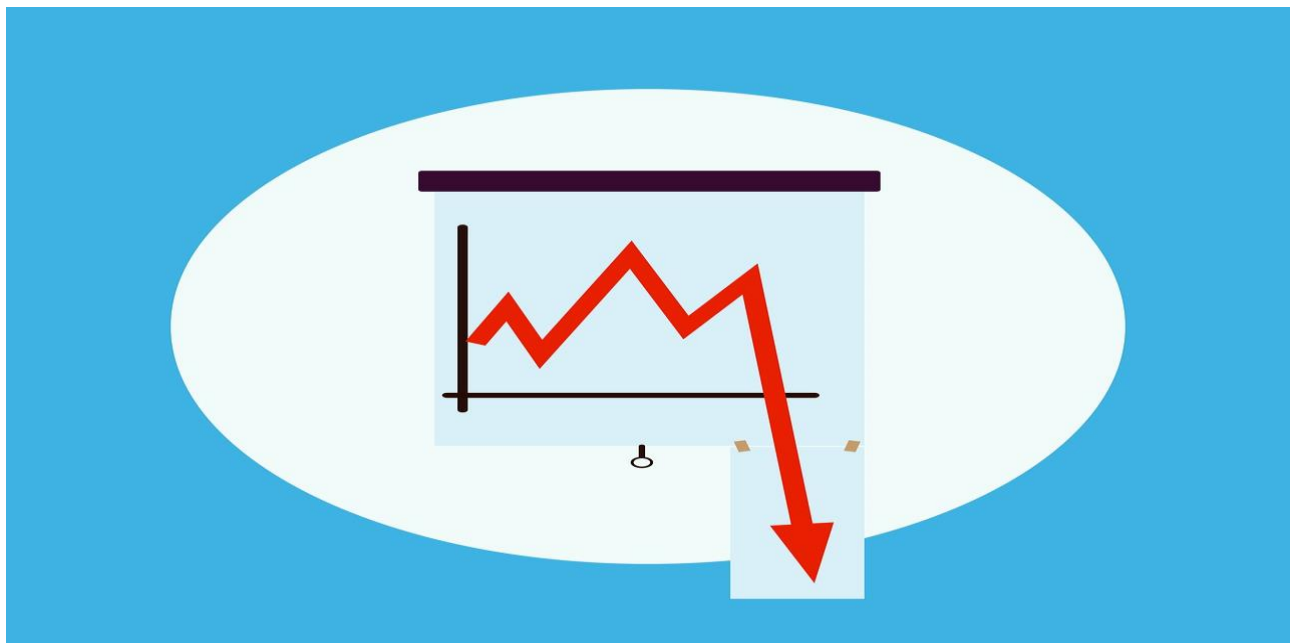

- 6. Banks are tightening lending standards. The net percentage of banks tightening lending standards has soared from -32.4 in Q3 2021, to 50.8 in Q3 of this year. The lack of available credit will almost certainly slow consumption down the road.**
- 7. The cost of housing continues to soar. Mortgage rates have soared to the highest level in over two decades. Combined with a tight market, housing affordability has hit a nearly four-decade low. Rents have also blown through the roof.**
- 8. The financial crisis continues to bubble under the surface. In early August, Moody's cut the credit rating of 10 small and midsize banks. It also placed six large banks on review for potential downgrades and revised 11 more banks from a stable outlook to a negative outlook. Later in the month, S&P Global followed Moody's lead and downgraded the credit ratings of five banks. It also lowered the outlook for several others. The Federal Reserve managed to paper over the banking crisis with a bailout program. But the growing number of banks with credit rating downgrades reveals the problem wasn't solved.**
- 9. Corporate defaults have surged. By the end of June, the number of corporate debt defaults in 2023 had already exceeded the total number of defaults last year. Moody's projects that corporate defaults will continue to surge with the default rate coming in at 4.7% globally. In the worst-case scenario, defaults could rise as high as 13.7%, surpassing the number of defaults in 2008.**
- 10. Monetary policy works with a lag. A lot of people believe in a soft landing because, despite a sharp, rapid increase in interest rates, the economy hasn't crashed yet. But history tells us that it takes a while for the impacts of tighter monetary policy to work their way through an economy. The**

**Great Recession didn't kick off until nearly two years after the last Fed rate in June 2006.**

**Schools all over America are starting to bring the masks back, and many parents are responding with outrage. After everything that we have been through the past few years, many were hoping that the days of masks, restrictions and mandates were behind us. But now we are being told that COVID cases are on the rise, and many officials are deciding to implement the same measures that they did in 2020 and 2021. If this is already taking place while the number of COVID cases is still relatively low, what will happen if we see a huge spike in cases this winter? ([Read More...](#))**

[September 4, 2023](#) by [Michael](#)**

**Joe Biden just can't quit fibbing. On Labor Day, he traveled to Philadelphia where he delivered a speech touting the success of "Bidenomics". Who does he think he is fooling? The American people aren't buying that nonsense. They know that prices are out of control at the grocery store. They know that the cost of living has been rising much faster than their paychecks have been. They know that high interest rates have made it much harder to buy a home. And they can see that lots of people are starting to lose their jobs. The truth is that Joe Biden's time in the White House has been an economic nightmare, and it appears that conditions are likely to get even worse before he is scheduled to leave. ## **8 SIGNS THAT WE ARE RIGHT ON THE VERGE OF A MAJOR CREDIT CARD DEBT CRISIS August 29, 2023 by Michael**

**We aren't quite there yet, but an enormous credit card debt crisis is definitely brewing. Americans are becoming increasingly dependent on their credit cards to make ends meet from month to month, the percentage of us that are carrying balances from month to month is growing, and the average rate of interest on such balances has risen above 20 percent. If you can possibly avoid it, do not carry credit card balances from month to month, because that will strangle you financially. Unfortunately, our young people are never taught this in school, and so many of them get into deep financial trouble when they become adults. And once you get into deep financial trouble, it can take many years to get out of it. ([Read More...](#))**

**#1 The total amount of credit card debt in the United States has surpassed the one trillion dollar mark and is now at [the highest level ever recorded...](#)**

**The New York Federal Reserve reported earlier in August that total credit card debt surged to \$1.03 trillion during the three-month period from April to June, an increase of \$45 billion – or 4.6% – from the previous quarter. It marks the highest level on record in Fed data dating back to 2003.**

**#2 The average rate of interest on credit card balances has now risen to a new all-time record high [of 20.63 percent...](#)**

**The dual increase in credit card usage and delinquency rates is particularly concerning because [interest rates](#) are astronomically high right now. The average credit card annual percentage rate, or APR, hit a new record of 20.63% last week, according to a Bankrate database that goes back to 1985.**

**#3 A whopping [47 percent](#) of all U.S. cardholders are now carrying balances from month to month...**

**Many cardholders from all age and income groups are carrying over credit card balances, with 47 percent saying they do so — up from 39 percent in December 2021 — the survey (carried out in July) finds. Agewise, 53 percent of Gen Xers carryover card balances from month to month. Next were Gen Z consumers (52 percent) followed by millennials, (49 percent) and baby boomers (41 percent).**

**#4 The average credit card debt level in the United States just continues to grow...**

**The national average credit card debt grew to \$7,227, according to the survey.**

**However, U.S. consumers in some states held more debt than others. Connecticut's residents had the highest average debt level of \$9,408, surpassing the national average by 30%, according to the survey. Right behind it were credit card holders in New York, registering the second-highest average debt of \$9,165.**

**#5 Most Americans are not running up credit card debt because they are making frivolous purchases. According to one industry insider, most Americans are doing it [“because they are under financial strain”](#)...**

**Bankrate.com analyst Greg McBride said that “people aren’t financing purchases at 20% because everything is going swimmingly. They’re doing so because they are under financial strain.**

**#6 The number of credit card delinquencies in the U.S. has surged dramatically [over the past two years...](#)**

**The rising number of delinquent accounts also indicates people are having a hard time keeping up with credit card payments. The number of accounts past due by one cycle has increased 42.6% over the last two years. Delinquencies have crept up to the highest level since 2017.**

**#7 One recent survey discovered that many Americans that actually use personal loans to consolidate credit card debt end up [quickly running up new credit card balances](#) close to their previous levels...**

**A survey conducted by TransUnion between April 2021 and September 2022 found that borrowers who used a personal loan to consolidate their credit card debt saw their balances decrease by 57% on average, but for many, those balances returned close to their previous levels 18 months later.**

**#8 At a time when economic conditions are slowing down all over the nation, Americans [are becoming increasingly dependent on their credit cards...](#)**

**In fact, two in five Americans with credit cards said they were more dependent on their credit cards than ever before, the survey found. And 35% said they won’t be able to pay off their credit card debt before the end of the year. In addition, another 35% of respondents said they’d likely max out at least one credit card by the end of 2023.**

**“This increased reliance on credit cards is likely to lead many even deeper into debt – which is especially troublesome with interest rates well into the double digits,” Quicken said in its report.**

**Unfortunately, a lot more Americans are likely to get into credit card trouble in the months ahead, because the labor market is getting significantly tighter.**

If any collective effort is going to work, people have to believe in that effort. That is true whether we are talking about a sports team, a business partnership, a romantic relationship or a nation as a whole. When people stop believing, it is just a matter of time before failure arrives, and at this point the American people simply do not believe in those that are currently running our society. Effective immediately, Morris Brown College has reinstated its COVID-19 mask mandate due to reports of positive cases among students in the Atlanta University Center. Over the next 14 days, the following protocols will be in place:

1. Mask Wearing: All students and employees are required to wear face masks (staff may remove in their offices while alone).
2. Physical Distancing: Students must maintain physical distancing.
3. Large Gatherings: Institutional guidelines for gathering sizes must be followed. There will be no parties or large student events on campus for the next two weeks.
4. Isolation and Quarantine: Students must adhere to institutional policies and CDC guidelines for isolation and quarantine.
5. Contact Tracing: Compliance with college-initiated contact tracing efforts is expected.
6. Symptom Monitoring: Students and employees are obligated to undergo temperature checks upon campus arrival.
7. Regular Hand Washing/Sanitization: Frequent hand washing is expected from all students and employees.

### **Former President and Allies Face Conspiracy Charges**

- **Former President Trump and 18 others, including Rudolph Giuliani and Mark Meadows, face charges related to what prosecutors called a “criminal enterprise.”**
- **The 41 counts named are by far the most sweeping set of accusations Mr. Trump has faced in connection with the 2020 election results.**

**Richard Fausset**

**The indictment's use of the phrase "cover up" carries echoes of the Watergate scandal. It is difficult to imagine that its deep resonance in American political history was lost on the authors of the indictment.**

**Maggie Haberman**

**That Trump tried to stay in office is an undeniable fact. His advisers have been saying since the Russia investigation in 2016 that it's not a crime to lie to reporters. The question here is whether the lies around the election constitute criminality, and Willis has laid out an extensive case.**

**Alan Feuer**

**The 41 counts named in the indictment—from racketeering charges, to conspiracy to commit forgery, to perjury—are by far the most sweeping set of accusation Trump has faced in any of his other three indictments to date.**

**Reid Epstein**

**One thing to watch will be pressure on Gov. Brian Kemp, a Republican, to pardon Trump. Kemp has sparred with Trump and one of his longtime aides is now working on the presidential campaign of Gov Ron DeSantis of Florida, Trump's top rival for the Republican nomination.**

**Benjamin Protes**

**Rudy Giuliani, who rose to power as a tough-on-crime prosecutor and was dubbed "America's Mayor" after the Sept. 11 terrorist attacks, was indicted on an array of charges, including racketeering and making false statements.**

**Benjamin Protes**

**While the alleged racketeering activity comprises the meat of the indictment, prosecutors also charged 40 other crimes, including false statements, forgery, impersonating a public officer and soliciting public officers to violate their oaths.**

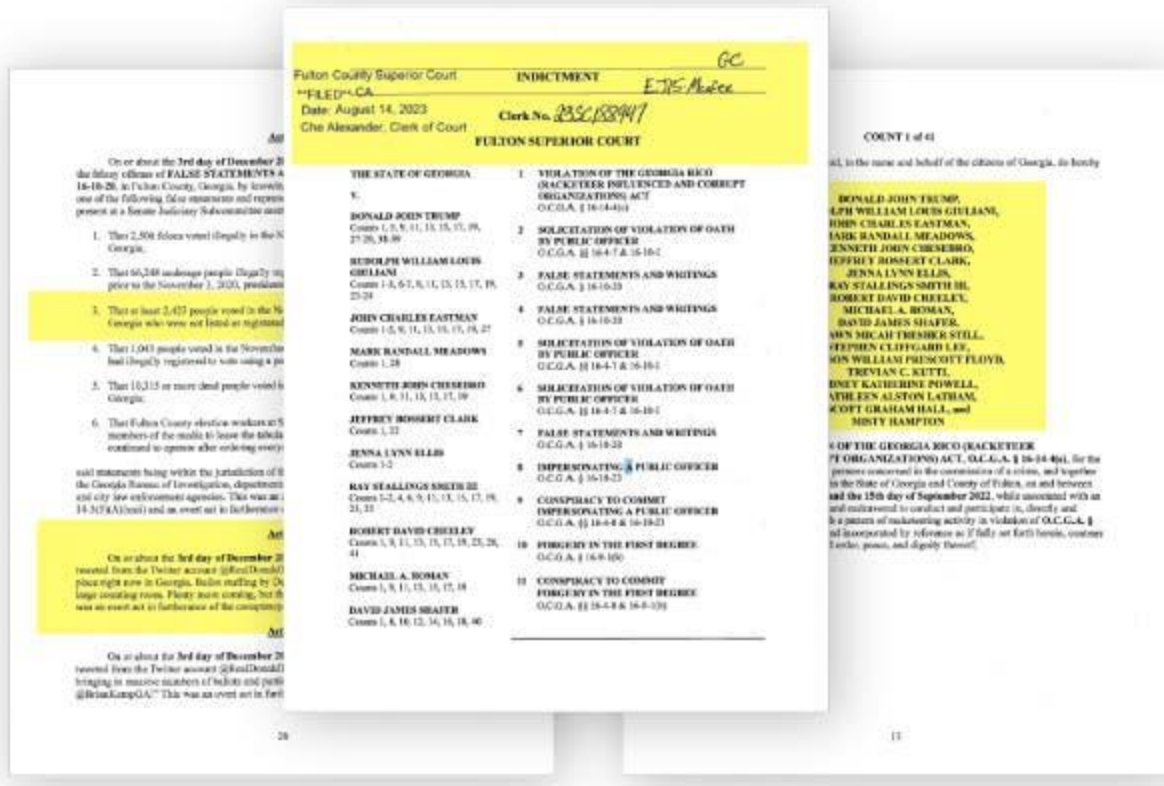

**Maggie Haberman**

**Trump spent years in New York engaged in gamesmanship with prosecutors or regulators, to varying degrees. His business — real-estate — had aspects of construction that were riven with organized crime. To be charged with a racketeering charge himself was unimaginable.**

**Maggie Haberman**

**A statement from the Trump campaign accuses Fani T. Willis, the Fulton County district attorney, of being a “rabid partisan” and says her investigation is based on “fabricated accusations.” The campaign tied the investigation to the Biden administration, despite its coming from a state prosecutor.**

**October 3, 2023 by Michael**

**Artificial intelligence is changing our world at a pace that is absolutely breathtaking. If you would have asked me a decade ago if I would live to see artificial intelligence create a world class piece of art or a full-length feature film, I would have said no way. But now those are simple tasks for artificial intelligence to accomplish. So what is going to happen once AI becomes millions of times smarter and millions of times more powerful than it is today? Given enough time, AI would take over every area of our lives. Our world is definitely crazy right now, but fifty years from now it would resemble something out of an extremely bizarre science fiction novel if AI is allowed to continue to develop at an exponential rate. The body concluded the threat from invasive species is “underappreciated, underestimated and often unacknowledged,” with only about a sixth of the world’s nations having laws or regulations on the books addressing invasive plants and animals. With new species introduced at an “unprecedented” rate of 200 a year, the problem is expected to get worse before it gets better...The most widespread invasive animal, according to the report, is the black rat, which spread by stowing away on ships and scurried its way not only into dense cities but onto far-flung islands as well, where it has decimated**

**ground-nesting seabirds and other animals.**

**The impact of land-dwelling rats on islands is so profound that even nearby reef fish can feel it after the rodents alter the flow of nutrients into the ocean [ DO NOT UNDERESTIMATE A NATURAL ANSWER: CATS! ]**

**... On Guam, for instance, the voracious brown tree snake has already driven several native birds to extinction. On Maui, the destructive power of invasive vegetation was on full display last month after introduced grasses fueled wildfires that killed more than 100 people...Many invasive species have taken hold in aquatic ecosystems, too. In the Caribbean, venomous lionfish are driving down the numbers of native fish. In the Great Lakes, zebra mussels are clogging the intake pipes of drinking water systems and power plants. But one of the most devastating aquatic invaders is a delicate-looking flower. Even Antarctica is not spared. The introduction of invasive grasses coupled with rising temperatures puts portions of the southern continent at risk of converting into grasslands. IN ADDITION TO INVASIVE SPECIES, THE OTHER FOUR KEY DRIVERS OF EXTINCTION ARE CLIMATE CHANGE, HABITAT DESTRUCTION, POLLUTION AND DIRECT EXPLOITATION OF SPECIES, WITH A MILLION PLANTS AND ANIMALS AT RISK OF VANISHING FOR GOOD. Climate change is poised to make the problem of invasive pests worse by enabling animals such as tropical fire ants to march north into**

**One of the most important international agreements in modern history is being secretly negotiated behind the scenes, and once it is publicly announced it could fundamentally change the geography of the Middle East. I wrote about this [last week](#), but I have learned more since that time. As part of a blockbuster deal to normalize relations between Saudi Arabia and Israel, the Saudis want to achieve some sort of a diplomatic breakthrough for the Palestinians. But the Saudis have floated another plan that might be acceptable to Netanyahu's government, and it would result in a historic division of the Holy Land. ([Read More...](#))**

These negotiations are being conducted very quietly, because they are touching on issues that are extremely sensitive. As you will see below, we are not likely to learn much about the exact details of the deal that is being formulated until it is finalized. The Biden administration is brokering these peace negotiations, and one thing we do know is that there will be no normalization of relations unless Israel is willing to make major concessions regarding the Palestinians. ## WHY ARE SO MANY APOCALYPTIC NATURAL DISASTERS SUDDENLY HAPPENING ALL OVER THE GLOBE? August 9, 2023 by Michael

**Almost every day there is another “apocalyptic” natural disaster in the news. Have you ever wondered why this is happening? This year there has been an endless parade of unprecedented fires, floods, earthquakes, storms and droughts. On Wednesday, it was Hawaii’s turn. An absolutely horrifying wildfire ripped through the heart of the island of Maui like a lawnmower, and it happened so suddenly that many were not able to evacuate in time. Just about every form of evil that you can possibly imagine is absolutely exploding in our society today, and there is chaos in major cities from coast to coast. **Over the past few years, we have seen food prices in the United States and other wealthy countries do things that they have never done before. Unfortunately, this is just the beginning. Global food supplies are getting tighter, and meanwhile global demand for food just continues to increase. For decades, many among the elite were optimistic that someday we would be able to eliminate global hunger completely because tremendous progress was being made. But then right around 2015 things started to reverse, and now the trend is very much going in the wrong direction. According to the United Nations, [2.4 billion people](#) did not have enough food to eat last year, and [900 million of them](#) were facing severe food insecurity. Those numbers will almost certainly go even higher this year, because it is getting more difficult for poor countries to get the food that they need to feed their populations. ([Read More...](#))**

# WHAT IS GENERATIVE AI?

VISUALLY EXPLAINED... BY GENERATIVE AI

ChatGPT, DALL-E, MidJourney, DeepMind—generative AI technologies have exploded into mainstream consciousness. With access to these technologies increasing day-by-day, we asked AI to help demonstrate the power and influence of this new tech trend.

This robot—and all the visuals in this infographic, including icons—were generated using AI software like MidJourney and DALL-E.

The text captions were also generated using AI (ChatGPT).

**Generative AI** is a type of artificial intelligence (AI) that uses machine learning algorithms to create new and original content like images, videos, text, and audio.

## 1 Forming a Database

A neural network, consisting of various information or media files like images, text, data, sounds, etc., forms the basis of artificial intelligence.

## 2 Inputting a Prompt

The user provides the AI with a description or sample of the desired content.

Prompts can be any user-submitted material, like words, numbers, or photos.

## 3 Generating Content

...and the AI uses its neural network to generate new examples that are similar to the ones it has trained from.

This image was created on MidJourney using the following text prompt: a virtual illustration of a woman sitting behind a desktop computer with two large monitors, futuristic style, 3D rendering, realistic, AI

But the truth is that they can't. When you take a close look at the models they are using, you quickly discover that they are fundamentally flawed. Throughout human history, the climate has always been changing, and human activity has had very, very little to do with it. In recent years, we have seen record-setting cold, unprecedented flooding and horrific droughts. **WHY DO THEY HAVE TO RUIN JUST ABOUT EVERYTHING?** July 23, 2023 by Michael

**I am not one of those people that believe that everything in our society was better decades ago when I was growing up. **STOCKS.** “When back-tested to 1870, the Shiller P/E ratio has averaged 17.04 over 153 years. But as of the closing bell on July 13, 2023, the S&P 500's Shiller P/E stood at 31.44, which is its highest reading in more than a year. But there is a limit to valuations on Wall Street, and the Shiller P/E ratio has, once again, found itself in the danger zone. Looking back to 1870, there have only been six instances where the S&P 500's Shiller P/E decisively crossed above 30. Aside from the current move, the other five instances eventually led to declines ranging from 20% on the low end for the S&P 500 in the fourth quarter of 2018, to 89% on the high-end for the Dow Jones Industrial Average during the Great Depression. Though a move of this magnitude is highly unlikely in today's market, the key takeaway is that when valuations become extended to the upside, a minimum decline of 20% has eventually followed.”

**“...The book describes a "psychological turmoil" in many of Musk's romantic relationships. It recounts Musk's and Heard's first meeting: She asked if she could visit SpaceX a year after the two worked on the action film "Machete Kills," Heard as a star and Musk as a consultant. Isaacson also documents the explosive fights in their relationship, writing, "She and Musk would stay up all night fighting, and then he would not be able to get up until the afternoon." In the biography, Heard said she loves Musk "very much" but that "Elon loves fire and sometimes it burns him." **The Internet just changed forever, but most people living in the United States don't even realize what just happened. A draconian new law known as the "Digital Services Act" went into effect in the European Union on Friday, and it establishes an extremely strict regime of Internet censorship that is far more authoritarian than anything we have ever seen before. From this point forward, hordes of European bureaucrats will be the arbiters of what is acceptable to say on the Internet. If they discover something that you have said on a large online platform that they do not like, they can force that platform to take it down, because someone in Europe might see it. So even though this is a European law, the truth is that it is going to have a tremendous impact on all of us. [\(Read More...\)](#)**

**Censorship of the Internet has been getting worse for years, but we just crossed a threshold which is going to take things to a whole new level. On August 25th, a new law known as the “Digital Services Act” went into effect in the European Union. Under this new law, European bureaucrats will be able to order big tech companies to censor any content that is considered to be “illegal”, “disinformation” or “hate speech”. That includes content that is posted by users outside of the European Union, because someone that lives in the European Union might see it. I wrote about this [a few days ago](#), but I don’t think that people are really understanding the implications of this new law. ## **10 SIGNS THAT WE REALLY ARE LIVING IN APOCALYPTIC TIMES**

**August 1, 2023** by **Michael**

**Time is running out for humanity. Our world becomes a little bit more like a really bad science fiction movie with each passing day, and our self-destructive tendencies are slowly but surely transforming our society into a living nightmare. Given enough time, we would destroy ourselves and everything around us. On a very basic level, most people can feel that global events are starting to spiral out of control. Evil is growing all around us, and just about everything that our leaders do to solve our rapidly growing problems seems to make them even worse. The pace of change just keeps getting faster and faster, and many fear that this will soon lead to widespread chaos all over the globe. The**

**following are 10 signs that we really are living in apocalyptic times...**

**#1 Leaders all over the world seem to be catching “war fever”, and the Biden administration just made a military conflict with China even more likely by announcing a 345 million dollar weapons package [for Taiwan](#)...**

**The Biden regime is sending \$345 million in weapons to Taiwan as they look to create another proxy war against China similar to the proxy war they have set up in Ukraine with Russia.**

**The U.S. made the announcement on Saturday. In response to the news, China has made it clear they will not be backing down.**

**“No matter how much of the ordinary people’s taxpayer money the ... Taiwanese separatist forces spend, no matter how many U.S. weapons, it will not shake our resolve to solve the Taiwan problem. Or shake our firm will to realize the reunification of our motherland,” said Chen Binhua, a spokesperson for the Taiwan Affairs Office of China.**

**#2 Both sides just continue to escalate the war in Ukraine, and now the Russians are openly warning that they could potentially use [nuclear weapons](#)...**

**The Kremlin today bluntly threatened use of nuclear weapons in the wake of the Ukrainian drone strike on Moscow’s skyscraper zone.**

**Three drones struck an elite office building and residential skyscraper in Moscow early Sunday morning in what Russia’s Defence Ministry has branded an ‘attempted terrorist attack by the Kyiv regime’.**

**Dmitry Medvedev, a former Russian president and Putin ally, has warned there is ‘simply no other way out’ and said that Kyiv**

**should ‘pray to our warriors’ that they do not ‘allow the global nuclear fire to flare up’.**

**#3 According to the United Nations, 2.4 billion people already do not have enough food to eat. And now that the Black Sea grain deal has broken down and India has placed severe restrictions on rice exports, we are being warned that global food prices [could soon go much higher](#)...**

**Helen Dickinson, chief executive of the British Retail Consortium (BRC), said the price of bread and breakfast cereals were most likely to increase given [Ukraine](#)’s role as one of the breadmakers of the world.**

**Rice supplies are now also under pressure after India restricted most exports, which the World Bank warned on Monday (July 31) would cause “considerable increases in world prices and induce price volatility”.**

**#4 Pestilences are raging all over the globe, and many old diseases are now making stunning comebacks. For example, Florida has now become the epicenter for [an outbreak of leprosy in the United States](#)...**

**Health officials say that cases of leprosy, also known as Hansen’s disease, are surging in Central Florida.**

**In a research letter, the Centers for Disease Control and Prevention (CDC) said that Central Florida has accounted for 81 percent of reported cases in the state and almost one-fifth of reported cases nationwide.**

**#5 Global weather patterns have gone completely nuts. For example, Phoenix just had a streak where the high temperature reached at least 110 degrees [for 31 days in a row](#)...**

**Phoenix sizzled through its 31st consecutive day of at least 110 degrees Fahrenheit and other parts of the country grappled Sunday with record temperatures after a week that saw significant portions of the U.S. population subject to extreme heat.**

**#6 Men are getting pregnant and [giving birth to babies](#)...**

**A 22-year-old transgender man has given birth to twins after going through six rounds of artificial insemination in a bid to get pregnant.**

**Aaden Darr, a Starbucks barista from Charleston, West Virginia, was born biologically female but came out as transgender at 16 years old after identifying as a lesbian for several years and started a course of testosterone.**

**However, he soon came to realize that it was his dream to have a biological child – so he put a stop to his hormonal treatment and visited his local family planning clinic in order to begin the process of having a baby.**

**#7 Technology continues to increase at a pace that is absolutely breathtaking. In fact, it is being reported that scientists have developed a “breakthrough” treatment which [“appears to annihilate all solid tumors”](#)...**

**Scientists have developed what may be a “holy grail” molecule that eradicates all solid cancer tumors while leaving other cells unaffected. The breakthrough was achieved by the team at the City of Hope Hospital, one of the largest cancer research and treatment organizations in the United States, and targets the proliferating cell nuclear antigen (PCNA) protein.**

**A mutated form of PCNA assists cancers in their repair and growth. The team has developed a molecule, AOH1996, that**

**targets and eradicates the mutated PCNA. Previously, PCNA was considered too challenging to be a target for therapy, but AOH1996 appears to annihilate all solid tumors in preclinical research.**

**#8 Scientists are bringing ancient species back to life. For instance, it is being reported that one team of researchers was recently able to “reanimate” worms that had been frozen [for thousands of years](#)...**

**Scientists have managed to reanimate worms that were frozen for an estimated 46,000 years.**

**Thought to have lived in the late Pleistocene era, a small group of the worms found 40 metres deep in the Siberian permafrost have been thawed out and revived.**

**#9 Deaths from heart attacks have been surging dramatically [in every age group in the United States](#)...**

**NBC’s the *Today* show reported, “A national study from Cedars Sinai hospital shows the deaths related to heart attacks increased across every age group since the spring of 2020, but the group that saw the biggest increase isn’t who you might think... The relative increase in heart attack-associated deaths among 25-44-year-olds was a staggering 30%... Experts are still working to figure out why young people are so impacted.”**

**#10 Our soil and water are already heavily saturated with microplastics, and now we are being told that this crisis [is getting “exponentially” worse](#)...**

**NOT EVEN THE Arctic Ocean is immune to [the incessant growth of microplastic pollution](#). In a new study that analyzed sediment core samples, researchers quantified how many of the particles have been deposited since the early 1930s. As scientists have**

**shown elsewhere, the team found that microplastic contamination in the Arctic has been growing exponentially and in lockstep with the growth of plastic production—which is now up to a trillion pounds a year, with the global amount of plastic waste [projected to triple](#) by 2060.**

**If you don't understand why microplastics are a very serious existential threat to our society, you really need to read [my most recent book](#). Given enough time, microplastics would completely collapse our civilization even if none of the other very serious problems that we are currently dealing with existed.**

**Of course the same thing could be said about nuclear war, global famine, AI and a number of other cataclysmic threats that we are now facing.**

## LIVING DOLL ... TAYLOR SWIFT

At the same forum, Liao advocated "editing" humans to become "so small that we get eaten by cats," again for the sake of "climate change."
